finkelstein innovations: Top-down- und Bottom-up-Ansätze im Innovationsmanagement

Florian Totzauer, 2014-08-07 Florian Totzauer beleuchtet die Entwicklung von Innovationen aus Top-down- bzw. Bottom-up-Perspektive. Er untersucht, wie Topmanager über ihr eigenes Innovationsverhalten besonders neuartige Innovationen top-down fördern können und welche individuellen Eigenschaften hierbei relevant sind. Darüber hinaus identifiziert er die funktionsübergreifende Zusammenarbeit als Innovationstreiber und analysiert, wie ein innovationsorientiertes Personalmanagement eingesetzt werden kann, um Barrieren der Zusammenarbeit an zentralen Schnittstellen wie zwischen Forschung & Entwicklung und Marketing zu überwinden und Innovationen bottom-up zu generieren. In zwei empirischen Studien werden die spezifischen Erfolgsfaktoren und Wirkungszusammenhänge der behandelten Top-down- und Bottom-up-Ansätze im Innovationsmanagement verdeutlicht.

finkelstein innovations: Innovationsumgebungen gestalten Philipp Plugmann, 2018-07-27 Die Ansicht, die deutsche Wirtschaft, samt der sogenannten Hidden Champions, wäre auf Jahrzehnte unangreifbar, ist eine riskante Wette auf die Zukunft. Entscheidend wird sein, wie innovativ die Unternehmen auch künftig sein werden und es bleiben. Wie man in seinem Unternehmen die Innovationsprozesse organisiert, die Ideen verwertet, Mitarbeiter aktiviert, Regeln aufstellt, Freiheiten einräumt und sich strukturiert, ist der jeweiligen Organisation überlassen, ist einzigartig und nur eingeschränkt planbar. Aber diese Innovationsumgebungen zu ermöglichen, ist eine unabdingbare Voraussetzung dafür, dass in Unternehmen Innovationen überhaupt entstehen und vorangetrieben werden können. Kombiniert mit einer positiv motivierenden Arbeitsatmosphäre, damit aus Neugier, Spieltrieb und Leistungsbereitschaft innovative Produkte und Dienstleistungen entwickelt werden können, bedarf es zusätzlich der Geschichten und Erfahrungen anderer Menschen bzw. aus interdisziplinärer Vernetzung. Die Beiträge indiesem Buch liefern Beispiele für gelingende Innovationsumgebungen, erzählen von besonderen Konstellationen und bieten so eine Reihe von frischen Impulsen für Unternehmer und Start-ups. Die Hidden Champions von heute werden auch die Champions von morgen bleiben, doch sollten wir langfristig übermorgen im Auge behalten.

finkelstein innovations: Neuerfindung einer Industrie Clemens Mast, 2017-02-20 Clemens Mast analysiert den Zusammenhang zwischen der Größe von Unternehmen und dem Erfolg einer Geschäftsmodellinnovation, dem neuen Innovationstypus, der eigenständig und komplementär zu Produkt-, Prozess- und Dienstleistungsinnovation wirkt. Basierend auf empirischen Studien verdeutlicht der Autor, dass insbesondere der technologisch dominierende deutsche Mittelstand bei der Geschäftsmodellinnovation schnell ins Hintertreffen geraten kann. Während Großkonzerne ihre Skalierungsvorteile und Start-ups ihre geschäftsmodellverändernden Initiierungsqualitäten nutzen, fehlen mittelständischen Unternehmen oftmals Fokussierung und Kompetenz für diesen anders wirkenden Innovationstypus. Abschließend zeigt Clemens Mast Möglichkeiten zur Förderung der Entwicklung, Implementierung und Skalierung einer Geschäftsmodellinnovation auf.

finkelstein innovations: Innovative Teaching: Best Practices From Business And Beyond For Mathematics Teachers Denise H Sutton, Alfred S Posamentier, 2021-01-26 Innovative Teaching: Best Practices from Business and Beyond for Mathematics Teachers provides educators with new and exciting ways to introduce material and methods to motivate and engage students by showing how some of the techniques commonly used in the business world — and beyond — are applicable to the world of education. It also offers educators practical advice with regard to the changing culture of education, keeping up with technology, navigating politics at work, interacting with colleagues, developing leadership skills, group behavior, and gender differences. Innovative Teaching demonstrates how the classroom environment is similar to the marketplace. Educators, like businesses, for example, must capture and hold the attention of their audience while competing with a constant stream of 'noise.' With the introduction of the Internet and the wide use of social media, promoters understand that they must not only engage their audience, but also incorporate audience feedback into the promotional work and product or service they offer. Innovative Teaching shows educators how to take the best practices from business — and beyond — and recombine these resources for appropriate use in the classroom.

finkelstein innovations: *Innovation in Religions Traditions* Michael A. Williams, Collett Cox, Martin Jaffee, 2011-10-13 The series Religion and Society (RS) contributes to the exploration of religions as social systems– both in Western and non-Western societies; in particular, it examines religions in their differentiation from, and intersection with, other cultural systems, such as art, economy, law and politics. Due attention is given to paradigmatic case or comparative studies that exhibit a clear theoretical orientation with the empirical and historical data of religion and such aspects of religion as ritual, the religious imagination, constructions of tradition, iconography, or media. In addition, the formation of religious communities, their construction of identity, and their relation to society and the wider public are key issues of this series.

finkelstein innovations: **Caring is Sharing — Exploiting the Value in Data for Health and Innovation** M. Hägglund, M. Blusi, S. Bonacina, 2023-06-22 Modern information and communication technologies make it easier for individuals to be involved in their own health and social care. They also facilitate contact between individuals and service providers and deliver more efficient tools for healthcare staff. Artificial Intelligence (AI) promises to bring even more benefits in the future, with more effectiveness and the provision of decision support. This book presents the proceedings of the 33rd Medical Informatics Europe Conference, MIE2023, held in Gothenburg, Sweden, from 22 to 25 May 2023. The theme of MIE2023 was 'Caring is Sharing – Exploiting Value in Data for Health and Innovation', stressing the increasing importance of sharing digital-health data and the related challenges. The sharing of health data is developing rapidly, both in Europe and beyond, so the focus of the conference was on the enabling of trustworthy sharing of data to improve health. Topics covered include healthcare, community care, self-care, public health, and the innovation and development of future-proof digital-health solutions, and the almost 300 papers

divided into 10 chapters also cover important advances in the sub domains of biomedical informatics: decision support systems, clinical information systems, clinical research informatics, knowledge management and representation, consumer health informatics, natural language processing, public health informatics, privacy, ethical and societal aspects among them. Describing innovative approaches to the collection, organization, analysis, and data-sharing related to health and wellbeing, the book contributes to the expertise required to take medical informatics to the next level, and will be of interest to all those working in the field.

finkelstein innovations: Innovative Strategies, Statistical Solutions and Simulations for Modern Clinical Trials Mark Chang, John Balser, Jim Roach, Robin Bliss, 2019-03-20 This is truly an outstanding book. [It] brings together all of the latest research in clinical trials methodology and how it can be applied to drug development.... Chang et al provide applications to industry-supported trials. This will allow statisticians in the industry community to take these methods seriously. Jay Herson, Johns Hopkins University The pharmaceutical industry's approach to drug discovery and development has rapidly transformed in the last decade from the more traditional Research and Development (R & D) approach to a more innovative approach in which strategies are employed to compress and optimize the clinical development plan and associated timelines. However, these strategies are generally being considered on an individual trial basis and not as part of a fully integrated overall development program. Such optimization at the trial level is somewhat near-sighted and does not ensure cost, time, or development efficiency of the overall program. This book seeks to address this imbalance by establishing a statistical framework for overall/global clinical development optimization and providing tactics and techniques to support such optimization, including clinical trial simulations. Provides a statistical framework for achieve global optimization in each phase of the drug development process. Describes specific techniques to support optimization including adaptive designs, precision medicine, survival-endpoints, dose finding and multiple testing. Gives practical approaches to handling missing data in clinical trials using SAS. Looks at key controversial issues from both a clinical and statistical perspective. Presents a generous number of case studies from multiple therapeutic areas that help motivate and illustrate the statistical methods introduced in the book. Puts great emphasis on software implementation of the statistical methods with multiple examples of software code (both SAS and R). It is important for statisticians to possess a deep knowledge of the drug development process beyond statistical considerations. For these reasons, this book incorporates both statistical and clinical/medical perspectives.

Discussion has been the core of these meetings so far, with the aim being to relate the results of the specialist investigator to broad historical questions concerning the nature and development of ancient societies. The papers presented here address a wider context: geographically, with the inclusion of the Aegean and thematically, with papers on natural products and raw materials. The time frame remains the same in covering the Late Bronze Age/New Kingdom. The majority of the papers draw on Egyptian evidence, and illustrate a multiplicity of approaches to the problems set by ancient technologies: modelling, methodology of art history and archaeology applied to a problematic group of artefacts, integration of archaeological and textual sources, and the application

of the results of scientific analysis to illuminate ancient technology.
