global history mcgraw download: *The World is Out of Joint* Immanuel Wallerstein, 2015-11-17
The dominant view in social science has been that the modern world shows a pattern of linear development in which all positive social trends rise (albeit at an uncertain speed) toward a relatively homogenized world. In the post-1945 period, some analysts contested this linear model, arguing that the modern world was rather one of escalating polarization. Their view was strengthened by the separate emergence within the natural sciences of complexity studies, which suggested that natural systems inevitably moved away from equilibrium, and at a certain point bifurcated radically. This book, based on a truly collaborative international research project, evaluates the empirical evidence in this debate in order to (1) give an adequate portrayal of the historical realities of the world-system, (2) draw a nuanced assessment about this debate, and (3) provide the basis on which we can not only envisage probable future trends but also draw conclusions about the policy and/or political implications of past and future research. The work of ten research clusters, based on crucial topics of overlapping nodes of social activity, provides a vantage-point with which to assess the basic issue; a clear picture emerges of world-historical interpretations of continuing polarizations.

global history mcgraw download: *Empire of the Air* Jenifer Van Vleck, 2013-11-01
Jenifer Van Vleck's *Empire of the Air* reveals the central role commercial aviation played in the U.S. ascent to global preeminence in the twentieth century, as the federal government partnered with the aviation industry to deliver American power across the globe and sell the idea of the "American Century" to the public at home and abroad.

global history mcgraw download: *Re-thinking Postcolonial Education in Sub-Saharan Africa in the 21st Century* Edward Shizha, Ngoni Makuvaza, 2017-04-17
What have postcolonial Sub-Saharan African countries achieved in their education policies and programmes? How far have they contributed to successful attainment of the targeted 2015 Millennium Development Goals (MDGs) on education? What were the constraints and barriers for developing an education system that appeals to the needs of the sub-region? *Re-thinking Postcolonial Education in Sub-Saharan Africa in the 21st Century: Post-Millennium Development Goals* is an attempt to demonstrate that Sub-Saharan Africa has the potential and capability to provide solutions to challenges facing its desire and ability to provide sustainable education to its people. To that end, the contributors are academics with an African vision attempting to come up with African home-grown perspectives to fill the gap created by the lapse of the MDGs as the guiding vision and framework for educational provision in Africa and beyond. The book seeks to articulate and address African issues from an informed as well as objective African perspective. The book is also intended to provide insights to scholars who are interested in studying and understanding the nature of postcolonial education in

the Sub-Saharan African region. Given the objectives and themes of this book, it is intended for academic scholars, undergraduate and graduate students, human rights scholars, curriculum developers, college and university academics, teachers, education policy makers, international organisations, and local and international non-governmental organisations that are interested in African education policies and programmes. "Rethinking Postcolonial Education in Sub-Saharan Africa in the 21st Century provides contemporary reflections from multiple perspectives and re-positions the issue of education at the forefront of the debates on African development." - Lamine Diallo, Associate Professor, Wilfrid Laurier University, Canada "The book is a welcome addition to discourses and analyses on education in sub-Saharan Africa with reference to a postcolonial critique and the Millennium Development Goals framework on education in Africa." - Michael Tonderai Kariwo, PhD, Instructor and Research Fellow, University of Alberta, Canada

global history mcgraw download: Ancestral Diets and Nutrition Christopher Cumo, 2020-11-19 *Ancestral Diets and Nutrition* supplies dietary advice based on the study of prehuman and human populations worldwide over the last two million years. This thorough, accessible book uses prehistory and history as a laboratory for testing the health effects of various foods. It examines all food groups by drawing evidence from skeletons and their teeth, middens, and coprolites along with written records where they exist to determine peoples' health and diet. Fully illustrated and grounded in extensive research, this book enhances knowledge about diet, nutrition, and health. It appeals to practitioners in medicine, nutrition, anthropology, biology, chemistry, economics, and history, and those seeking a clear explanation of what humans have eaten across the ages and what we should eat now. Features: Sixteen chapters examine fat, sweeteners, grains, roots and tubers, fruits, vegetables, and animal and plant sources of protein. Integrates information about diet, nutrition, and health from ancient, medieval, modern and current sources, drawing from the natural sciences, social sciences, and humanities. Provides comprehensive coverage based on the study of several hundred sources and the provision of over 2,000 footnotes. Presents practical information to help shape readers' next meal through recommendations of what to eat and what to avoid.

global history mcgraw download: Systemic Transitions W. Thompson, 2009-01-05 We are all familiar with the popular and academic analyses of the ongoing and future ascent of China. Two of the associated questions are whether and when China might succeed the United States as the lead state in the world system. These are interesting questions, albeit ones that are not likely to be answered in the immediate future. An alternative focus examines instead periods of systemic transition - eras in which it is conceivable that a new leader might emerge at the expense of an older system leader. Framing the question this way presumes that a) future systemic transitions remain a possibility and b) transitions do not occur abruptly but may require several decades to set up structural situations in which a transition might take place. Neither of these assumptions are carved in stone and are open to question. It may be that future systemic transitions are unlikely. Or, it may be that they will not occur as they have in the past. All of these possibilities are assessed from a variety of different perspectives.

global history mcgraw download: Rediscovered Classics of Japanese Animation Maria Chiara Oltolini, 2024-01-25 *Rediscovered Classics of Japanese Animation* is the first academic work to examine World Masterpiece Theater (Sekai Meisaku Gekijô, 1969-2009), which popularized the practice of adapting foreign children's books into long-running animated series and laid the groundwork for powerhouses like Studio Ghibli. World Masterpiece Theater (Sekai Meisaku Gekijô, 1969-2009) is a TV staple created by the Japanese studio Nippon Animation, which popularized the practice of adapting foreign children's books into long-running animated series. Once generally dismissed by critics, the series is now frequently investigated as a key early work of legendary animators Isao Takahata and Hayao Miyazaki. In the first book-length examination of the series,

Maria Chiara Oltolini analyzes cultural significance of World Masterpiece Theater, and the ways in which the series pioneered the importance of children's fiction for Japanese animation studios and laid the groundwork for powerhouses like Studio Ghibli. Adapting a novel for animation also means decoding (and re-coding) socio-cultural patterns embedded in a narrative. World Masterpiece Theater stands as a unique example of this linguistic, medial, and cultural hybridisation. Popular children's classics such as *Little Women*, *Peter Pan*, and *Anne of Green Gables* became the starting point of a full-fledged negotiation process in which Japanese animators retold a whole range of narratives that have one basic formula in common: archetypal stories with an educational purpose. In particular, the series played a role in shaping the pop culture image of a young girl (shôjo). Examining the series through the lens of animation studies as well as adaptation studies, Oltolini sheds new light on this long-neglected staple of Japanese animation history.

global history mcgraw download: *The History of European Integration* Ivan T. Berend, 2016-05-20 The foundation of the European Union was one of the most important historical events in the second half of the 20th century. In order to fully appreciate the modern state of the EU, it is crucial to understand the history of European integration. This accessible overview differs from other studies in its focus on the major roles played by both the United States and European multinational corporations in the development of the European Union. Chronologically written and drawing on new findings from two major archives (the archives of the US State Department and Archive of European Integration), this book sheds crucial new light on the integration process. The History of European Integration offers a major contribution to our understanding of Europe's postwar history, and will be essential reading for any student of postwar European History, Contemporary History, European Politics and European Studies.

global history mcgraw download: *The European Union and the Challenges of the New Global Context* Ileana Tache, 2015-09-04 This book investigates the new challenges confronted by the EU as an international actor within the context of recent economic and political developments, with particular attention to common foreign and security policies; the appraisal of development-aid policies; EU sanctions in the post-Soviet space, as harder instruments complementing the toolbox of the EU "soft power" polity; preferential trade agreements as a key element of EU external trade policy; external relations of the EU; international aspects of the monetary policy of the ECB in the context of the financial and sovereign debt crisis; massive capital flows and the boom-bust cycle in the emerging Europe; and the macroeconomic modelling of the relationship between the EU and the rest of the world. Thoroughly up-to-date, the contributions to this volume offer analyses of recent, tense global events, including EU responses to the uprising in Arab countries and the Ukrainian conflict. The book concludes with the proposal of a unique macroeconomic model in which the EU is conceptualised as constituting a block "against" the rest of the world, but also a two country model in itself, made up of Eurozone and non-Eurozone members.

global history mcgraw download: *The Global Achievement Gap* Tony Wagner, 2014-03-11 Despite the best efforts of educators, our nation's schools are dangerously obsolete. Instead of teaching students to be critical thinkers and problem-solvers, we are asking them to memorize facts for multiple choice tests. This problem isn't limited to low-income school districts: even our top schools aren't teaching or testing the skills that matter most in the global knowledge economy. Our teens leave school equipped to work only in the kinds of jobs that are fast disappearing from the American economy. Meanwhile, young adults in India and China are competing with our students for the most sought-after careers around the world. Education expert Tony Wagner has conducted scores of interviews with business leaders and observed hundreds of classes in some of the nation's most highly regarded public schools. He discovered a profound disconnect between what potential employers are looking for in young people today (critical thinking skills, creativity, and effective communication) and what our schools are providing (passive learning environments and uninspired lesson plans that focus on test preparation and reward memorization). He explains how every American can work to overhaul our education system, and he shows us examples of dramatically different schools that teach all students new skills. In addition, through interviews with college

graduates and people who work with them, Wagner discovers how teachers, parents, and employers can motivate the &net; generation to excellence. An education manifesto for the twenty-first century, The Global Achievement Gap is provocative and inspiring. It is essential reading for parents, educators, business leaders, policy-makers, and anyone interested in seeing our young people succeed as employees and citizens. global history mcgraw download: Real Property in Australia Michael J. Hefferan, 2020-08-17 Real property in the form of investment, ownership and use pervades almost every aspect of daily lives and represents over 40% of Australia's wealth. Such assets do not exist in isolation – they are dynamic and forever evolving, impacted by a range of physical, economic, demographic, legal and other forces. Consequently, a true appreciation of individual assets and of the property sector as a whole demands an understanding of both the assets themselves and the context and markets in which they exist. The sector is complex and, on the face of it, confusing. It is however, not without logic and underlying themes and principles. This book provides a wider understanding of how the real property sector works. It covers topics such as the nature of real property and its functions, economic drivers, valuation principles, legal and tenure parameters, property taxation, land development and subdivision, asset and property management and sustainability – all critical components in this complex and critically important sector. It provides a wide and balanced perspective for experienced practitioners, investors, students and anyone involved in property decision-making or wishing to secure a deeper understanding of these areas. The book integrates research-based theory with practical application and first-hand insights into a sector that underpins the Australian economy, its communities and its sustainability.

global history mcgraw download: Making a World of Difference National Academy of Engineering, 2014-01-01 Fifty years ago, the National Academy of Engineering (NAE) was founded by the stroke of a pen when the National Academy of Sciences Council approved the NAE's articles of organization. Making a World of Difference commemorates the NAE anniversary with a collection of essays that highlight the prodigious changes in people's lives that have been created by engineering over the past half century and consider how the future will be similarly shaped. Over the past 50 years, engineering has transformed our lives literally every day, and it will continue to do so going forward, utilizing new capabilities, creating new applications, and providing ever-expanding services to people. The essays of Making a World of Difference discuss the seamless integration of engineering into both our society and our daily lives, and present a vision of what engineering may deliver in the next half century.

global history mcgraw download: Billionaires in World Politics Peter Hägel, 2020-12-07 Billionaires in World Politics shows how the privatization of politics assumes a new dimension when billionaires wield power in world politics, which requires a re-thinking of individual agency in International Relations. Structural changes (globalization, neoliberalism, competition states, and global governance) have generated new opportunities for individuals to become extremely rich and to engage in politics across borders. The political agency of billionaires is being conceptualized in terms of capacities, goals, and power, which is contingent upon the specific political field a billionaire is trying to enter. Six case studies explore the power of billionaires in their pursuit of

security, wealth, and esteem. The chapter on security analyzes Raj Rajaratnam's relationship to the Tamil cause in Sri Lanka, and Sheldon Adelson's transnational electioneering in the Israel-Palestine conflict. Regarding the economy, the book studies how the Koch brothers' political protection of fossil fuels is affecting climate change mitigation, and how Rupert Murdoch's opinion-shaping is valorizing conservatism across borders. The chapter on social entrepreneurship and esteem examines the role of Bill Gates in the governance of global health and George Soros's attempts to build open societies as a 'stateless statesman'. An analytical conclusion evaluates the prior findings in order to address three major questions: Is it more appropriate to see billionaires as 'super-actors', or as a global 'super-class'? What is the relative power of billionaires within the international system? What does the power of billionaires mean for the liberal norms of legitimate political order?

Hewett, Tiffany Bourelle, 2020-05-18 Technical communication instructors need professional development opportunities that will aid them in creating their online courses; in developing curricula; and in teaching in what may be a new environment. Although instructors can turn to instructional design teams for assistance in using Learning Management System and its functions, they specifically need their own first-hand, immersive learning within their pedagogical training. In other words, teachers need to learn in an online context like the environment that their students will use; such direct training helps instructors to facilitate student learning in a technologically distributed classroom. Beyond learning technological skills to facilitate a course, these teachers need to learn to use the technology effectively to keep students on track and to teach them skills and material. This collection—which includes three contributions from 2007 and 10 from 2017—focuses on the types of professional development instructors need to be successful in the online technical communication classroom. Formed as a 10-year retrospective of the field and its advances in online education professional development, the book offers instructors theoretical and practical suggestions for creating and

teaching successful online courses and managing entire online technical communication programs. This book was originally published as a special issue of Technical Communication Quarterly (TCQ).

Climates and weather patterns, currents, seasons and timings are key to selecting routes, but just as important is knowing something about the countries that you will arrive in. Details of the expected formalities and regulations are followed by essential information on key landfalls, accompanied by the first-hand observations of well-known world sailors and authors Rod Heikell and Andy O'Grady. Text and plans have been updated for this third edition which is illustrated with a number of new photographs to inspire both dreamers and passagemakers. "I have recently been planning a voyage from Trinidad to New Zealand using Ocean Passages and Landfalls by Rod Heikell and Andy O'Grady. The book has been an exceptional resource. The mass of information on a wealth of subjects is excellent. The layout is beautifully put together and very accessible. The pilotage and chartlets will be invaluable. The book will certainly be travelling with me and I cannot recommend it highly enough to anybody who is planning ocean voyaging." Theresa Kewell, S/Y Mr Blue 'This is a 'blue planet' book. Its scope is awe-inspiring as it takes an overview of the globe as the yachtsman's potential cruising ground... It is of course possible to glean all the macro information from scientific geophysical sources, but the personality and experience of the authors adds an indispensable ingredient.' Yachting Monthly

global history mcgraw download: Disintegrative Tendencies in Global Political Economy Heikki Patomäki, 2017-10-23 Whether we talk about human learning and unlearning, securitization, or political economy, the forces and mechanisms generating both globalization and disintegration are causally efficacious across the world. Thus, the processes that led to the victory of the 'Leave' campaign in the June 2016 referendum on UK European Union membership are not simply confined to the United Kingdom, or even Europe. Similarly, conflict in Ukraine and the presidency of Donald Trump hold implications for a stage much wider than EU-Russia or the United States alone. Patomäki explores the world-historical mechanisms and processes that have created the conditions for the world's current predicaments and, arguably, involve potential for better futures. Operationally, he relies on the philosophy of dialectical critical realism and on the methods of contemporary social sciences, exploring how crises, learning and politics are interwoven through uneven wealth-accumulation and problematical growth-dynamics. Seeking to illuminate the causes of the currently prevailing tendencies towards disintegration, antagonism and - ultimately - war, he also shows how these developments are in fact embedded in deeper processes of human learning. The book embraces a Wellsian warning about the increasingly likely possibility of a military disaster, but its central objective is to further enlightenment and holoreflexivity within the current world-historical conjuncture. This work will be of interest to students and scholars of international relations, peace research, security studies and international political economy.

An overreliance on incarceration has emphasized long-standing and systemic racism in criminal justice systems and reveals a need to critically examine current processes in an effort to reform modern systems and provide the best practices for successfully responding to deviance. Global Perspectives on People, Process, and Practice in Criminal Justice is an essential scholarly reference that focuses on incarceration and imprisonment and reflects on the differences and alternatives to these policies in various parts of the world. Covering subjects from criminology and criminal justice to penology and prison studies, this book presents chapters that examine processes and responses to deviance in regions around the world including North America, Europe, the Middle East, and Asia. Uniquely, this book presents chapters that give a voice to those who are not always heard in debates about incarceration and justice such as those who have been incarcerated, family members of those incarcerated, and those

who work within the walls of the prison system. Investigating significant topics that include carceral trauma, prisoner rights, recidivism, and desistance, this book is critical for academicians, researchers, policymakers, advocacy groups, students, government officials, criminologists, and other practitioners interested in criminal justice, penology, human rights, courts and law, victimology, and criminology.
