haralambos social theories book: Crime and Society Donna Youngs, 2019-07-09 Much of a society's resources are devoted to dealing with, or preparing for the possibility of, crime. The dominance of concerns about crime also hint at the broader implications that offending has for many different facets of society. They suggest that rather than being an outlawed subset of social activity, crime is an integrated aspect of societal processes. This book reviews some of the direct and indirect social impacts of criminality, proposing that this is worthwhile, not just in terms of understanding crime, but also because of how it elucidates more general social considerations. A range of studies that examine the interactions between crime and society are brought together, drawing on a wide range of countries and cultures including India, Israel, Nigeria, Turkey, and the USA, as well as the UK and Ireland. They include contributions from many different social science disciplines, which, taken together, demonstrate that the implicit and direct impact of crime is very widespread indeed. The chapters in this book were originally published as a special issue of Contemporary Social Science.

haralambos social theories book: The Myth of Social Action Colin Campbell, 1998-07-09 The Myth of Social Action, first published in 1996, is a powerful critique of the sociology of the time and a call to reject the prevailing orthodoxy. Arguing that sociological theory had lost its way, Colin Campbell mounts a case for a new 'dynamic interpretivism' a perspective on human conduct which is more inkeeping with the spirit of traditional Weberian action theory. Discussing and dismissing one by one the main arguments of those who reject individualistic action theory, he demonstrates that this has been wrongly rejected in favour of the interactional, social situationalist approach now dominating sociological thought.

haralambos social theories book: Norbert Elias Richard Kilminster, 2007-11-13 Few sociologists of the first rank have scandalised the academic world to the extent that Elias did. Developed out of the German sociology of knowledge in the 1920s, Elias's sociology contains a sweeping radicalism which declares an academic 'war on all your houses'. His sociology of the 'human condition' sweeps aside the contemporary focus on 'modernity' and rejects most of the paradigms of sociology as one-sided, economistic, teleological, individualistic and/or rationalistic. As sociologists, Elias also asks us to distance ourselves from mainstream psychology, history and above all, philosophy, which is summarily abandoned, although carried forward on a higher level. This enlightening book written by a close friend and pupil of Elias, is the first book to explain the refractory, uncomfortable, side of Elias's sociological radicalism and to brace us for its implications. It is also the first in-depth analysis of Elias's last work *The Symbol Theory* in the light of selected contemporary developments in archaeology, anthropology and evolutionary theory.

haralambos social theories book: Theories of Social Change Dr. Henna Tabassum, 2022-01-22 The primary stimulant to social change is exposure to the situation. As individuals grow and understand the situation that requires change, they grow more willing to accept that the situation requires change. For instance, in the mid 20th century, access to television and an increased media focus on the civil rights movement, as well as an increased access to the writings and speeches of civil rights leaders, shifted the public perspective towards a positive impression of the civil rights movement. This shift in perception helped stimulate change. Technology increases public exposure to the needs of others. Television and the Internet provide an around-the-clock perspective on social needs and provide material to individuals interested in learning about the social needs of others. As an example, increased media attention of women's issues in the Middle East has increased the general public awareness of those issues. Anyone can read and study these issues and add to the social pressures working to make positive changes in Middle Eastern women's rights by adding her voice to the movement. Technology removed the foreign veil that hid these atrocities for generations. Education provides an awareness of the historic nature of social change, a map of historical successes for social change and establishes a context for understanding those issues. The book is expected to be useful for the students of sociology and others who are interested in the studies of social change. Contents: • Introduction • Modern Theories • Structural Functionalism and Unilineal Descent • Feminist Theory • Identity Politics • World-systems Theory • Organizational Socialization • Durkheim's Problem and Differentiation Theory Today • Neofunctionalism • Social Class and Class Structure • Social Alienation • Marx and Class Conflict •

haralambos social theories book: Key Sociological Thinkers R. Stones, 1998-10 A clear and manageable overview of major sociological developments for the lay reader Despite the fact that most of us think often about society and social life, few of us have had extensive schooling in how to organize or structure such thought. Guided by the belief that the sociological imagination is impoverished if accessible only to a handful of specialists, Key Sociological Thinkers provides the lay reader with a clear and manageable overview of the major sociological developments from Marx to the present day. Twenty-one concise, thorough chapters introduce the key thinkers in the field; their driving impulses, issues central to their work, substantive examples of the theory in action, their legacy, as well as reading lists meant to stimulate further research. The book's range includes not only canonical figures, such as Marx, Weber, and Durkheim, but feminist, post-structuralist, and post-colonialist thinkers of recent decades, including Nancy Chodorow, Michel Foucault, and Stuart Hall. Other sociologists and social theorists covered include Sigmund Freud, Georg Simmel, Herbert Blumer, Talcott Parsons, Robert Merton, Simone de Beauvoir, Norbert Elias, Erving Goffman, David Lockwood, Harold Garfinkel, Louis Althusser, Jurgen Habermas, Pierre Bourdieu, Arlie Hochschild, and Anthony Giddens.
