enchantment decoder: *Decoding the Mind of God* Margret Ann Kelly, 2011-07-06 In *Decoding the Mind of God* author O. M Kelly delves into the unconscious mind and discovers the secrets of the collective consciousness, showing how we can realize the potential of the human mind through belief in ourselves. The Laws of the universe are identical to the collective consciousness, they reveal an answer to every question we are capable of asking. We constantly receive these answers through the vibrations of the energy fields through our being, all without us knowing how to realign our intelligence with our unconscious mind. The truth remains hidden to us. Surprising as it may seem, the key to understanding ourselves lies in a mathematical language, which is the make-up of the unconscious mind. Kelly explores this language through the texts and myths of myriad cultures and belief systems, notwithstanding the truth of the science behind the Egyptian Hieroglyphs and the stories collected in the Bible. As we read this volume we realize that all of these stories are connected to our own story within. Kelly's perceptions of the order of higher consciousness are framed by stories from her experiences of personal discovery and over twenty years of researching, lecturing and teaching all around the world. Once these codes are unveiled, we earn our freedom where we can release the fear in which humanity habitually traps itself, creating our accidents, diseases, why we die, right up to explaining extra terrestrial intelligence. This book exposes the secret codes of the universal language that will help us achieve the divine unity with the universe and ourselves.

enchantment decoder: Enchanted Neurons Pierre Boulez, Jean-Pierre Changeux, Philippe Manoury, 2020-01-21 What happens in the mind of the creator, the composer, when he creates, is still unknown. It is this "mystery" that this book aims to shed light on. Does artistic creation involve specific intellectual and biological processes? Can we get as close as possible to its mechanism to understand how a composer, a musician, a conductor, chooses to put together this and that note, to make this and that rhythm succeed one another, to bring out something new, to produce beauty, to arouse emotion? Is it possible to understand what happens in the composer's brain when he writes *Le Sacre du printemps* or *Le Marteau sans maître* ? Trying to build a neuroscience of art is the challenge of this book, which is the result of a debate between Jean-Pierre Changeux, the neurobiologist, who made the brain the main focus of his research, and Pierre Boulez, the composer, for whom the theoretical questions related to his art, music, have always been essential. A deeply new book. An intellectual event. Conductor, composer, founder of Ircam, Pierre Boulez is one of the greatest creators of the 20th century. Also a music theorist, he held the "Invention, Technique and Language" chair at the Collège de France for nearly twenty years. Honorary professor at the Collège de France, member of the Academy of Sciences, Jean-Pierre Changeux is one of the greatest contemporary neurobiologists. Philippe Manoury is a composer and professor emeritus at the University of California, San Diego.

enchantment decoder: Resounding Transcendence Jeffers Engelhardt, Philip Bohlman, 2016-03-04 *Resounding Transcendence* is a pathbreaking set of ethnographic and historical essays by leading scholars exploring the ways sacred music effects cultural, political, and religious transitions in the contemporary world. With chapters covering Christian, Muslim, Jewish, and Buddhist practices in East and Southeast Asia, the Indian subcontinent, North America, the Caribbean, North Africa, and Europe, the volume establishes the theoretical and methodological foundations for music scholarship to engage in current debates about modern religion and secular epistemologies. It also transforms those debates through sophisticated, nuanced treatments of sound and music - ubiquitous elements of ritual and religion often glossed over in other disciplines. *Resounding Transcendence* confronts the relationship of sound, divinity, and religious practice in diverse post-secular contexts. By examining the immanence of transcendence in specific social and historical contexts and rethinking the reified nature of religion and world religions, these authors examine the dynamics of difference and transition within and between sacred musical practices. The work in this volume transitions between traditional spaces of sacred musical practice and emerging public spaces for popular religious performance; between the transformative experience of ritual and the sacred musical affordances of media technologies; between the charisma of individual performers and the power of the marketplace; and between the making of authenticity and hybridity in religious repertoires and practices. Broad in scope, rich in ethnographic and historical detail, and theoretically ambitious, *Resounding Transcendence* is an essential contribution to the study of music and religion.

enchantment decoder: **Environmental Skill** Mark Coeckelbergh, 2015-02-20 Today it is

widely recognized that we face urgent and serious environmental problems and we know much about them, yet we do very little. What explains this lack of motivation and change? Why is it so hard to change our lives? This book addresses this question by means of a philosophical inquiry into the conditions of possibility for environmental change. It discusses how we can become more motivated to do environmental good and what kind of knowledge we need for this, and explores the relations between motivation, knowledge, and modernity. After reviewing a broad range of possible philosophical and psychological responses to environmental apathy and inertia, the author argues for moving away from a modern focus on either detached reason and control (Stoicism and Enlightenment reason) or the natural, the sentiments, and the authentic (Romanticism), both of which make possible disengaging and alienating modes of relating to our environment. Instead he develops the notion of environmental skill: a concept that bridges the gap between knowledge and action, re-interprets environmental virtue, and suggests an environmental ethics centered on experience, know-how and skillful engagement with our environment. The author then explores the implications of this ethics for our lives: it changes the way we think about , and deal with, health, food, animals, energy, climate change, politics, and technology.

enchantment decoder: **Plagiarism and Literary Property in the Romantic Period** Tilar J. Mazzeo, 2013-04-23 In a series of articles published in Tait's Magazine in 1834, Thomas DeQuincey catalogued four potential instances of plagiarism in the work of his friend and literary competitor Samuel Taylor Coleridge. DeQuincey's charges and the controversy they ignited have shaped readers' responses to the work of such writers as Coleridge, Lord Byron, William Wordsworth, and John Clare ever since. But what did plagiarism mean some two hundred years ago in Britain? What was at stake when early nineteenth-century authors levied such charges against each other? How would matters change if we were to evaluate these writers by the standards of their own national moment? And what does our moral investment in plagiarism tell us about ourselves and about our relationship to the Romantic myth of authorship? In *Plagiarism and Literary Property in the Romantic Period*, Tilar Mazzeo historicizes the discussion of late eighteenth- and early nineteenth-century plagiarism and demonstrates that it had little in common with our current understanding of the term. The book offers a major reassessment of the role of borrowing, textual appropriation, and narrative mastery in British Romantic literature and provides a new picture of the period and its central aesthetic contests. Above all, Mazzeo challenges the almost exclusive modern association of Romanticism with originality and takes a fresh look at some of the most familiar writings of the period and the controversies surrounding them.
