global studies pdf download: PISA and Global Education Policy Jennifer Chung, 2019-07-01
PISA and Global Education Policy: Understanding Finland's Success and Influence provides an in-depth investigation for the reasons behind Finland's success in the Programme for International Student Assessment (PISA). Finland's high performances in every administration of PISA since 2000 have captured worldwide attention. This volume offers a comprehensive exploration into the context of Finland, uncovering its historical, cultural, political, and societal nuances. Furthermore, it delves into the history of Finnish education, providing a strong foundation from which to view the system that produced so much success in PISA. The book analyses empirical data from Finnish professors of education, ministers of education, head teachers, and teachers for the reasons behind Finland's consistently high outcomes in the survey. It includes viewpoints from OECD officers with direct responsibility for PISA. In addition, it uncovers the impact of Finnish influence on education policy worldwide. Thus, the text presents an analysis of the growing politicisation of international achievement studies such as PISA. The increasingly globalised educational context surrounding PISA calls for an analysis of policy transfer and the already-apparent uncritical policy borrowing of Finnish education policy within the UK context.

global studies pdf download: Global Citizenship, Common Wealth and Uncommon Citizenships, 2018-08-16 This set of essays critically analyze global citizenship by bringing together leading ideas about citizenship and the commons in this time that both needs and resists a global perspective on issues and relations. Education plays a significant role in how we come to address these issues and this volume will contribute to ensuring that equity, global citizenship, and the common wealth provide platforms from which we might engage in transformational, collective work. The authors address the global significance of debates and struggles about belonging and abjection, solidarity and rejection, identification and othering, as well as love and hate. Global citizenship, as a concept and a practice, is now being met with a dangerous call for insularism and a protracted ethno-nationalism based on global economic imperialism, movements for white supremacy and miscegenation, various forms of religious extremism, and identity politics, but which antithetically, also comes from the anti-globalization movement focused on building strong, sustainable communities. We see a taming of citizens that contributes to the taming of what we understand as the public sphere and the commons, the places of cultural, natural, and intellectual resources that are shared and not privately owned. The work of global citizenship education is distinguishable from the processes of a deadly globalization or destruction of the world that responds to the interlocking issues that make life on the planet precarious for human and non-humans everywhere (albeit an unequal precarity). This book is an invitation into a conversation that explores and makes visible some of the hidden chasms of oppression and inequity in the world. It is meant to provoke both argument and activism as we work to secure common spaces that are broadly life-sustaining. Contributors are: Ali A. Abdi, Sung Kyung Ahn, Chouaib El Bouhali, Xochilt Hernández, Carrie Karsgaard, Marlene McKay, Michael O'Sullivan, Christina Palech, Karen Pashby, Karen J. Pheasant-Neganigwane, Thashika Pillay, Ashley Rerrie, Grace J. Rwiza, Toni Samek, Lynette Shultz, Harry Smaller, Crain Soudien, Derek Tannis, and Irene Friesen Wolfstone.

global studies pdf download: Handbook of Research on Global Education and the Impact of Institutional Policies on Educational Technologies Loureiro, Maria José, Loureiro, Ana, Gerber, Hannah R., 2021-11-12 Emerging technologies in education are dramatically reshaping the way we teach, learn, and create meaning—both formally and informally. The use of emerging technologies within educational contexts requires new methodological approaches to teaching, learning, and educational research. This leads educational technology developers, researchers, and practitioners to engage in the creation of diverse digital learning tools that can be used in a wide range of learning situations and scenarios. Ultimately, the goal of today's digital learning

experiences includes situational experiences wherein learners and teachers symbiotically enroll in meaning-making processes. Discussion, critical reflection, and critique of these emerging technologies, tools, environments, processes, and practices require scholars to involve themselves in critical conversation about the challenges and promises afforded by emerging technologies and to engage in deliberate thinking about the critical aspects of these emerging technologies that are drastically reshaping education. The Handbook of Research on Global Education and the Impact of Institutional Policies on Educational Technologies deepens this discussion of emerging technologies in educational contexts and is centered at the intersection of educational technology, learning sciences, and socio-cultural theories. This book engages a critical conversation that will further the discussion about the pedagogical potential of emerging technologies in contemporary classrooms. Covering topics such as communication networks, online learning environments, and preservice teacher education, this text is an essential resource for educational professionals, preservice teachers, professors, teachers, students, and academicians.

global studies pdf download: *Das globale Dorf mit 100 Menschen / The global village of 100 people* Liz Mohn Stiftung, Bertelsmann Stiftung, 2025-04-29 Stellen wir uns unsere Welt einmal als Dorf mit 100 Menschen vor. Welche Muttersprachen sind hier vertreten? Wie viele Menschen können lesen und schreiben? Wie viele Bewohner:innen sind in der Lage, sich einen Urlaub im Ausland zu leisten? Wer ist übergewichtig – und wer leidet unter Hunger? Und wie viele im Dorf haben eigentlich eine eigene Toilette? Wir fragen, wie es um die globale Gesundheitsversorgung steht – und welche gesundheitlichen Herausforderungen es weltweit gibt. Wie sind essenzielle Ressourcen wie Wasser, Nahrung und Energie auf der Welt verteilt – und welche Konflikte ergeben sich daraus? Wie beeinflussen die globalen Klimaveränderungen die Lebensbedingungen der Menschen – und wer ist am stärksten betroffen? Anhand von 40 Kategorien

- z. B. Pressefreiheit, Krankenversicherung, Internetzugang - zeichnet dieses Buch ein Porträt unserer globalen Gemeinschaft. Es macht die Realität, die jeden Tag unübersichtlicher wird, etwas greifbarer. Und es zeigt, dass hinter jeder Statistik ein Mensch steht. Imagine the world as a village of 100 inhabitants. Which native languages would be spoken there? How many people could read and write? How many could afford a vacation abroad? Who would be overweight and who would not have enough to eat? And how many people in the village would have their own toilet? In this book, we look at the state of health care around the globe - and which health challenges exist. We ask how basic resources, such as water, food and energy, are distributed across the planet and which conflicts occur as a result. We also ask how climate change is affecting living conditions - and who is being impacted the most. Based on 40 categories - such as freedom of the press, health insurance, Internet access - we sketch a portrait of our global community. It's a portrait that makes our present reality, which is becoming more confusing every day, a bit more tangible. And it shows that behind every statistic there's a human being.

global studies pdf download: *Peacebuilding Legacy* Sukanya Podder, 2022-08-08 A fundamental challenge plagues the global peacebuilding community. How can technocratic approaches to peacebuilding that are rooted in short-term, project-based execution of activities, further the longer-term transformative outcomes like altering young people's attitudes and beliefs about peace and violence? In response to this global challenge, in *Peacebuilding Legacy*, Sukanya Podder analyzes the long-term effects of peacebuilding programmes involving children and young people. Podder unpacks the concept of peacebuilding legacy through the lens of time, transformation, and intergenerational peace. Podder also develops unique qualitative cues for measuring legacy in terms of the institutional, normative, and organizational logics. If norms resonate strongly with the local context, they are likely to encourage strong retention and meaningful adoption over time. Successful institutionalization of project models through planned handover to successor national organizations, or government departments, holds the key to stronger local ownership. Organizational learning and reflection can support this process through a more strategic approach to programming, and through post-exit studies. Regarding attitude change, Podder found that, the media and peace education projects that targeted individuals' ingrained beliefs and values but overlooked the role of group social norms had only limited persuasive effects. To shift the values, practices, norms, and beliefs of the younger generation, the mindset of the older

generation must also be targeted. Changes in the legal, political, economic, and other social institutions are critical for long-term and meaningful transformation. This requires adopting an ecological model of peace.
