free hawthorne series pdf: *Sustainability in America's Cities* Matt Slavin, 2013-02-22 Sustainability is more than the latest green buzzword. It represents a new way of viewing the interactions of human society and the natural world. Sustainability in America's Cities highlights how America's largest cities are acting to develop sustainable solutions to conflicts between development and environment. As sustainability rises to the top of public policy agendas in American cities, it is also emerging as a new discipline in colleges and universities. Specifically designed for these educational programs, this is the first book to provide empirically based, multi-disciplinary

case studies of sustainability policy, planning, and practice in action. It is also valuable for everyone who designs and implements sustainability initiatives, including policy makers, public sector and non-profit practitioners, and consultants. Sustainability in America's Cities brings together academic and practicing professionals to offer firsthand insight into innovative strategies that cities have adopted in renewable energy and energy efficiency, climate change, green building, clean-tech and green jobs, transportation and infrastructure, urban forestry and sustainable food production. Case studies examine sustainability initiatives in a wide range of American cities, including San Francisco, Honolulu, Philadelphia, Phoenix, Milwaukee, New York City, Portland, Oregon and Washington D.C. The concluding chapter ties together the empirical evidence and recounts lessons learned for sustainability planning and policy.

free hawthorne series pdf: In Camps Jana K. Lipman, 2020-06-02 After the US war in Vietnam, close to 800,000 Vietnamese left the country by boat, survived, and sought refuge throughout Southeast Asia and the Pacific. This is the story of what happened in the camps. In Camps raises key questions that remain all too relevant today: Who is a refugee? Who determines this status? And how does it change over time? From Guam to Malaysia and the Philippines to Hong Kong, In Camps is the first major work on Vietnamese refugee policy to pay close attention to host territories and to explore Vietnamese activism in the camps and the diaspora. This book explains how Vietnamese were transformed from de facto refugees to individual asylum seekers to repatriates. Ambitiously covering people on the ground—local governments, teachers, and corrections officers—as well as powerful players such as the UN High Commissioner for Refugees and the US government, Jana Lipman shows that the local politics of first asylum sites often drove international refugee policy. Unsettling most accounts of Southeast Asian migration to the US, In Camps instead emphasizes the contingencies inherent in refugee policy and experiences.

free hawthorne series pdf: The Interface of Competition Law, Industrial Policy and Development Concerns Balthasar Strunz, 2018-07-28 This book analyses essential concepts of competition law and industrial policy, and shows where the two areas clash with and complement each other, respectively. The discussion takes place in the context of developing countries, taking into consideration their realities and specific needs. South Africa serves as a real-world example for competition law that goes beyond the notion of consumer welfare. An in-depth analysis of the enforcement of South African law illustrates how the law is used both to combat the negative effects of past industrial policy, and to accommodate current economic and social needs. The book is intended for all readers with an interest in the enforcement of competition law in developing countries. It will particularly benefit those who want to learn about unorthodox approaches that integrate the concept of “public interest” and social imperatives into the application of competition law.

free hawthorne series pdf: Conservative Criminology John Wright, Matt DeLisi, 2015-11-06 Conservative Criminology serves as an important counterpoint to virtually every other academic text on crime. Hundreds of books have been written about crime and criminal justice policy from a variety of perspectives, including Marxist, liberal, progressive, feminist, radical, and post-modernist. To date, however, no book has been written outlining a conservative perspective on crime and criminal justice policy. Not a polemic against liberalism, Conservative Criminology nonetheless focuses on how liberal ideology affects the study of crime and criminals and the policies that criminologist advocate. Wright and DeLisi, both senior scholars, give a voice to a major political philosophy—a philosophy often demonized by academics—and to conservatives in the academic world. In the end, Conservative Criminology calls for an investment in intellectual diversity, a respect for varying political philosophies, and a renewed commitment to honesty in scholarship. The authors encourage debate in the profession about the proper role of ideology in the academy and in public policies on crime and justice. Conservative Criminology is for the criminal justice professional and student. It serves as a stimulating supplement to courses in criminology and criminal justice, as

well as a primary text for special issues or capstone courses. This book supports the reader in recognizing ideological biases, whatever they might be, and in considering their own convictions.

free hawthorne series pdf: Pancreatic Islet Isolation Miriam Ramírez-Domínguez, 2016-09-01 Pancreatic islets make up the endocrine pancreas and they contain the only source of insulin in the body, beta cells. Hence, access to high quality preparations of pancreatic islets is fundamental for in vitro studies and to test pre-clinical applications in animal models in vivo. Access to healthy human islets is also crucial to improve transplantation procedures for diabetes. Given the susceptibility of pancreatic islets to the enzymatic digestion and mechanical stress required to obtain them, the isolation of islets is often considered as the delicate "work of a craftsman". This book, which is aimed at beginners and experts alike, is a survey of the current state-of-the-art in this field and it centres on the challenges, pitfalls and peculiarities of pancreatic islet isolation in the different species used in pre-clinical and clinical applications. It explores the similarities and differences between human islets and those from other relevant species (rodents, pigs and non-human primates), and how these influence islet isolation. The ultimate goal of this book is to improve the outcome of islet isolation and transplantation in pre-clinical and clinical applications.

free hawthorne series pdf: The Translator as Writer Susan Bassnett, Peter Bush, 2007-11-15 Over the last two decades, interest in translation around the world has increased beyond any predictions. International bestseller lists now contain large numbers of translated works, and writers from Latin America, Africa, India and China have joined the lists of eminent, bestselling European writers and those from the global English-speaking world. Despite this, translators tend to be invisible, as are the processes they follow and the strategies they employ when translating. The Translator as Writer bridges the divide between those who study translation and those who produce translations, through essays written by well-known translators talking about their own work as distinctive creative literary practice. The book emphasises this creativity, arguing that translators are effectively writers, or rewriters who produce works that can be read and enjoyed by an entirely new audience. The aim of the book is to give a proper prominence to the role of translators and in so doing to move attention back to the act of translating, away from more abstract speculation about what translation might involve.
