**global historical events:** *The Great Events of Global History, Vol. 1* Various, 2016-11-08

History, if we define it as the mere transcription of the written records of former generations, can go no farther back than the time such records were first made, no farther than the art of writing. But now that we have come to recognize the great earth itself as a story-book, as a keeper of records buried one beneath the other, confused and half obliterated, yet not wholly beyond our comprehension, now the historian may fairly be allowed to speak of a far earlier day. For unmeasured and immeasurable centuries man lived on earth a creature so little removed from the beasts that die, so little superior to them, that he has left no clearer record than they of his presence here. From the dry bones of an extinct mammoth or a plesiosaur, Cuvier reconstructed the entire animal and described its habits and its home. So, too, looking on an ancient, strange, scarce human skull, dug from the deeper strata beneath our feet, anatomists tell us that the owner was a man indeed, but one little better than an ape. A few æons later this creature leaves among his bones

chipped flints that narrow to a point; and the archæologist, taking up the tale, explains that man has become tool-using, he has become intelligent beyond all the other animals of earth. Physically he is but a mite amid the beast monsters that surround him, but by value of his brain he conquers them. He has begun his career of mastery.

**global historical events: *Teaching Global History*** Alan J. Singer, 2012-04-27 *Teaching Global History* challenges prospective and beginning social studies teachers to formulate their own views about what is important to know in global history and why. It explains how to organize the curriculum around broad social studies concepts and themes and student questions about humanity, history, and the contemporary world. All chapters include lesson ideas, a sample lesson plan with activity sheets, primary source documents, and helpful charts, graphs, photographs, and maps. High school students' responses are woven in throughout. Additional material corresponding to each chapter is posted online at [http://people.hofstra.edu/alan\\_j\\_singer](http://people.hofstra.edu/alan_j_singer). The traditional curriculum tends to highlight the Western heritage, and to race through epochs and regions, leaving little time for an in-depth exploration of concepts and historical themes, for the evaluation of primary and secondary sources, and for students to draw their own historical conclusions. Offering an alternative to such pre-packaged textbook outlines and materials, this text is a powerful resource for promoting thoughtful reflection and debate about what the global history curriculum should be and how to teach it.

**global historical events: *A Companion to Global Historical Thought*** Prasenjit Duara, Viren Murthy, Andrew Sartori, 2014-01-21 *A COMPANION TO GLOBAL HISTORICAL THOUGHT* A Companion to Global Historical Thought provides an overview of the development of historical thinking from the earliest times to the present, directly addressing issues of historiography in a globalized context. Questions concerning the global dissemination of historical writing and the relationship between historiography and other ways of representing the past have become important not only in the academic study of history, but also in public arenas in many countries. With contributions from leading international scholars, the book considers the problem of "the global" - in the multiplicity of traditions of narrating the past; in the global dissemination of modern historical writing; and of "the global" as a concept animating historical imaginations. It explores the different intellectual approaches that have shaped the discipline of history, and the challenges posed by modernity and globalization, while illustrating the shifts in thinking about time and the emergence of historical thought. Complementing *A Companion to Western Historical Thought*, this book places non-Western perspectives on historiography at the center of discussion, helping scholars and students alike make sense of the discipline at the start of the twenty-first century.
