free norton literature ebook: Books in the Digital Age John B. Thompson, 2013-10-21 The book publishing industry is going through a period of profound and turbulent change brought about in part by the digital revolution. What is the role of the book in an age preoccupied with computers and the internet? How has the book publishing industry been transformed by the economic and technological upheavals of recent years, and how is it likely to change in the future? This is the first major study of the book publishing industry in Britain and the United States for more than two decades. Thompson focuses on academic and higher education publishing and analyses the evolution

of these sectors from 1980 to the present. He shows that each sector is characterized by its own distinctive 'logic' or dynamic of change, and that by reconstructing this logic we can understand the problems, challenges and opportunities faced by publishing firms today. He also shows that the digital revolution has had, and continues to have, a profound impact on the book publishing business, although the real impact of this revolution has little to do with the ebook scenarios imagined by many commentators. Books in the Digital Age will become a standard work on the publishing industry at the beginning of the 21st century. It will be of great interest to students taking courses in the sociology of culture, media and cultural studies, and publishing. It will also be of great value to professionals in the publishing industry, educators and policy makers, and to anyone interested in books and their future.

free norton literature ebook: Digital Literary Redlining Amy E. Earhart, 2025-06-24

Though canon concerns seem to be a relic of 1990s academia, we are, once again, at a historical moment when there is resistance to teaching texts by writers of color and texts that deal with race, ethnicity and gender. At the same time, algorithmic bias scholars are locating systemic bias encoded into systems from policing software to housing software. Bringing these divergent areas together, Amy E. Earhart examines how technological and institutional infrastructures construct and deconstruct race, ethnicity and gender identities. Focusing on two central infrastructures, the database, a commonly used technological infrastructure in the digital humanities, and the anthology, a scholarly and pedagogical infrastructure, Earhart considers how such seemingly naturalized infrastructures impact the representation and modeling of identity. The book draws upon the building and use of DALA, a collection of almost 100 years of generalist American and African American literature anthologies, constructed to investigate questions of identity and representation in literary anthologies and, by extension, the larger literary canon. The resulting examination, and its rigorous discussion of how identities are created and recreated within Black literary histories, has important implications for contemporary cultural and political debates about canon formation, literary scholarship, and the bias embedded in technological infrastructures.

Brogan, 2005 This report will be useful to anyone interested in the current state of online American literature resources. Its purpose is twofold: to offer a sampling of the types of digital resources currently available or under development in support of American literature; and to identify the prevailing concerns of specialists in the field as expressed during interviews conducted between July 2004 and May 2005. Part two of the report consolidates the results of these interviews with an exploration of resources currently available. Part three examines six categories of digital work in progress: (1) quality-controlled subject gateways, (2) author studies, (3) public domain e-book collections and alternative publishing models, (4) proprietary reference resources and full-text primary source collections, (5) collections by design, and (6) teaching applications. This survey is informed by a selective review of the recent literature.--CLIR Web site.

free norton literature ebook: The Digital Black Atlantic Roopika Risam, Kelly Baker Josephs,

2021-03-16 Exploring the intersections of digital humanities and African diaspora studies How can scholars use digital tools to better understand the African diaspora across time, space, and disciplines? And how can African diaspora studies inform the practices of digital humanities? These questions are at the heart of this timely collection of essays about the relationship between digital humanities and Black Atlantic studies, offering critical insights into race, migration, media, and scholarly knowledge production. The Digital Black Atlantic spans the African diaspora's range—from Africa to North America, Europe, and the Caribbean—while its essayists span academic fields—from history and literary studies to musicology, game studies, and library and information studies. This transnational and interdisciplinary breadth is complemented by essays that focus on specific sites and digital humanities projects throughout the Black Atlantic. Covering key debates, The Digital Black Atlantic asks theoretical and practical questions about the ways that researchers and teachers of the African diaspora negotiate digital methods to explore a broad range of cultural forms including social media, open access libraries, digital music production, and video games. The volume

further highlights contributions of African diaspora studies to digital humanities, such as politics and representation, power and authorship, the ephemerality of memory, and the vestiges of colonialist ideologies. Grounded in contemporary theory and praxis, *The Digital Black Atlantic* puts the digital humanities into conversation with African diaspora studies in crucial ways that advance both.

free norton literature ebook: Ego Frank Schirrmacher, 2013-02-18 Dieses Buch erzählt davon, wie nach dem Ende des Kalten Kriegs ein neuer Kalter Krieg im Herzen unserer Gesellschaft eröffnet wird. Es ist die Geschichte einer Manipulation: Vor sechzig Jahren wurde von Militärs und Ökonomen das theoretische Model eines Menschen entwickelt. Ein egoistisches Wesen, das nur auf das Erreichen seiner Ziele, auf seinen Vorteil und das Austricksen der anderen bedacht war: ein moderner Homo oeconomicus. Nach seiner Karriere im Kalten Krieg wurde er nicht ausgemustert, sondern eroberte den Alltag des 21. Jahrhunderts. Aktienmärkte werden heute durch ihn gesteuert, Menschen ebenso. Er will in die Köpfe der Menschen eindringen, um Waren und Politik zu verkaufen. Das Modell ist zur selbsterfüllenden Prophezeiung geworden. Der Mensch ist als Träger seiner Entscheidungen abgelöst, das große Spiel des Lebens läuft ohne uns. Frank Schirrmacher zeichnet in seinem bahnbrechenden neuen Buch die Spur eines monströsen Doppelgängers nach und macht klar, dass die Konsequenzen seines Spiels das Ende der Demokratie sein könnte, wie wir sie heute kennen.

Martine Courant Rife opens up new conversations about how invention and copyright work together in the composing process for digital writers and how this relationship is central to contemporary issues in composition pedagogy and curriculum. digital writing and publishing, composition and legal scholars have identified various problems with writers' processes and the law's construction of textual ownership, such as issues of appropriation, infringement, and fair use within academic and online contexts. *Invention, Copyright, and Digital Writing* unpacks digital writers' complex perceptions of copyright, revealing how it influences what they choose to write and how it complicates their work. Rife uses quantitative and qualitative approaches and focuses on writing as a tool and a technology-mediated activity, arguing the copyright problem is about not law but invention and the attendant issues of authorship.
