Now in its third edition, Healthcare Management has been updated and revised to meet the needs of teachers and students alike." Professor Chris Ham, Chief Executive, The King's Fund, UK This book covers the main areas of knowledge which managers need, and gives tools for thinking and empirical examples relevant to current challenges. Evidence based management might not always be possible, but this book gives a way for a manager to become research-informed and therefore more effective. This third edition of the book is even more relevant internationally and improved to help readers apply the ideas to their situation." Professor John Øvretveit, Director of Research, LIME/MMC, The Karolinska Institute, Sweden "No-one learns to be a manager in a classroom or from a book, but books that take this disclaimer as their starting point are indispensable. Walshe and Smith (and their fellow authors) invite their audience (healthcare managers, healthcare policy makers and postgraduate students, taking courses in healthcare management) to critically combine experiential learning with academic learning and to acquire knowledge from both practice and theory. By doing so, they have found the third way between the advocates of evidence-based management and their critics."
