grocery store interview questions: Better Safe Than Sorry Norah MacKendrick, 2018-05 How toxic are the products we consume on a daily basis? Whether it's triclosan in toothpaste, formaldehyde in baby shampoo, endocrine disruptors in water bottles, or pesticides on strawberries, chemicals in food and personal care products are of increasing concern to consumers. This book chronicles how ordinary people try to avoid exposure to toxics in grocery store aisles using the practice of "precautionary consumption." Through an innovative analysis of environmental regulation, the advocacy work of environmental health groups, the expansion of the health-food

chain Whole Foods Market, and interviews with consumers, Norah MacKendrick ponders why the problem of toxics in the U.S. retail landscape has been left to individual shoppers—and to mothers in particular. She reveals how precautionary consumption, or “green shopping,” is a costly and time-intensive practice, one that is connected to cultural ideas of femininity and good motherhood but is also most available to upper- and middle-class households. *Better Safe Than Sorry* powerfully argues that precautionary consumption places a heavy and unfair burden of labor on women and does little to advance environmental justice or mitigate risk.

grocery store interview questions: Growing Up Queer Mary Robertson, 2018-11-27 LGBTQ kids reveal what it's like to be young and queer today Growing Up Queer explores the changing ways that young people are now becoming LGBT-identified in the US. Through interviews and three years of ethnographic research at an LGBTQ youth drop-in center, Mary Robertson focuses on the voices and stories of youths themselves in order to show how young people understand their sexual and gender identities, their interest in queer media, and the role that family plays in their lives. The young people who participated in this research are among the first generation to embrace queer identities as children and adolescents. This groundbreaking and timely consideration of queer identity demonstrates how sexual and gender identities are formed through complicated, ambivalent processes as opposed to being natural characteristics that one is born with. In addition to showing how youth understand their identities, Growing Up Queer describes how young people navigate

queerness within a culture where being gay is the “new normal.” Using Sara Ahmed’s concept of queer orientation, Robertson argues that being queer is not just about one’s sexual and/or gender identity, but is understood through intersecting identities including race, class, ability, and more. By showing how society accepts some kinds of LGBTQ-identified people while rejecting others, *Growing Up Queer* provides evidence of queerness as a site of social inequality. The book moves beyond an oversimplified examination of teenage sexuality and shows, through the voices of young people themselves, the exciting yet complicated terrain of queer adolescence.
