In a globalized world governed by domestic and international law, these corporations can be everywhere and nowhere at once, reaping financial benefits and enjoying the protections of investor-state arbitration but rarely being held accountable for the economic, environmental, and human rights harms they may have caused. Given the far-reaching power and success of the transnational corporation, and the many legal tools allowing these companies to avoid liability, how can governments protect their citizens? Broad-ranging in perspective, colourful and thought-provoking, the chapters in *Corporate Citizen* make the case that because the success of corporate global citizenship risks undermining national and international democratic governance, the multinational corporation must be more closely scrutinized and controlled – in the service of humanity and the protection of the natural environment.
