Understanding Felicity in Islam

Felicity in Islam refers to a state of true happiness, contentment, and spiritual fulfillment derived from living in accordance with Islamic principles. Unlike fleeting or material happiness, Islamic felicity is rooted in the pursuit of righteousness, sincerity, and a strong connection with Allah. The concept is deeply embedded in the Qur'an, Hadith, and classical Islamic scholarship, emphasizing that ultimate felicity is achieved through obedience to God, moral integrity, and the cultivation of virtues. Books discussing felicity in Islam often address both the psychological and spiritual dimensions of happiness, providing readers with practical guidance and philosophical reflections.

Historical Background of Felicity in Islamic Literature

The exploration of felicity in Islamic literature dates back to the early centuries of Islam, where scholars and mystics sought to define and attain the highest state of happiness. Early works often focused on the relationship between faith, good deeds, and inner peace. This theme was further developed during the Golden Age of Islamic civilization, when philosophers and theologians like Al-Ghazali and Ibn Sina examined the nature of happiness from ethical, metaphysical, and psychological perspectives. Felicity was seen not only as a personal goal but also as a societal ideal, encouraging justice, compassion, and harmonious living.

Lipton, 2018-04-02 Exploring how the medieval mystic Ibn 'Arabi has been read as an inclusive universalist through the interpretative field of Perennial Philosophy, this book shows how his metaphysics is inseparably intertwined with Islamic supersessionism. Ibn 'Arabi's universalist reception is thus traced to lineages of Eurocentrism, revealing how Perennialism is itself exclusionary.

felicity in islam book: Handbook of Ethics of Islamic Economics and Finance Abbas Mirakhor, Zamir Iqbal, Seyed Kazem Sadr, 2020-04-20 Since the financial crisis of 2007/2008, a renewed discussion on the ethics and finance is being examined from different dimensions – finance for good society, responsible finance, ethical finance, financial crimes, and financial repression. The principal objective of this Handbook on Ethics of Islamic Economics and Finance is to provide a deeper understanding of the ethical underpinning of Islamic economics and finance. The reader will notice that the Handbook reflects a diversity of views on the subject of economic and business ethics in Islam across the intellectual spectrum of Muslim thought over the globe. Handbook attempts to find answers to some questions concerning the definition and characteristics of the ethical system in Islam. What is its goal and how do its rules and practices ensure welfare for individuals and society? Are the moral principles universal and invariable or do they change and adapt with the social changes of communities and progress in science and technology? Is the present generation accountable for the welfare of future generations? Where is the boundary between law and ethics and who guarantees their adoption and implementation?

felicity in islam book: Islam and the Challenge of Civilization Abdelwahab Meddeb, 2021-05-20 The award-winning author of The Malady of Islam makes an urgent case for an Islamic reformation in this bold and fresh study (Publishers Weekly). Western Europe is now home to millions of

Muslims, where Christianity and Judaism have come to coexist with secular humanism and positivist law. In *Islam and the Challenge of Civilization*, Meddeb advocates a new approach to Islam in tune with today's diverse society. Rather than calling for moderate Islam—which Meddeb views as thinly disguised Wahabism—he calls for an Islam inspired by the great Sufi thinkers, whose practice of religion was not bound by doctrine. With a return to long-standing doctrinal questions, Meddeb calls upon Muslims to distinguish between Islam's spiritual message and the temporal, material, and historically grounded origins of its founding scriptures. He contrasts periods of Islamic history—when Muslim philosophers engaged in lively dialogue with other faiths and civilizations—with modern Islam's collective amnesia of this past. In this erudite and impassioned study, Meddeb demonstrates that Muslims cannot join the concert of nations unless they set aside outmoded notions such as jihad. Ultimately, he argues, feuding among the monotheisms must give way to the more important issue of citizenship in today's global setting.
