Malika Abdelali-Martini, Aden Aw-Hassan, 2013-12-17 The aim of this book is to highlight the role that gender research can play in understanding natural resource management and rural development issues in the Middle East and North Africa region and how hands-on training and mentoring can be used as a capacity enhancement approach. It presents findings of four research teams, working in three countries, Algeria, Lebanon and Morocco. The approach was to build the capacity of national teams through hands-on field research, mentoring and technical support, which is different from traditional training. The chapters present the results of the case studies used as learning platforms for the teams and reflections on this approach. The case studies demonstrate the capacity and skills that the teams have acquired. These teams were multi-disciplinary and included social scientists as well as specialists in water management, livestock production and rangelands and agronomy. The book provides grounded empirical examples for MENA academics, practitioners and development students concerned about ensuring gender-balanced rural development.

gender studies pdf resources: Introduction to Gender Studies in Eastern and Southern Africa James Etim, 2016-07-28 Africa has witnessed massive changes in the last fifty years – from independence through structural adjustment, rule by military juntas in several countries and to a period now where the focus is on how best to prioritize their needs based on resources, national goals and human potential. There is general agreement that human capital is important in economic growth and development. There is always the need to ensure that resources and human capital are used appropriately to advance development. Gender disparities, whether in treatment, access to resources, resource utilization and the law, may in themselves retard or slow down development. Resources and human potential in all societies include how best to ensure there is no gender disparity and to fully tap the resources inherent in women for personal, social and national development. Beginning with the women's suffrage movement, there has been the push to encourage gender equality worldwide. The Fourth World Conference on Women in Beijing in 1995 embodies the commitment of the international community to implement policies that will enhance the political, social, economic, educational empowerment of women. This book highlights the issues affecting women in Eastern and Southern Africa – what role does custom and patriarchy play in gender disparities in education, access to health, problems in the workplace and family relationships? How have women writers in the last twenty years presented the issues of patriarchy, women's rights, globalism and women's holistic development? What are recent developments that have helped improve the situation for some women? These are some of the issues that are covered in this book. The thesis of this book is that there have been policies and strategies developed that have worked to empower women. However, vestiges of sexism, gender disparities in several fields still remain and traditions/customs and patriarchy have aided in still keeping women down.

gender studies pdf resources: Rethinking Women's and Gender Studies Catherine M. Orr, Ann Braithwaite, 2012-03-22 *Rethinking Women's and Gender Studies* re-examines the field's foundational assumptions by identifying and critically analyzing eighteen of its key terms. Each essay investigates a single term (e.g., feminism, interdisciplinarity, intersectionality) by asking how it has come to be understood and mobilized in Women's and Gender Studies and then explicates the roles it plays in both producing and shutting down possible versions of the field. The goal of the book is to trace and expose critical paradoxes, ironies, and contradictions embedded in the language of Women's and Gender Studies—from its high theory to its casual conversations—that relies on these key terms. *Rethinking Women's and Gender Studies* offers a fresh approach to structuring Feminist

Theory, Senior Capstone, and introductory graduate-level courses in Women's and Gender Studies.

gender studies pdf resources: Collection Evaluation in Academic Libraries Karen C. Kohn, 2015-06-24 Librarians have long used data to describe their collections. Traditional measures have simply been inputs and outputs: volumes acquired, processed, owned, or circulated. With the growth since the 1990s of cultures of assessment, librarians have sought statistics that are evaluative rather than simply descriptive. More recently, exponentially increasing journal prices and an economic recession have intensified the need to make careful purchasing decisions and to justify

these to administrators. A methodical evaluation of a library collection can help librarians understand and meet user needs and can help communicate to administrators that the library is a good use of the institution's money. *Collection Evaluation in Academic Libraries: A Practical Guide for Librarians* equips collections managers to select and implement a method or several methods of evaluating their library collections. It includes sections on four tools for evaluation: • Comparison to peer institutions • Core lists • Usage statistics from circulation and ILL • Citation analysis Chapters on each of these approaches present the advantages and disadvantages of each method, instructions on data collection and analysis—with screenshots—and suggested action steps after completing the analysis. With a unique combination of step-by-step instructions and discussions of the purpose and role of data, this book provides an unusually thorough guide to collection evaluation. It will be indispensable for collection development librarians and anyone looking to strengthen the culture of assessment within the library.

gender studies pdf resources: Qualitative methods for gender research in agricultural development Rubin, Deborah, 2016-05-27 The rise of mixed methods approaches to development-oriented research has brought new attention to qualitative research methods. This paper describes the use of qualitative approaches to illuminate gender relations in agricultural development research and project implementation. For gender research, qualitative methods can be particularly helpful in illuminating how men and women view their lives. Drawing on literature about social science methods and linking it to recent examples of qualitative methods employed in research and development projects, the paper argues for greater precision in key concepts of gender research, starting with sex and gender. From the many possible qualitative methods used in development work, the paper focuses on several common observational (both direct and participatory) and interview techniques, the latter including key informant and group interviews and focus group discussions. Researchers use various techniques to gather different types of information, for example, mapping techniques to understand men's and women's different types of knowledge about their environment and eliciting in-depth information on a single topic with key informants. In a brief discussion of the analysis of qualitative data, the paper notes that informant responses are not "the truth" but need to be assessed against other sources of data. Finally, there is a short discussion of how qualitative data have been used in comparative work. The paper concludes that the results of good qualitative research on gender relations can help identify the locally specific pathways needed to achieve gender-transformative development approaches.

gender studies pdf resources: Governance, Natural Resources and Post-Conflict Peacebuilding Carl Bruch, Carroll Muffett, Sandra Nichols, 2016-04-07 When the guns are silenced, those who have survived armed conflict need food, water, shelter, the means to earn a living, and the promise of safety and a return to civil order. Meeting these needs while sustaining peace requires more than simply having governmental structures in place; it requires good governance. Natural resources are essential to sustaining people and peace in post-conflict countries, but

governance failures often jeopardize such efforts. This book examines the theory, practice, and often surprising realities of post-conflict governance, natural resource management, and peacebuilding in fifty conflict-affected countries and territories. It includes thirty-nine chapters written by more than seventy researchers, diplomats, military personnel, and practitioners from governmental, intergovernmental, and nongovernmental organizations. The book highlights the mutually reinforcing relationship between natural resource management and good governance. Natural resource management is crucial to rebuilding governance and the rule of law, combating corruption, improving transparency and accountability, engaging disenfranchised populations, and building confidence after conflict. At the same time, good governance is essential for ensuring that natural resource management can meet immediate needs for post-conflict stability and development, while simultaneously laying the foundation for a sustainable peace. Drawing on analyses of the close relationship between governance and natural resource management, the book explores lessons from past conflicts and ongoing reconstruction efforts; illustrates how those lessons may be applied to the formulation and implementation of more effective governance initiatives; and presents an emerging theoretical and practical framework for policy makers, researchers, practitioners, and students. Governance, Natural Resources, and Post-Conflict Peacebuilding is part of a global initiative to identify and analyze lessons in post-conflict peacebuilding and natural resource management. The project has generated six books of case studies and analyses, with contributions from practitioners, policy makers, and researchers. Other books in this series address high-value resources, land, water, livelihoods, and assessing and restoring natural resources.

gender studies pdf resources: Vulnerability and Marginality in Human Services

Mark Henrickson, Christa Fouché, 2017-06-26 Vulnerability has traditionally been conceived as a dichotomised status, where an individual by reason of a personal characteristic is classified as vulnerable or not. However, vulnerability is not static, and most, if not all, people are vulnerable at some time in their lives. Similarly, marginality is a social construct linked to power and control. Marginalised populations are relegated to the perimeters of power by legal and political structures and limited access to resources. Neither are fixed or essential categories. This book draws on international research and scholarship related to these constructs, exploring vulnerability and marginality as they intersect with power and privilege. This exploration is undertaken through the lenses of intimacy and sexuality to consider vulnerability and marginality in the most personal of ways. This includes examining these concepts in relation to a range of professions, including social work, psychology, nursing, and allied health. A strong emphasis on the fluidity and complexity of vulnerability and marginality across cultures and at different times makes this a unique contribution to scholarship in this field. This is essential reading for students and researchers involved with social work, social policy, sociology, and gender and sexuality studies.
