historic american homes download: Historic House Museums in the United States and the United Kingdom Linda Young, 2016-12-13 Historic House Museums in the United States and

the United Kingdom: A History addresses the phenomenon of historic houses as a distinct species of museum. Everyone understands the special nature of an art museum, a national museum, or a science museum, but “house museum” nearly always requires clarification. In the United States the term is almost synonymous with historic preservation; in the United Kingdom, it is simply unfamiliar, the very idea being conflated with stately homes and the National Trust. By analyzing the motivation of the founders, and subsequent keepers, of house museums, Linda Young identifies a typology that casts light on what house museums were intended to represent and their significance (or lack thereof) today. This book examines:

- heroes’ houses: once inhabited by great persons (e.g., Shakespeare’s birthplace, Washington’s Mount Vernon);
- artwork houses: national identity as specially visible in house design, style, and technique (e.g., Frank Lloyd Wright houses, Modernist houses);
- collectors’ houses: a microcosm of collecting in situ domesticu, subsequently presented to the nation as the exemplars of taste (e.g., Sir John Soane’s Museum, Isabella Stewart Gardner Museum);
- English country houses: the palaces of the aristocracy, maintained thanks to primogeniture but threatened with redundancy and rescued as museums to be touted as the peak of English national culture;
- English country houses: the palaces of the aristocracy, maintained for centuries thanks to primogeniture but threatened by redundancy and strangely rescued as museums, now touted as the peak of English national culture;
- Everyman/woman’s social history houses: the modern, demotic response to elite houses, presented as social history but tinged with generic ancestor veneration (e.g., tenement house museums in Glasgow and New York).

historic american homes download: *New Solutions for House Museums* Donna Ann Harris, 2020-11-17 This substantially enlarged and expanded second edition of *New Solutions for House Museums: Ensuring the Long-Term Preservation of America’s Historic Houses* provides advice for historic site stewards that have concerns about the financial sustainability of their historic house museum and its relevance to its local audience. Seven new case studies have been added for the second edition. The new case studies reinforce the book’s central argument that not every historic house museum, whether founded 100 years ago or last month, can be sustained long-term. Three of the new case studies are from diverse historic sites, showcasing how African American, women, and other minority-focused historic sites are pioneering new ways to commemorate their histories and interpret fascinating stories to visitors, with the end goal of creating financially sustainable historic sites that are relevant to their audience. New interviews have been conducted

with the ten existing case studies from the first edition to bring them up to date. The new edition adds two new reuse options to the eight introduced in the first edition. This chapter describes how to identify and implement a reuse decision, costs and advisors needed, and tips on decision making. There is a new chapter-long interview with Tom Mayes, Chief Legal Officer and General Counsel for the National Trust for Historic Preservation, on recent legal and ethical issues facing historic sites. Another new chapter provides advice on the essential role of the historic site's Board of Directors as the decision maker for any reuse exploration. The second edition of *New Solutions for House Museums* contains a new introduction to the second edition, an updated conclusion, bibliography, and index.

historic american homes download: *Green Restorations* Aaron Lubeck, 2010-01-01 Some 40 percent of North Americans live in homes built prior to 1940, and when it comes time to remodel or restore our older homes, homeowners and contractors can find themselves lost in a morass of wildly divergent information and opinion. With *Green Restorations* , author Aaron Lubeck brings his expertise as a restoration contractor and preservation consultant to this first-of-its-kind guide, leading the reader through the steps for restoring historic building using sustainable practices and green building techniques. In a readily accessible room-by-room and system-by-system format, *Green Restorations* covers rehabilitation and remodelling questions applicable to old homes, focusing on the core techniques and debates often seen in practice. Here you'll find the answers to restoration questions, such as: Is sealing my old crawl space a good idea? Should I replace or rehabilitate my windows? Are there historic aspects of my home I need to preserve and what can I change? What are the cultural, environmental and financial implications of my proposed changes? Do residential historic tax credits apply to my home and how can I access them? Written in such a way as to be accessible for homeowners but technical enough for contractors, this book will appeal to anyone trying to green an older home while preserving its historic and cultural significance.

historic american homes download: *The Routledge Handbook of Architecture, Urban Space and Politics, Volume I* Nikolina Bobic, Farzaneh Haghighi, 2022-10-28 For architecture and urban space to have relevance in the 21st Century, we cannot merely reignite the approaches of thought and design that were operative in the last century. This is despite, or because of, the nexus between politics and space often being theorized as a representation or by-product of politics. As a symbol or an effect, the spatial dimension is depoliticized. Consequently, architecture and the urban are halted from fostering any systematic change as they are secondary to the event and therefore incapable of performing any political role. This handbook explores how architecture and urban space can unsettle the unquestioned construct of the spatial politics of governing. Considering both ongoing and unprecedented global problems – from violence and urban warfare, the refugee crisis, borderization, detention camps, terrorist attacks to capitalist urbanization, inequity, social unrest and climate change – this handbook provides a comprehensive and multidisciplinary research focused on the complex nexus of politics, architecture and urban space. Volume I starts by pointing out the need to explore the politics of spatialization to make sense of the operational nature of spatial oppression in contemporary times. The operative and active political reading of space is disseminated through five thematics: Violence and War Machines; Security and Borders; Race, Identity and Ideology; Spectacle and the Screen; and Mapping Landscapes and Big Data. This first volume of the handbook frames cutting-edge contemporary debates and presents studies of actual theories and projects that address spatial politics. This Handbook will be of interest to anyone seeking to meaningfully disrupt the reduction of space to an oppressive or neutral backdrop of political realities. Chapters 1 and 23 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution (CC-BY) 4.0 license.

historic american homes download: *The Routledge Companion to Twentieth and Early Twenty-First Century Urban Design* Jon Lang, 2020-11-09 The Routledge Companion to Twentieth and Early Twenty-First Century Urban Design is a fully illustrated descriptive and explanatory history of the development of urban design ideas and paradigms of the past 150 years. The ideas and projects, hypothetical and built, range in scale from the city to the urban block level. The focus is on where the generic ideas originated, the projects that were designed following their precepts, the functions they address and/or afford, and what we can learn from them. The morphology of a city—its built environment—evolves unselfconsciously as private and governmental investors self-consciously erect buildings and infrastructure in a pragmatic, piecemeal manner to meet their own ends. Philosophers, novelists, architects, and social scientists have produced myriad ideas about the nature of the built environment that they consider to be superior to those forms resulting from a laissez-faire attitude to urban development. Rationalist theorists dream of ideal futures based on assumptions about what is good; empiricists draw inspirations from what they perceive to be working well in existing situations. Both groups have presented their advocacies in manifestoes and often in the form of generic solutions or illustrative designs. This book traces the history of these ideas and will become a standard reference for scholars and students interested in the history of urban spaces, including architects, planners, urban historians, urban geographers, and urban morphologists.

historic american homes download: Designing a Place Called Home James Wentling, 2016-12-28 This insightful volume shares design ideas to help builders, planners and architects create mass-produced affordable housing that pushes suburban development in more sustainable, liveable directions. The author argues that improving the quality of design in our new homes and communities for greater resiliency, sustainability, and equality, we can build neighborhoods and communities where residents feel more connected to their homes and to one another. Through text, photographs and illustrations, the book reviews prototypical American housing design, then suggests ways to both learn from the past as well as adapt for new environmental imperatives, demographic changes and lifestyle needs. Written by a practicing architect with 25+ years of experience optimizing residential design, this pioneering approach to suburban building will inspire readers to view mass produced housing through a new, modern lens.

historic american homes download: *Making Progress in Housing* Sean McNelis, 2014-01-21 This book presents a new approach to housing research, one that is relevant to all the social sciences. Housing research is diverse and operates across many disciplines, approaches and methods making collaboration difficult. This book outlines a methodological framework that enables researchers from many different fields to collaborate in solving complex and seemingly intractable housing problems. It shows how we can make progress in housing research and deliver better housing outcomes through an integrated approach. Drawing on the work of renowned Canadian methodologist, philosopher, theologian and economist, Bernard Lonergan (1904-1984), McNelis outlines a framework for collaborative research: Functional Collaboration. This new form of collaboration divides up the work of housing research into functional specialties. These distinguish eight inter-related questions that arise in the process of moving from the current housing situation through to providing practical advice to decision-makers. To answer each question a different method is required. Making progress in housing is the result of finding new answers to this complete set of eight inter-related questions. This approach to collaboration opens up a new discourse on method in housing and social research as well as new debates on progress and the nature of science.
