In order to reconcile these often clashing requirements, the US has often turned to its scientists and laboratories to find strategies and weapons that are both decisive and humane. In effect, a modern faith in science and technology to overcome life's problems has been utilized to create a distinctly 'American Way of Warfare'. Carvin and Williams provide a framework to understand the successes and failures of the US in the wars it has fought since the days of the early Republic through to the War on Terror. It is the first book of its kind to combine a study of technology, law and liberalism in American warfare.

ho tactics pdf: *Guerrilla Marketing* Alexander L. Fattal, 2018-12-10 Brand warfare is real. *Guerrilla Marketing* details the Colombian government's efforts to transform Marxist guerrilla fighters in the FARC into consumer citizens. Alexander L. Fattal shows how the market has become one of the principal grounds on which counterinsurgency warfare is waged and postconflict futures are imagined in Colombia. This layered case study illuminates a larger phenomenon: the convergence of marketing and militarism in the twenty-first century. Taking a global view of information warfare, *Guerrilla Marketing* combines archival research and extensive fieldwork not just with the Colombian Ministry of Defense and former rebel communities, but also with political exiles in Sweden and peace negotiators in Havana. Throughout, Fattal deftly intertwines insights into the modern surveillance state, peace and conflict studies, and humanitarian interventions, on one hand, with critical engagements with marketing, consumer culture, and late capitalism on the other. The result is a powerful analysis of the intersection of conflict and consumerism in a world where governance is increasingly structured by brand ideology and wars sold as humanitarian interventions. Full of rich, unforgettable ethnographic stories, *Guerrilla Marketing* is a stunning and troubling analysis of the mediation of global conflict.
