independence discussion materials ebook: Freedom of Expression and Social Movements in the Digital Era Elsabet Samuel Tadesse, 2025-11-01 The book discusses the 2015 Oromo protest as a social movement that brought about new practices and new actors to the exercise of freedom of expression and information through its use of the Internet as an alternative communication platform and a site of political resistance. It is based on empirical data to analyze how collective movements, identity politics, and the Internet interacted and resulted in government change in contexts where draconian regimes operate and access to the Internet is minimal and expensive. The book scrutinizes the genesis and trajectories of the Oromo protest to provide insights into the diffusion of protest tactics learned from other domestic and global movements. It also introduces peculiar mass mobilization and communication tactics the Oromo protest utilized to establish a shared vision between the urban-digital activists and the rural-offline protesters.

independence discussion materials ebook: Press Freedom and Regulation in a Digital Era Irini Katsirea, 2024-04-22 The processes of convergence and digitalization have altered the technological conditions in which the press operates. More than that, they have altered the environment in which the press stakes its claim to freedom and strives to protect its turf from other media players. The advent of internet-based services and applications has blurred the technological boundaries between the press, broadcasting, and telecommunications, challenging their regulatory silos. *Press Freedom and Regulation in a Digital Era: A Comparative Study* assesses the extent to which the emergent regulatory model for online news media is shaped by analogies from the past, or rather by a newly prevalent culture of control. By interweaving two distinct strands of analysis - the concepts of press freedom and regulation, and the phenomena of convergence and digitalization - this book examines the key implications of digitalization and assesses the challenges for press freedom in the nascent digital news ecosystem. Drawing upon decisions of the European Court of Human Rights (ECtHR), the Court of Justice of the European Union (CJEU), as well as from cases in Germany, the United Kingdom and the United States, this comparative work comprehensively explores the regulation of the press in the digital era and the impact of the proliferating media laws, policies, and jurisprudence on press freedom. Irini Katsirea identifies the regulatory ruptures that persist and makes concrete and timely recommendations for the evolving online news ecosystem.

The internet, however, because of its transnational configuration, continues to evade comprehensive state control and offers ever new opportunities for disseminating and consuming dissenting opinions. Drawing on a wide range of disciplines, including media law, human rights, political science, media and cultural studies, and the study of religion, this book examines the current state of the freedom of speech, freedom of expression, and media freedom in Russia, focusing on digital media and cross-media initiatives that bridge traditional and new media spheres. It assesses how the conditions for free speech are influenced by the dynamic development of Russian media, including the expansion of digital technologies, explores the interaction and transfer of practices, formats, stylistics and aesthetics between independent and state-owned media, and discusses how far traditional media co-opt strategies developed by and associated with independent media to mask their lack of free expression. independence discussion materials ebook: Media Independence James Bennett, Niki Strange, 2014-11-20 Media independence is central to the organization, make-up, working practices and output of media systems across the globe. Often stemming from western notions of individual and political freedoms, independence has informed the development of media across a range of platforms: from the freedom of the press as the fourth estate and the rise of Hollywood's Independent studios and Independent television in Britain, through to the importance of Indy labels in music and gaming and the increasing importance of independence of voice in citizen journalism. Media independence for many, therefore, has come to mean working with freedom: from state control or interference, from monopoly, from market forces, as well as freedom to report, comment, create and document without fear of persecution. However, far from a stable concept that informs

all media systems, the notion of media independence has long been contested, forming a crucial tension point in the regulation, shape, size and role of the media around the globe. Contributors including David Hesmondhalgh, Gholam Khiabany, José van Dijck, Hector Postigo, Anthony Fung, Stuart Allan and Geoff King demonstrate how the notion of independence has remained paramount, but contested, in ideals of what the media is for, how it should be regulated, what it should produce and what working within it should be like. They address questions of economics, labor relations, production cultures, ideologies and social functions.

independence discussion materials ebook: Youth Digital Health and Online Platforms

Martyna Gliniecka, 2024-12-27 Youth Digital Health and Online Platforms focuses on young people's use of the digital platform Reddit for health. Drawing upon dialogism theory, the book explores how young people produce a youth-led discourse of youth digital health, different from the adult-led framing represented in youth digital health research, policy, and service delivery. Peer-led discussions online remain one of the controversial forms of youth digital health, associated with negative peer influence or casual 'teenage talk'. This book argues that online peer-led dialogues support young people's agency in health and that young people can benefit from dealing with health issues with peers. The work is based on the digital ethnography of teenagers' subreddits on Reddit and utilises a theoretical framework of dialogism, a linguistic-based theory originated by an early 20th-century Russian philosopher, Mikhail Bakhtin. The book introduces the concept of dialogical youth-led youth digital health discourse formed in the peer-led space of Reddit. This youth-led discourse celebrates equality and diversity amongst people, meanings, and opinions. It is constructed around three relational elements: socio-material affordances, creative practices, and a plurality of youth voices. Reddit's pseudonymous, anti-authoritarian, and egalitarian nature supports the emergence of this youth-led discourse. The book can interest scholars and lecturers in childhood and youth studies, Internet studies, and youth health studies. Professionals such as policymakers, service designers/deliverers, online safety educators, and global youth and health agencies can use evidence-based insights in their work with young people.
