fifth grade history textbook download: Teaching Elementary Social Studies James A. DuPlass, 2008 Written for the elementary social studies methods course, this interactive program combines features of a textbook and a workbook, with thorough integration between the print text and a dynamic web site. Increasingly, majors in elementary education (if not the population at large) are more attuned to reading interactive material with relatively brief narrative, bulleted items, text boxes, and targeted messages (like web pages) rather than traditional, denser text. To accommodate these preferences, the layout of the print text features a larger-than-usual font, an 8 x 11 trim size, and spiral binding, and the content includes an abundance of bulleted lists, shaded text boxes, and contemporary graphics. The program's interactive approach and flexibility allow the professor to model the kinds of teaching principles and practices that students will want to use in their own elementary school classrooms. These principles and practices are integrated throughout the text and include a focus on active-learning strategies, application of constructivist principles, focus on Big Ideas and thinking skills, use of the Internet, and modeling of Best Practices and Performance-based assessments (based on INTASC and NCATE standard). Thus, the book will serve as a springboard for classroom activities, web site explorations, and/or instructor-led activities.

fifth grade history textbook download: Narrating the Soviet Era in Russian School History Textbooks Olga Konkka, 2025-09-03 This study focuses on how Russian history textbooks published between 1992 and 2021 dealt with the topic of the Soviet period (1917-1991). Representations of this part of Russia's past in school manuals have provoked vivid debates and bolstered government intervention in the field, while a gradual shift towards a less critical narrative of the USSR in more recent textbooks is often presented as directed by Vladimir Putin. This study combines research into these texts and inquiry into those who write, publish, approve, or criticize them. Bringing together these perspectives provides a more complex view of school textbooks as final products of both top-down and bottom-up processes. This volume is aimed at postgraduates, researchers, and academics specializing in Soviet history, contemporary Russian politics and society, and history education and textbooks.
