fourth wing ebook: *EBOOK: Managing Strategy* David Watson, 2000-03-16 Higher education institutions are under increasing pressure to produce corporate and strategic plans, both for external audiences (such as funding bodies and other 'partners') and for the internal purposes of setting and achieving goals. They are significantly dependent upon public investment and the expectations of public bodies as well as upon a fast-changing market for their products and services. David Watson sets out what strategic management can and should consist of in a modern, essentially democratic, university or college, and how to make it work. He examines for instance: * how universities and colleges should go about satisfying legitimate external and internal requirements for their corporate plans. * how they should maximize their strategic assets and opportunities and minimize their weaknesses and threats. * the role of governance and management in setting and achieving a strategic plan. This book demonstrates how the academy has to adapt to meet the needs of its rapidly changing host society as well as of a more diverse and plural internal community, whilst maintaining a range of historical commitments. The result is an account of strategic

management that is simultaneously careful of traditional values, restorative of those that have fallen into abeyance, and genuinely innovative.

fourth wing ebook: EBOOK: Media and their Publics Michael Higgins, 2008-09-16 This accessible and thought-provoking book provides a critical insight into the relationship between the media and the public. It examines the way in which the public is represented, referred to and portrayed in the media, and how the media acts or speaks on the public's behalf. The first part explores the political side of the relationship between the media and the public. This includes interesting discussion of advocacy in political interviews and the discursive arrangement of political discussion programmes. The second part of the book examines a range of discourses outside of the political realm. Michael Higgins looks at the construction of ordinariness, authenticity and public legitimacy, the relationship between institutional and media expertise, and the exercise of public decency. He argues that what unites the relationships between media and forms of public are their concern with wider issues of politics, governance, and cultural influence. The author offers a range of illustrative examples of broadcasting from US, Australian and British contexts, providing students with a range of engaging international examples with which to draw comparisons and compare their own media experiences. Each chapter includes recommended texts for further reading and questions for discussion. The Media and Their Publics is an essential text for students and researchers in media studies, cultural policy and political communications.
