finkelstein achievements: Educational Achievement and Psychosocial Transition in Visually Impaired Adolescents Ranjita Dawn, 2017-12-13 This book provides a fresh approach to studies on adolescents with visual impairment. It threads through the three elements of disability (visual impairment), psychosocial development of adolescents, and their educational achievement. It highlights how these concepts traverse across and cast an irrefutable impact on each other. The author prepares the ground by highlighting the failure of existing theories of disability studies in addressing issues concerning adolescents. She further critiques the psycho-medical approach to disability which undermines or disregards its social construction. The book provides an analysis of numerous issues affecting the psychosocial development of adolescents with visual impairment, which is further validated through narratives in educational settings. It also strongly advocates the need to create awareness about the basic ethics of human relationships and rights, moral consciousness and social and civic responsibilities, which can play a vital role in ensuring healthy psychosocial development of adolescents with visual impairment, and in ensuring inclusion.

finkelstein achievements: Superior Memory Elizabeth Valentine, John Wilding, 2013-06-20 This book examines the nature and causal antecedents of superior memory performance. The main theme is that such performance may depend on either specific memory techniques or natural superiority in the efficiency of one or more memory processes. Chapter 2 surveys current views about the structure of memory and discusses whether common processes can be identified which might underlie general variation in memory ability, or whether distinct memory subsystems exist, the efficiency of which varies independently of each other. Chapter 3 provides a comprehensive survey of existing evidence on superior memory performance. It examines techniques which underlie many examples of unusual memory performance, and concludes that not all this evidence is explicable in terms of such techniques. Relations between memory ability and other cognitive processes are also discussed. The remainder of the book describes the authors' own studies of a dozen memory experts, employing a wide variety of short- and long-term memory tasks. These studies provide a much larger body of data than previously available from studies of single individuals, usually restricted to a narrow range of tasks and rarely involving any systematic study of long-term retention. The authors argue that in some cases unusual memory ability is not dependent on the use of special techniques. They develop some objective criteria for distinguishing between subjects who demonstrate natural superiority and those strategists who depend on techniques. Natural superiority was characterised by superior performance on a wider range of tasks and better long-term retention. The existence of a general memory ability was further supported by a factor analysis of data from all subjects, omitting those who described highly-practised techniques. This analysis also demonstrated the independence of initial encoding and retention processes. The monograph raises many interesting questions concerning the existence and nature of individual differences in memory ability (a previously neglected topic), their relation to other cognitive processes and implications for theories concerning the structure of memory.

finkelstein achievements: *Conservative Judaism in America* Pamela S. Nadell, Marc Raphael, 1988-09-16 Pamela Nadell's biographical dictionary and sourcebook is a landmark contribution to American, Jewish, and religious history. For the first time, a great American Jewish religious movement is portrayed with amplitude, authority, and personality. In the most revolutionary era in two millennia of Jewish history, this surely is an important volume. Moses Rischin, Professor of History, San Francisco State University *Conservative Judaism in America: A Biographical Dictionary and Sourcebook* is the first extensive effort to document the lives and careers of the most important leaders in Conservatism's first century and to provide a brief history of the movement and its central institutions. It includes essays on the history of the movement and on the evolution of its major institutions: The Jewish Theological Seminary of America, The Rabbinical Assembly, and The United Synagogue of America. It also contains 135 biographical entries on the leading figures of Conservative Judaism, appendices, and a complete bibliography on sources of study.

finkelstein achievements: *Achievement and Assurance of Safety* Felix Redmill, Tom Anderson, 2012-12-06 Each year there are improvements in safety-critical system technology. These arise both from developments in the contributing technologies, such as safety engineering, software engineering, human factors and risk assessment, and from the adoption or adaptation of appropriate techniques from other domains, such as security. For these improvements to be of real benefit, they need to be applied during the appropriate stage in the life cycle of the system, whether it be development, assessment, or operation. For this to occur, they must be communicated and explained. Each year the Safety-critical Systems Symposium offers a distinguished forum for the presentation of papers on such developments, and also for papers from industry on the lessons learned from the use of technologies and methods. The results of many collaborative research projects, with components from both industry and academia, are reported in a universally understandable form. In 1995 the Symposium was held in Brighton, a venue calculated to stimulate not just the presenters of papers, but all the delegates. Yet, this book of Proceedings is intended not only for the delegates but also for readers not able to attend the event itself. We welcome both categories of reader. Delegates have the benefit of attending the presentations and the opportunity to participate in the discussions; those who take up this book after the event can peruse it at their leisure and, perhaps, on account of it will resolve to attend subsequent symposia.

finkelstein achievements: *The Misconception Trilogy : Book 1 : the Genesis of Misconception* Paul John, 2004 Book 1 in The Misconception Trilogy presents a thought-provoking analysis of the Bible's history compared with archaeological discoveries and the histories of the ancient world.

finkelstein achievements: *Improving Academic Performance and Achievement With Inclusive Learning Practices* Charamba, Erasmios, Ndhlovana, Shalom Nokuthula, 2025-06-06 Improving academic performance and achievement requires educational systems to adopt inclusive learning practices that recognize and accommodate the diverse needs of all students. Inclusive education emphasizes equitable access to learning opportunities, tailored instructional methods, and supportive environments that value each learner's background, abilities, and learning style. By implementing strategies such as differentiated instruction, collaborative teaching, and assistive technologies, educators can foster engagement and enhance outcomes for students from various socioeconomic, linguistic, and ability backgrounds. Further research into inclusive learning practices may promote academic success, social cohesion, and lifelong learning. *Improving Academic Performance and Achievement With Inclusive Learning Practices* explores the integration of inclusive education into academic practices. It examines the use of new curricula, teaching methods, and achievement parameters for improved academic performance across education sectors. This book covers topics such as gamification, multilingualism, and open distance learning, and is a useful resource for educators, academicians, researchers, and scientists.

finkelstein achievements: *Perspectives on the Formation of the Book of the Twelve* Rainer Albertz, James D. Nogalski, Jakob Wöhrle, 2012-07-04 The formation of the Book of the Twelve is one of the most vigorously debated subjects in Old Testament studies today. This volume

assembles twenty-four essays by the world's leading experts, providing an overview of the present state of scholarship in the field. The book's contributors focus on questions of method, history, as well as redactional and textual history.

finkelstein achievements: International Guide to Student Achievement John Hattie, Eric M. Anderman, 2013-01-17 The International Guide to Student Achievement brings together and critically examines the major influences shaping student achievement today. There are many, often competing, claims about how to enhance student achievement, raising the questions of What works? and What works best? World-renowned bestselling authors, John Hattie and Eric M. Anderman have invited an international group of scholars to write brief, empirically-supported articles that examine predictors of academic achievement across a variety of topics and domains. Rather than telling people what to do in their schools and classrooms, this guide simply provides the first-ever compendium of research that summarizes what is known about the major influences shaping students' academic achievement around the world. Readers can apply this knowledge base to their own school and classroom settings. The 150+ entries serve as intellectual building blocks to creatively mix into new or existing educational arrangements and aim for quick, easy reference. Chapter authors follow a common format that allows readers to more seamlessly compare and contrast information across entries, guiding readers to apply this knowledge to their own classrooms, their curriculums and teaching strategies, and their teacher training programs.

finkelstein achievements: Congress Volume Basel 2001 André Lemaire, 2014-09-03 This volume publishes the papers given by invitation at the 17th Congress of the International Organization for the Study of the Old Testament, which was held in Basel from 5-10 August 2001. It presents a state of the art of the current exegesis of the Hebrew Bible, taking into account the latest research in general linguistics and semitic philology, as well as textual criticism (Massora Magna, Septuagint, Qumran manuscripts), ethno-sociology and archaeology. Feminist biblical studies are duly represented as well as the last research on literary criticism on the Pentateuch, especially in its relation to other ancient Near Eastern texts (Neo-assyrian and Aramaic inscriptions). Finally, two contributions throw light on the problem of religious interpretation of the Bible (Resurrection of the Dead and Biblical Theology).

finkelstein achievements: Professor of Apocalypse Jerry Z. Muller, 2024-05-14 The controversial Jewish thinker whose tortured path led him into the heart of twentieth-century intellectual life Scion of a distinguished line of Talmudic scholars, Jacob Taubes (1923-1987) was an intellectual impresario whose inner restlessness led him from prewar Vienna to Zurich, Israel, and Cold War Berlin. Regarded by some as a genius, by others as a charlatan, Taubes moved among yeshivas, monasteries, and leading academic institutions on three continents. He wandered between Judaism and Christianity, left and right, piety and transgression. Along the way, he interacted with many of the leading minds of the age, from Leo Strauss and Gershom Scholem to Herbert Marcuse, Susan Sontag, and Carl Schmitt. Professor of Apocalypse is the definitive biography of this enigmatic figure and a vibrant mosaic of twentieth-century intellectual life. Jerry Muller shows how Taubes's personal tensions mirrored broader conflicts between religious belief and scholarship, allegiance to Jewish origins and the urge to escape them, tradition and radicalism, and religion and politics. He traces Taubes's emergence as a prominent interpreter of the Apostle Paul, influencing generations of scholars, and how his journey led him from crisis theology to the Frankfurt School, and from a radical Hasidic sect in Jerusalem to the center of academic debates over Gnosticism, secularization, and the revolutionary potential of apocalypticism. Professor of Apocalypse offers an unforgettable account of an electrifying world of ideas, focused on a charismatic personality who thrived on controversy and conflict.

finkelstein achievements: Handbook of Attitudes, Volume 2: Applications Dolores Albarracin, Blair T. Johnson, 2018-10-10 Attitudes are evaluations of people, places, things, and

ideas. They help us to navigate through a complex world. They provide guidance for decisions about which products to buy, how to travel to work, or where to go on vacation. They color our perceptions of others. Carefully crafted interventions can change attitudes and behavior. Yet attitudes, beliefs, and behavior are often formed and changed in casual social exchanges. The mere perception that other people—say, rich people—favor something may be sufficient to make another person favor it. People's own actions also influence their attitudes, such that they adjust to be more supportive of the actions. People's belief systems even change to align with and support their preferences, which at its extreme is a form of denial for which people lack awareness. These two volumes of *The Handbook of Attitudes* provide authoritative, critical surveys of theory and research about attitudes, beliefs, persuasion, and behavior from key authors in these areas. This second volume covers applications to measurement, behavior prediction, and interventions in the areas of cancer, HIV, substance use, diet, and exercise, as well as in politics, intergroup relations, aggression, migrations, advertising, accounting, education, and the environment.

finkelstein achievements: A Hidden River Anthony Pino, 2012-11 *A Hidden River* is a collection of stories and poems dealing with the themes of humanity's assault on its environment and on itself. After long years of federal service, the writer returned to California and found it overrun with industrial, defense and residential development and obsessed with violence. He responded to this condition with poems of fantastic revenge, nostalgia and sorrow, such as *Plum Valley --- Joaquin and Me*, *Apricot*, and *Red Cadillac*. Some stories and poems also deal with our society's violent disregard for human civility and the continuing presence of violence against other human societies. These would include *The Amazing Death of J. J. Finkelstein* and *An Ode to My Mexican Pot*. Any country willing to kill or disparage its own will certainly not stop at mauling others. *The War Bird and Mars*, 2003 are poems of dread, anticipating prolonged, exploitative war. *Pax Vobiscum*.

finkelstein achievements: Vizard Uncut Steve Bedwell, 2007 *VIZARD UNCUT* is the unauthorised and largely untold story of Steve Vizard's life. Drawn from extensive interviews and comprehensive research, *VIZARD UNCUT* seeks to demystify the enigma that is Steve Vizard: underpants salesman, corporate lawyer, Gold Logie winner, philanthropist, victim of a multi-million-dollar fraud and subject of a high-profile investigation by ASIC. In the early 1990s, Vizard revolutionised television comedy with the ground-breaking *Fast Forward* and *Full Frontal*, with characters such as Roger Ramshett, Hunch and the airline stewards Wayne and Darryl. He is also well remembered as the wise-cracking, stunt-pulling host of *Tonight Live* who interviewed everyone from Kylie Minogue to Gerard Depardieu. The late 1990s saw him become a part of the Melbourne establishment, especially in the arts, entertainment and sport. Then, in one swift blow, Steve Vizard went from icon to pariah. Steven Bedwell gives us the complete, complex story of the man, pieced together from never-before-seen documents and testimonies. *VIZARD UNCUT* brings to light the events of recent years that have shrink-wrapped themselves over a remarkably full and diverse life.

finkelstein achievements: Radical Aesthetics and Music Criticism in America, 1930-1950 Alan Howard Levy, 1991 This work examines the relationship of the process of creative human endeavours and of the creators themselves to their surroundings. It also attempts to show how political, economic and intellectual pressures intensify and affect developments in many sectors of the arts.

finkelstein achievements: The Psychology of Underachievement Harvey P. Mandel, Sander I. Marcus, 1991-01-16 An integrated approach to the psychology of underachievement, unifying theory and practice. Examines different types of underachievers, explores the relationship between personality and underachievement, and provides useful guidelines for clinical practice. Provides an outline and summary of the voluminous (and often contradictory) literature, then presents theoretical models of the underachiever that are grounded in mainstream diagnostic and therapeutic theory. Offers examples of each personality type, so practitioners can easily recognize and treat them.

finkelstein achievements: Closing the Education Achievement Gaps for African American

finkelstein achievements: Geschichte Israels und Judas im Altertum Ernst Axel Knauf, Hermann Michael Niemann, 2021-01-18 Geschichte ist nicht re-konstruierbar. Konstruieren muss man bekanntlich die Geschichte immer... Der Unterschied ist nur, ob man gut oder schlecht konstruiert. (J. Wellhausen, 1886). Dieses Buch konstruiert mit Daten, mit rationalen und kontrollierbaren Methoden. Die Autoren verbinden Jahrzehnte ihrer archäologischen Feldarbeit in Israel mit Erfahrung universitärer Lehrtätigkeit zur biblischen Exegese und der Geschichte Israels vom 13.Jh. v.Chr. bis 135 n.Chr. Ihre Schwerpunkte liegen auf geographischem Kontext, sozialen und ökonomischen Verhältnissen, Darbietung zeitgenössischer Inschriftlichen und ikonographischen Funde und biblischer Texte. Sie konstruieren den Hintergrund der Groß-Erzählung, die vor allem Angehörige der Tempel in Jerusalem und auf dem Garizim in persischer Zeit mit der Thora als religiöser Lebensbasis und kollektiver Erinnerung erarbeiteten, ergänzt durch prophetische, geschichtstheologische und weisheitliche Texte der Bibel. So bietet das Buch neueste Ergebnisse der Archäologie, der Analyse (außer-)biblischer Texte und eine Konstruktion der Geschichte Israels und Judas als Grundlagen biblischer Exegese und Theologie.
