god emperor of dune pdf: Dune and Philosophy Kevin S. Decker, 2022-09-28 Explore the universe of Frank Herbert's Dune in all its philosophical richness "He who controls the spice controls the universe." Frank Herbert's Dune saga is the epic story of Paul, son of Duke Leto Atreides, and heir to the massive fortune promised by the desert planet Arrakis and its vast reservoirs of a drug called "spice." To control the spice, Paul and his mother Jessica, a devotee of the pseudo-religious Bene Gesserit order, must find their place in the culture of the desert-dwelling Fremen of Arrakis. Paul must contend with both the devious rival House Harkonnen and the gargantuan desert sandworms—the source of the spice. The future of the Imperium depends upon one young man who will need to lead a new jihad to control the universe. Dune and Philosophy recruits 23 philosophers to sift wisdom from Frank Herbert's Duniverse, including the first of an expected series of films following Paul "Muad'Dib" Atreides and his descendants, captivatively brought to the big screen by Denis Villeneuve in 2021. Part of the New Wave of science fiction of the 60s and 70s, Dune is characterized by literary experimentation with shifting styles, differing narrative points of view, and with the "psychedelic" culture of the period. In Dune, the long-term strategies and intricate plots of warring Great Houses are driven not just by Heighliner spacecraft and lasguns, but also by mind-expanding drugs, psychic powers, dystopian themes, race memories, and martial arts allowing control of the mind and the body. Substantial yet accessible chapters address philosophical questions including: Is it morally right to create a savior? Would interplanetary travel change human nature? What is the deeper meaning of desert ecologies? In conflict, how can you stay light years ahead of your opponents? Are there some drugs we would want to be addicted to? Does history repeat itself? Tens of thousands of years into an intergalactic

future, can humans endure or will we sacrifice what is most important in our humanity for power, glory, religion and of course, the control of the spice? *Dune* and *Philosophy* sets an intellectual course through sand and stars to find out.

god emperor of dune pdf: *Speaking of Forms of Life* Claudio Campagna, Daniel Guevara, 2023-11-26 Humans pose an unprecedented threat to life in all its great diversity of forms. The human-induced extinction rate has been compared to “mass extinctions” of the past. But this language masks the fact that the crisis is due to voluntary, and thus, avoidable choices and actions. “*Speaking of Forms of Life*” shows that at the root of this crisis is the tragic inadequacy of the language predominantly used to represent and address what we are doing, including the language of “sustainable development,” “rights” for animals and the rest of nature, their “intrinsic value,” and conservation of species as “populations.” This talk alienates us from the other living things, from what they actually are, have and do, and it perpetuates the harm and loss. Campagna and Guevara compellingly argue, on rigorous but accessible grounds, that there is an alternative language to guide conservation, in confronting the radically urgent, ethical issues it faces. This is a language with which we are all familiar, mastered by naturalists, from Aristotle to Audubon. It articulates the primary value in life and the standard that must guide how human beings should live, as one form of life, among countless others. This book is a homecoming for those who practice conservation to, above all else, secure a creature’s ability to satisfy the necessities of its form of life. This is an essential book for anyone who cares about conservation and is concerned about the frightening pace of extinctions. The great theme of the book is the importance of the language in which we think and talk about living beings. Daniel Guevara and Claudio Campagna make available for conservationists the ground-breaking work of Philippa Foot and Michael Thompson on natural goodness and on our thought about living beings. They show how it can be brought to bear on the threats that confront conservation and on disputes that may seem irresolvable. I recommend *Speaking of Forms of Life* as strongly as I can.” Cora Diamond, William R. Kenan, Jr. Professor Emerita of Philosophy, Professor of Law, and University Professor, University of Virginia “Our current conservation language is shot through with economic platitudes that don’t explain anyone’s real motives for conserving biodiversity. Campagna and Guevara’s new book lays out a convincing alternative, grounding conservation goals in the objective goodness of life’s many ways of flourishing. *Speaking of Forms of Life* is inspiring, informative, well-grounded in the relevant philosophy and conservation literatures but never pedantic. Both activists and thinkers will find much of value in *Speaking of Forms of Life*.” Philip Cafaro, Professor of Philosophy, Colorado State University “*Speaking of Forms of Life*” helps us confront the fact that language often obscures, rather than facilitates, our understanding of living things. Our language reflects past misperceptions, current ignorance, and our shockingly limited intellectual ability to comprehend where we are in space and time, and who we are with on this strange planet with its soap-bubble coating of life. The language in use has abetted, and accelerated the catastrophic course we daily continue to choose. “*Speaking of Forms of Life*” shows us why and how this must change. It’s a crucial revelation that we must heed, because our species alone can consider changing course—and our species alone must do so. Carl Safina, MacArthur Fellow Carl Safina Research Chair for Nature and Humanity, Stony Brook University Our biosphere is a miracle. Communicating the sense of awe and wonder that it instills in many of us is essential to shift from wanton destruction of our natural world for short term economic profit to health and prosperity for all creatures - including us humans. *Speaking of Forms of Life* is the first book that unveils how the way we speak to each other affects the way we value and care for our planet. An essential read for everyone who cares about the future of nature and humanity. Enric Sala, National Geographic Explorer in Residence and Hubbard Medalist

god emperor of dune pdf: Fictional Languages in Science Fiction Literature Israel A. C. Noletto, 2024-05-31 Fictional Languages in Science Fiction Literature surveys a large number of fictional languages, those created as part of a literary world, to present a multifaceted account of the literary phenomenon of glossopoesis (language invention). Consisting of a few untranslated sentences, exotic names, or even fully-fledged languages with detailed grammar and vocabulary, fictional languages have been a common element of English-language fiction since Thomas More's *Utopia* (1516). Different notions of the functions of such fictional languages in narrative have been proposed: as rooted in phonaesthetics and contextual features, or as being used for characterisation and construction of alterity. Framed within stylistics and informed by narrative theory, literary theory, literary pragmatics, and semiotics, this study combines previous typologies into a new 5-part reading model comprising unique analytical approaches tailored to science fiction's specific discourse and style, exploring the relationship between glossopoesis, world-building, storytelling, interpretation, and rhetoric, both in prose and paratexts.
