graff birkenstein textbook pdf: Teaching Readers in Post-Truth America Ellen C. Carillo, 2018-10-01 Teaching Readers in Post-Truth America shows how postsecondary teachers can engage with the phenomenon of "post-truth." Drawing on research from the fields of educational and cognitive psychology, human development, philosophy, and education, Ellen C. Carillo demonstrates that teaching critical reading is a strategic and targeted response to the current climate. Readers in this post-truth culture are under unprecedented pressure to interpret an overwhelming quantity of texts in many forms, including speeches, news articles, position papers, and social media posts. In response, Carillo describes pedagogical interventions designed to help students become more metacognitive about their own reading and, in turn, better equipped to respond to texts in a post-truth culture. Teaching Readers in Post-Truth America is an invaluable source of support for writing instructors striving to prepare their students to resist post-truth rhetoric and participate in an information-rich, divisive democratic society.

graff birkenstein textbook pdf: *Teaching Arguments* Jennifer Fletcher, 2023-10-10 No matter where students' lives lead after graduation, one of the most essential tools we can teach them is how to comprehend, analyze, and respond to arguments. Students need to know how writers' and speakers' choices are shaped by elements of the rhetorical situation, including audience, occasion, and purpose. In *Teaching Arguments: Rhetorical Comprehension, Critique, and Response*, Jennifer Fletcher provides teachers with engaging classroom activities, writing prompts, graphic organizers, and student samples to help students at all levels read, write, listen, speak, and think rhetorically. Fletcher believes that, with appropriate scaffolding and encouragement, all students can learn a rhetorical approach to argument and gain access to rigorous academic content. *Teaching Arguments* opens the door and helps them pay closer attention to the acts of meaning around them, to notice persuasive strategies that might not be apparent at first glance. When we analyze and develop arguments, we have to consider more than just the printed words on the page. We have to evaluate multiple perspectives; the tension between belief and doubt; the interplay of reason, character, and emotion; the dynamics of occasion, audience, and purpose; and how our own identities shape what we read and write. Rhetoric teaches us how to do these things. *Teaching Arguments* will help students learn to move beyond a superficial response to texts so they can analyze and craft sophisticated, persuasive arguments - a major cornerstone for being not just college- and career-ready but ready for the challenges of the world.

graff birkenstein textbook pdf: *Creating Confident Writers: For High School, College, and Life* Troy Hicks, Andy Schoenborn, 2020-06-02 Writing should be for an audience other than a teacher, and for a purpose beyond getting a grade. Connecting their classroom experience to

research about writing, as well as to framing documents in the field, two seasoned writing teachers distill the lessons they've learned about creating confident adolescent and young adult writers. Troy Hicks and Andy Schoenborn outline a fundamental stance to their approach—to invite, encourage, and celebrate students' writing—that is then echoed in the book's three-part structure. There are numerous classroom activities and assignments on topics from creating writing goals to supporting revision, examples of student work, and questions to guide teachers' reflections. In this book for any teacher of writing, from middle school through college, readers are invited to try strategies and allow students' voices to emerge, while discussing with colleagues how these approaches might work for them, too.

graff birkenstein textbook pdf: *Thinking Like a Political Scientist* Christopher Howard, 2022-12-22 A compelling case for transforming how research methods are taught to undergraduate students of political science. — London School of Economics Review of Books Each year, tens of thousands of students who are interested in politics go through a rite of passage: they take a course in research methods. Many find the subject to be boring or confusing, and with good reason. Most of the standard books on research methods fail to highlight the most important concepts and questions. Instead, they brim with dry technical definitions and focus heavily on statistical analysis, slighting other valuable methods. This approach prevents students from mastering the skills they need to engage more directly and meaningfully with a wide variety of research. With wit and practical wisdom, Christopher Howard draws on more than a decade of experience teaching research methods to transform a typically dreary subject and teach budding political scientists the critical skills they need to read published research more effectively and produce better research of their own. The first part of the book is devoted to asking three fundamental questions in political science: What happened? Why? Who cares? In the second section, Howard demonstrates how to answer these questions by choosing an appropriate research design, selecting cases, and working with numbers and written documents as evidence. Drawing on examples from American and comparative politics, international relations, and public policy, *Thinking Like a Political Scientist* highlights the most common challenges that political scientists routinely face, and each chapter concludes with exercises so that students can practice dealing with those challenges.

graff birkenstein textbook pdf: *Mindful Teaching with Technology* Troy Hicks, 2021-11-11 Technology is integral to teaching in the English language arts, whether in-person, hybrid, or remote. In this indispensable guide, Troy Hicks shows how to teach and model digital diligence—an alert, intentional stance that helps both teachers and students use technology productively, ethically, and responsibly. Resources and lesson ideas are presented to build adolescents' skills for protecting online privacy, minimizing digital distraction, breaking through “filter bubbles,” fostering civil conversations, evaluating information on the internet, creating meaningful digital writing, and deeply engaging with multimedia texts. Dozens of websites, apps, and other tools are reviewed, with links provided at the companion website; end-of-chapter teaching points and guiding questions facilitate learning and application.

graff birkenstein textbook pdf: *Web Writing* Jack Dougherty, Tennyson O'Donnell, 2015-04-21 The essays in *Web Writing* respond to contemporary debates over the proper role of the Internet in higher education, steering a middle course between polarized attitudes that often dominate the conversation. The authors argue for the wise integration of web tools into what the liberal arts does best: writing across the curriculum. All academic disciplines value clear and compelling prose, whether that prose comes in the shape of a persuasive essay, scientific report, or creative expression. The act of writing visually demonstrates how we think in original and critical ways and in ways that are deeper than those that can be taught or assessed by a computer. Furthermore, learning to write well requires engaged readers who encourage and challenge us to revise our muddled first drafts and craft more distinctive and informed points of view. Indeed, a new generation of web-based tools for authoring, annotating, editing, and publishing can dramatically enrich the writing process, but doing so requires liberal arts educators to rethink why and how we teach this skill, and to question those who blindly call for embracing or rejecting technology.
