**foundational law treasure guide:** *Nanotechnology for a Sustainable World* Thomas Faunce, 2012 Does humanity have a moral obligation to emphasise nanotechnology's role in addressing the critical public health and environmental problems of our age? This well crafted book explores this idea by analysing the prospects for a macrosience nanotechnology-for-environmental sustainability project in areas such as food, water and energy supply, medicine, healthcare, peace and security. Developing and applying an innovative science-based view of natural law underpinning a global social contract, it considers some of the key scientific and governance challenges such a global project may face. The book concludes that the moral culmination of nanotechnology is a Global Artificial Photosynthesis project. It argues that the symmetric patterns of energy creating photosynthesis, life and us are shaping not only the nanotechnological advances of artificial photosynthesis, but also the ethical and legal norms likely to best govern such scientific achievements to form a sustainable existence on this planet. Nanotechnology for a Sustainable World will appeal to many generations of scientists and policymakers working to improve our world in public health, environmental sustainability and renewable energy and nanotechnology. **foundational law treasure guide:** *How to Prevent Recession* Satya Saurabh Khosla, 2015-05-20 ...This is a very profound concept put in a very simple and beautiful format as written in the Foreword by His Holiness the Dalai Lama. In October 2007, author Satya Saurabh Khosla's article predicting the recession was published in Business Times, Singapore. Millions suffered despite its accurate warning. While analysing this later, he felt that preventing a recession will help society more. How to Prevent Recession seeks to rely on ethics in the strategy used for life and work. Values are a 'Strategy for living life'. These are applied at work to prevent recession. If profit becomes the only purpose of life, it disturbs the framework which sustains society. How to Prevent Recession uses the ancient framework of four goals of life. It applies these goals to business from a

strategy of life. This book compares profit to the speed of a car. If personal and firm's profit is only maximised brakes are forgotten. Management Ideas given by Porter state that strategy is an 'optimisation effort'. Profit, too, should result from it. A car's speed is optimised when it considers criteria like bad roads to avoid jerks for passengers, fuel efficiency and reducing speed to prevent a crash. Ancient wisdom trains the human mind. Then, the Truth about optimum strategy emerges from within, as we drive the car of life to work. Strategy is a way of achieving a goal. So, ancient Indian wisdom of four goals of life are like a car's four wheels. An 'optimisation effort' balances the pressure. The wisdom of using righteous conduct prevents recession. The book makes the important point that any business strategy should emerge from a conception of a decent life rooted in spirituality. Pradip Khandwalla, former Director, Indian Institute of Management, Ahmedabad. Excellent work. Brilliant in its integration of ancient Indian Truths with the concept of management Prof P.N. Sharma, Member, Governing Body, Library of Tibetan Works & Archives.

**foundational law treasure guide: Navajo Courts and Navajo Common Law** Raymond Darrel Austin, 2009 The Navajo Nation court system is the largest and most established tribal legal system in the world. Since the landmark 1959 U.S. Supreme Court decision in *Williams v. Lee* that affirmed tribal court authority over reservation-based claims, the Navajo Nation has been at the vanguard of a far-reaching, transformative jurisprudential movement among Indian tribes in North America and indigenous peoples around the world to retrieve and use traditional values to address contemporary legal issues. A justice on the Navajo Nation Supreme Court for sixteen years, Justice Raymond D. Austin has been deeply involved in the movement to develop tribal courts and tribal law as effective means of modern self-government. He has written foundational opinions that have established Navajo common law and, throughout his legal career, has recognized the benefit of tribal customs and traditions as tools of restorative justice. In *Navajo Courts and Navajo Common Law*, Justice Austin considers the history and implications of how the Navajo Nation courts apply foundational Navajo doctrines to modern legal issues. He explains key Navajo foundational concepts like *Hózhó* (harmony), *K'é* (peacefulness and solidarity), and *K'éí* (kinship) both within the Navajo cultural context and, using the case method of legal analysis, as they are adapted and applied by Navajo judges in virtually every important area of legal life in the tribe. In addition to detailed case studies, Justice Austin provides a broad view of tribal law, documenting the development of tribal courts as important institutions of indigenous self-governance and outlining how other indigenous peoples, both in North America and elsewhere around the world, can draw on traditional precepts to achieve self-determination and self-government, solve community problems, and control their own futures.
