haralambos sociology pdf: An Introduction to Sociology and the Real World David Spurling,

2015-12-12 David believes that a sociology book should enable the reader to understand social problems. David uses his background, including research on the single homeless, to look at sociological perspectives and research methods. The book looks at the variety of perspectives, including Marxism, Functionalism, Feminism, and Neo-Liberalism. Davids political experience is relevant here. His transport background, as both a worker and a lecturer, is reflected in the chapters on urbanism. A sociology book that claims to be comprehensive but ignores global warming would be nonsensical as it is the most important problem for current and future generations; therefore, this book discusses this issue and what to do about it. Davids chapter on crime looks at the importance of crime to the victims, using statistics, so that it presents a different perspective to many other books. The chapter on race reflects the ways in which perceptions of immigration have little relationship to the actual data which is available and also the way in which the media has a great influence on public opinion. David uses his examiner experience, as well as teaching experience, to examine the different aspects of the educational system. The chapter on religion reflects the wide variety of views on this subject. As a Quaker, Davids views on religion have a Quaker perspective and this is reflected in his book. The hatred towards people of other religions or no religion is also examined in both contemporary society and the past. The influence of education and attitudes towards it are examined. David has put in the chapter on questions and answers since many students have a problem in knowing where to start when answering exam style questions. This book would be ideal for first year university students, including the London International Degree, as well as for A Level students looking for different material. Learning Through Cooperation Ltd. hopes that this book will provide support to anyone sitting their exams. haralambos sociology pdf: *Theory and Method* Mel Churton, Anne Brown, 2017-09-16

Knowledge of theory is essential to study, but it often seems quite abstract and distant from the 'real world'. Research methods, on the other hand, are strategies that allow us to gather evidence from the people around us to help explain social phenomena. This book explores these two key areas and shows new sociologists how they can understand, appreciate and use both theory and method. Written with student needs firmly in mind, this new edition begins by exploring the most important theories and debates that are essential to understanding sociology. It then goes on to examine the concepts, techniques and trends in research methods, and explains how these link back to theory. Whilst continuing to cover traditional ideas, debates and methodologies, the book has also been updated to address recent thinking and research techniques. It explains how sociologists have responded to contemporary developments in sociology, including postmodernists' views on science, and introduces contemporary research techniques, such as cyberethnography. Exploring the basics of quantitative and qualitative methods, and explaining how to choose the right method, the book

combines practical and theoretical coverage throughout. Part of the Skills-Based Sociology series, Theory and Method continues to encourage an active approach to learning. Each chapter uses a variety of tasks, activities and practice questions that promote critical thinking and develop interpretation, analysis and evaluation skills. It is an invaluable guide for those learning about theory and research for the first time.

haralambos sociology pdf: *Narrating and Teaching the Nation* Denise Bentrovato, 2016-02-15 The book investigates the politics of education in pre- and post-genocide Rwanda, examining the actors, interests, and discourses that have historically influenced educational policy and practice and in particular the production and revision of history curricula and textbooks. This study combines a systematic historical and comparative analysis of curricula and textbooks in Rwanda, stakeholder interviews, classroom observations, and a large-scale investigation of pupils' understandings of the country's history. Written at a crucial time of transition in Rwanda, it illuminates the role of education as a powerful means of socialisation through which dominant discourses and related belief systems have been transmitted to the younger generations, thus moulding the nation. It outlines emergent challenges and possibilities, urging a move away from the use of history teaching to disseminate a conveniently selective official history towards practices that promote critical thinking and reflect the heterogeneity characteristic of Rwanda's post-genocide society.

The work is organised into four major sections: economy, labour and environment; social inequalities and institutions, traditionalism, culture and art; and sexuality and health. Some examples of the subjects dealt with are: gender aspects of labour migration in Namibia; the complexities of class formation; social exclusion and poverty amongst Namibia's youth; cultural identities in contemporary musical traditions; Namibian society in fiction and the Namibian novel; sexuality as culture, sexual cultures in tradition, and sexuality and reproductive health; and the possibilities of the co-existence and collaboration between western and traditional medical systems. The book is jointly edited by leading sociologists at the University of Namibia.

haralambos sociology pdf: Introducing the Social Sciences for Midwifery Practice

Patricia Lindsay, Ian Peate, 2015-07-16 Introducing the Social Sciences for Midwifery Practice makes clear the links between social, anthropological and psychological concepts, midwifery practice and women's experience of birth. Demonstrating how empathising with women and understanding the context in which they live can affect childbirth outcomes and experiences, this evidence-based text emphasises the importance of compassionate and humane care in midwifery practice. Exploring midwifery as an art, as well as a science, the authors collected here make the case for midwives as professionals working 'with women' rather than as birth technicians, taking a purely competency-based approach to practice. The book incorporates a range of pedagogical features to enhance student learning, including overall chapter aims and learning outcomes, 'recommendations for practice', 'learning triggers' to encourage the reader to delve deeper and reflect on practice, 'application to practice' case studies which ensure that the theory is related to contemporary practice, and a glossary of terms. The chapters cover perspectives on birth from sociology; psychology; anthropology; law; social policy and politics. Other chapters address important issues such as disability, politics and sexuality. Outlining relevant theory from the social sciences and clearly applying it to practice, this text is an essential read for all student midwives, registered midwives and doulas.
