flash games alternative: **Resonant Games** Eric Klopfer, Jason Haas, Scot Osterweil, Louisa Rosenheck, 2015-05-13 Principles for designing educational games that integrate content and play and create learning experiences connecting to many areas of learners' lives. Too often educational videogames are narrowly focused on specific learning outcomes dictated by school curricula and fail to engage young learners. This book suggests another approach, offering a guide to designing games that integrates content and play and creates learning experiences that connect to many areas of learners' lives. These games are not gamified workbooks but are embedded in a long-form experience of exploration, discovery, and collaboration that takes into consideration the learning environment. *Resonant Games* describes twenty essential principles for designing games that offer this kind of deeper learning experience, presenting them in connection with five games or collections of games developed at MIT's educational game research lab, the Education Arcade. Each of the games—which range from *Vanished*, an alternate reality game for middle schoolers promoting STEM careers, to *Ubiquitous Bio*, a series of casual mobile games for high school biology students—has a different story, but all spring from these fundamental assumptions: honor the whole learner, as a full human being, not an empty vessel awaiting a fill-up; honor the sociality of learning and play; honor a deep connection between the content and the game; and honor the learning context—most often the public school classroom, but also beyond the classroom. The open access edition of this book was made possible by generous funding from the MIT Libraries and Klopfer's lab.

flash games alternative: The Amazing Illustrated Word Game Memory Books Volume 2, Set 2 Frank H. Gaertner, 2011-06 This book, Volume 2, Set 2 of the AIWGMB, is a continuation of a three-set series of stories and illustrations representing all of the 7-letter words captured by The Central Twenty-One Five-Letter Stems that feed into the Central Seven Six-Letter Stems of Volume

1, Set 1. Knowledge and flash, photographic-memory recall of these word lists, together with those of the Auxiliary Seven Six-Letter Stems of Volume 1, Set 2 can be valuable assets for any wannabe, top contender in our rapidly growing, competitive, word-game, social networks. The wordlists, organized in Mentafile(TM) format, are coded with peg-words assigned to each letter of the alphabet. This type of iconic coding-organization can make letter-management, and identification of 7-letter words within scrambled arrays, effortless, almost as though one has an app that automatically brings bonus-words to mind as one plays off letters on-the-way to one of the Central Seven Six-Letter Stems. For example, in a board game, where letters must be unscrambled to reveal hidden words, one might hold, in alphagram order, the following seven letters; ADNRSUT. For those accomplished with Vol. 2, Set 2 of the AIWGMB, the identification of the five-letter stem, RNAS, and the letter, D, within ADNRSUT, would be instantaneous, along with the mental search for the story and illustration of She STRANDS the drunk on a TUNDRA'S plain. Alternatively, one might hold ADNRST, which would immediately bring up the word STRANDS from that story. STANDER, the only other possibility for a 7-letter RNASD word would show up with the holding of ADNRST, the only bonus word featured in the drunk file of RNEAS, one of the Central Seven Six-Letter Stems of Vol. 1, Set 1. Therefore, with no E, R or S in the hand, one skilled in the use of The AIWGMB would know, with valuable certainty, that no 7-letter bonus words were available for play. But the fun's not over. It really begins when we add to our search the thirty four, 8-letter RNASD words of RNAS, RNEAS and INRAS. Having learned to read alphagrams from the flashcards connected to the stories and Illustrations of this series, we now watch our opponents shrink in terror as we unleash our knowledge and skill at finding and playing one of these 8-letter winners!
