As with the first edition, the book is organized around the foundations of the profession and key functional areas. Questions such as how to think like a librarian and how to facilitate community development are specifically and explicitly addressed. In compiling the book, the editors sought out the leading thinkers, educators, and practitioners in each core area as chapter authors. Each of the contributors provides an introduction to the knowledge, skills, and abilities associated with their respective area of expertise, discusses current and emerging applications, and explores trends and issues.
