haralambos sociology ebook: EBOOK: Studying Education: An Introduction to the Key Disciplines in Education Studies Barry Dufour, Will Curtis, 2011-10-16 This book is a comprehensive, student-friendly text, introducing you to the main education disciplines in one handy volume. In a lively and accessible manner, it examines the academic disciplines that underpin our

understanding of education and the contexts within which learning takes place. The book covers the seven main subject disciplines that contribute to education as a broad field of study - history of education, politics of education, philosophy of education, economics of education, sociology of education, psychology of education and comparative education. Key features include: Seven extended chapters all written by specialist and experienced academics in their field A brief overview and history at the beginning of each chapter, followed by a selection of key themes and topics within the discipline Boxed summaries of key theorists and researchers throughout each chapter Tasks for the reader, along with extensive referencing and suggestions for further reading and research Studying Education is essential reading for students on Education Studies or PGCE courses, as well as all of those interested in or involved with education or schooling. Contributors: Rebecca Allen, Clyde Chitty, Will Curtis, Barry Dufour, Diahann Gallard, Angie S. Garden, Debbie Le Play, Richard Waller This book provides an authoritative, 'state of the art' introduction to the key disciplines of education studies. It provides useful study activities and concise introductory notes on key texts, key figures, key centres and key journals in each discipline. A valuable and highly readable addition to the education studies literature. Clive Harber, Professor of International Education, University of Birmingham, UK This book aims to explore the disciplines that are the "foundation" education disciplines: History, Politics, Philosophy, Economics, Sociology, Psychology and Comparative Education. The editors claim that their key aim is to "provide a general overview of each subject [...] enabling the readers to explore each discipline in greater depth" (page1). This book offers an overview of the disciplines that have been dominant in education. The disciplines the editors have chosen to include in this book thus illustrate a range of diverse approaches to the study of education. The book is written in an accessible style for undergraduate students embarking on inquiry into the nature of education studies and the disciplines that may be important. Interestingly the chapters in this book will also help students to refine their understanding of historical, political, socio-economical and psychological aspects that are interrelated in the study of education. Although the authors of individual chapters develop a discussion of their discipline in each chapter, they successfully and consistently apply their disciplinarity thus offering students opportunities to discuss the identity of education studies and debate the relevance of disciplines in the development of educational thought. Chapter One offers a rigorous and critical approach to key historical developments in education, attempting a useful heuristic consideration to all levels of education and covering a number of factors such as women and education, ethnicity, race and religion in order that students are inducted into the wider socio-political developments of education. The second chapter offers a different, but relevant, dimension to the first chapter by examining the role of politics in education, debating issues around power, conflict and change and for the development of educational thinking such a chapter debating policy-making and politics is vitally important. The third chapter on philosophy of education is central to the study of the foundation disciplines of education as philosophical approaches influence and underpin education studies in terms of history, policy, research and practice. The next chapter debates the economics of education and is particularly welcomed especially in an era that there is a decline in the study of this topic. The next two chapters examine sociological and psychological aspects of education studies. Finally the last chapter raises an interesting debate of the academic disciplinarity of comparative education, drawing upon the challenges of organisational support, funding and policy making. Overall throughout the book the students are encouraged to avoid fragmentation and to develop an educational thinking beyond disciplinary perspectives without losing the relativity of education to these disciplines and their contribution to the development of the 21st educational thinking. haralambos sociology ebook: Revitalizing Nigerian Education in Digital Age Soji Oni, 2012-10-11 Revitalizing Nigerian Education in Digital Age: What most of the papers in this book have in common is the concern for the revitalization of Nigerian education in the digital age through ICT and other modern methods of making education functional and effective in the new modernity. While some of the chapters deal with conceptual issues, others consider the various role of education in this digital age and how Nigeria can be relevant. Most of the chapters present well-researched, detailed, and informative papers on how to reposition Nigerian education in the digital age. Specifically, the role of education in bringing Nigerias new world about are discussed in simple language and then taken up in different forms all through the book. Since Nigeria has to act fast and decisively to be on the same development and education wavelength as the other members of todays global family, serious actions are being suggested in this book. Revitalizing Nigerian Education in Digital Age simply means taking the above desiderata seriously. Nigeria has a daunting task here in view of the heavy education burden. This is the message that this book puts across.

haralambos sociology ebook: Love, Joy, and Sex Stan Chu Ilo, 2019-07-30 There is no papal document that has generated as much interest, controversy, and debate in recent times as Pope Francis's *Amoris Laetitia*. This document, which came out of two very divisive synods of Catholic bishops and leaders in Rome in 2014 and 2015, will probably be the most discussed document ever produced by a pope in modern Catholicism on marriage and family life. This volume has gathered seminal commentaries on *Amoris Laetitia* by African Catholic theologians, social scientists, and pastoral workers. They offer African theological and pastoral responses to the principles and practices proposed by Pope Francis and the Synod on the family on such contested issues as same-sex relations, divorce and remarriage, and reception and denial of Holy Communion in the church, among other divisive issues. These important essays and commentaries show the strengths and weaknesses of this papal commentary and point out the missing link in the global conversation on marriage, family, and same-sex relations. Their argument for the inclusion of African perspectives and moral traditions in the search for a third way in finding an inclusive and integrated pastoral art

of accompaniment is very compelling. The authors here also call for the inclusion of Africa's own unique challenges--like polygamy, childless marriages, and the impact of migration, civil conflict, diseases, ecological and population crises, and the rights of African women--in the global discussion on marriage and family life. They also challenge uncritical clichés in world Christianity that Africa's opposition to same-sex marriages (or Western propaganda about population or birth control and contraception) are conservative, while showing diverse African conversations on these topics in the search for abundant life on this beautiful continent.

haralambos sociology ebook: *The Routledge Companion to Digital Journalism Studies* Scott A. Eldridge II, David Cheruiyot, Sandra Banjac, Joëlle Swart, 2024-12-16 This second edition of *The Routledge Companion to Digital Journalism Studies* offers a truly global and groundbreaking collection of essays addressing the key issues and debates shaping the field of digital journalism studies today. Journalism has arguably faced unprecedented disruption and reconceptualization since the first edition of this Companion was published. Questions over what role journalism and journalists play in society are pervasive, and changes to platforms, products, practices, and audiences are among the forces driving a new research agenda in the field. This newly reorganized second edition addresses developments in technologies, data infrastructures, algorithms, and the businesses behind these technologies, as well as the impact of such developments on the practice of digital journalism. Debates concerning the decline of public trust in journalism, and the blurred distinctions between journalism and other forms of media and communication are also considered. The chapters outline the need for digital competence and literacy within journalism and introduce new methodological approaches, including experimental and arts-based methods, computational methods, and collaborative work. Comprising 54 original essays from distinguished academics across the globe, this book showcases the rich diversity of work that continues to define the field of digital journalism studies and is an essential point of reference for students and researchers alike.
