As a case study, the book formally reconstructs how United States democracy assistance influenced the Polish liberalization process between 1980 and 1989. The process tracing of its causal mechanisms is extensive and builds on data previously not recorded. fall themed ice breaker questions: 'We Belong to Them' Tünde Puskás, 2009 This book explores what happens with ethnic and national identifications built on the same ethnocultural grounds, but under different socioeconomic circumstances. Territorial and non-territorial minorities have traditionally been considered not susceptible to comparison because it was assumed that groups organized on different grounds were distinctively separate phenomena. In this study, the comparative method is used to throw new light on how ethnic and national identifications are constructed, negotiated, and re-constructed in territorial and non-territorial minority contexts. The author investigates whether the ethnic and national identification and articulation processes of Hungarians in Slovakia and Hungarians in Sweden constitute different types of Hungarianness. Drawing on extensive interview material the empirical focus is on the interaction of self-narratives and public narratives. The author seeks to challenge the notion that national minorities and diaspora communities are fundamentally different in their understanding of nationhood and their relationship to an external national homeland.

fall themed ice breaker questions: Immigrant Incorporation in East Asian Democracies Erin Aeran Chung, 2020-10-08 Despite labour shortages and rapidly shrinking working-age populations, Japan, South Korea, and Taiwan shared restrictive immigration policies and exclusionary practices toward immigrants until the early 2000s. While Taiwan maintained this trajectory, Japan took incremental steps to expand immigrant services at the grassroots level, and South Korea enacted sweeping immigration reforms. How did convergent policies generate these divergent patterns of immigrant incorporation? Departing from the dominant scholarship that focuses on culture, domestic political elites, and international norms, this book shows the important role of civil society actors - including immigrants themselves - in giving voice to immigrant interests, mobilizing immigrant actors, and shaping public debate and policy on immigration. Based on more than 150 in-depth interviews and focus groups with over twenty immigrant communities, *Immigrant Incorporation in East Asian Democracies* examines how the civic legacies of past struggles for democracy shape current movements for immigrant rights and recognition.
