hubbard woods school attack: Murder of Innocence Joel Kaplan, George Papajohn, Eric Zorn, 2017-03-08 Early on a May morning in 1988, Laurie Dann, a thirty-year-old, profoundly unhappy product of the wealthy North Shore suburb of Chicago, loaded her father's car with a cache of handguns, incendiary chemicals, and arsenic-laced food. Driven by fear and hate, she was going to make something terrible happen. Before the end of the day, Dann had blazed a murderous trail of poison, fire, and bullets through the unsuspecting town of Winnetka, Illinois, and other North Shore suburbs. She murdered an eight-year-old boy and critically wounded 5 other children inside an elementary school. It finally took a massed force of armed police to end the killing. The shocking story of innocence destroyed by a rich young babysitter inexplicably gone mad made headlines all across the nation and inspired at least two psychotic killers to follow her example. What led her to do it? Could she have been stopped? The case raised a host of agonizing questions that have remained unanswered—until now. In this book, three Chicago Tribune reporters who covered the Laurie Dann tragedy have pulled together all the available police evidence, unearthed valuable psychiatric information, and interviewed at length scores of people who knew Dann, many of whom had never before spoken to the media about this case. Despite clear and ominous warning signs, a young woman of beauty and privilege was allowed to deteriorate and go slowly berserk—and no one stopped her. Her parents, her doctors, and the police officers who knew her pathological behavior all failed her at critical times. By its passivity and silence, a community comfortable and quiet on the surface, yet reluctant to admit its underlying flaws, became an unwitting accomplice to the final rampage of Laurie Dann. *MURDER OF INNOCENCE* is a searing portrayal of a family—and a society—unable to cope, and of a young woman who wanted all too desperately only to be loved.

hubbard woods school attack: Too Beautiful a Day to Die Joyce Egginton, 1992 Laurie Dann's increasingly psychotic behavior went ignored for years—until May 20, 1988, when she embarked on a brutal rampage that destroyed the tranquility in Winnetka, Illinois, forever. Page-turning suspense, fully drawn characters, and a culminating sense of the tragic significance of it all. . . .-- Kirkus. Photographs. Day of Fury.

hubbard woods school attack: School Shooters Peter Langman, 2015-01-15 School shootings scare everyone, even those not immediately affected. They make national and international news. They make parents afraid to send their children off to school. But they also lead to generalizations about those who perpetrate them. Most assumptions about the perpetrators are wrong and many of the warning signs are missed until it's too late. Here, Peter Langman takes a look at 48 national and international cases of school shootings in order to dispel the myths, explore the motives, and expose the realities of preventing school shootings from happening in the future, including identifying at risk individuals and helping them to seek help before it's too late.

Finley, 2011-09-13 This book provides a thorough compilation of the types, specific incidents, relevant agencies, theories, responses, and prevention programs relevant to crime and violence in schools and on campuses. *Encyclopedia of School Crime and Violence* is the most comprehensive reference on this deeply unsettling topic ever undertaken. hubbard woods school attack: Winnetka ArLynn Leiber Presser, 2009-06-29 In 1854, as the Chicago and Milwaukee Railroad Company made plans to lay track through the Green Bay Trail north of Chicago, builder Charles Peck subdivided the surrounding woods. His wife Sarah declared that they must name this land Winnetka, meaning beautiful land in Native American. There is no proof that the word means beautiful land in any language but all who visit Winnetka agree it is an apt description. Bordered by Lake Michigan and the lagoons and woods of the Cook County forest preserve, Winnetka is a town of well-tended lawns with vibrant spring tulips and daffodils giving way to summer leafy hostas. Its homes are found in historical registers, its shopping districts are charming and quaint, and its beaches and parks invite one to play hooky for an afternoon. Winnetka's residents are good neighbors, reaching out to one another in times of fun and times of tragedy, devoted to excellence in education and in their professional lives.

hubbard woods school attack: *The Psychology and Law of Workplace Violence* Irvin H. Perline, Jona Goldschmidt, 2004 *The Psychology and Law of Workplace Violence* examines the causes, risk factors, prevention and legal issues associated with workplace violence. Previous attempts to explain these crimes are often only descriptive and do not identify the basic underlying psychological mechanisms and yet, from the largest violent acts, such as the September 11th Attack on America, to the smallest violent workplace crime, the psychological mechanisms are the same. This landmark text offers a different perspective to the current concepts of workplace violence and will likely change the way people conceptualize violent crime. Part One of the text identifies eight underlying factors responsible for these crimes, identifies two necessary conditions for their occurrence, and develops several significant, new concepts related to the field. Part Two discusses state and federal legal issues surrounding workplace violence. Workers' compensation, employer liability and employer duties under negligence law, hiring, supervision and firing, the legal aspects surrounding premises security, employee privacy issues, the ADA, the Fair Credit Reporting Act, and criminal history inquiries are but a few of the many legal topics discussed. This section is written in a practical, easy-to-understand manner and contains materials that are often available only in law libraries. The final Part Three of the text is a compendium of workplace violence case histories and includes numerous nationally recognizable incidents along with many others that have not been widely publicized. An interesting description of details surrounding each crime and its aftermath is included. What happened to the perpetrator? What happened to the victims? In addition, for many cases, how the case relates to other cases and issues that have arisen from the case are discussed. In this section, which is the largest published compilation of case history material on workplace violence to date, covers over

hubbard woods school attack: Flash Point Michael D. Kelleher, 1997-07-16 The crime of mass murder is surrounded by myth, false assumptions, and misinformation. It is frequently sensationalized in the press, while the complex motivations of the perpetrator are ignored or soon forgotten. The mass murderer is rarely a crazed killer who lashes out against his victims in a mindless frenzy of violence. This book examines not only the crime of mass murder, but also the complex motivations of the mass murderer, presenting a completely new method of categorizing and analyzing the crime and its perpetrator. The evolving nature of the crime is examined in the context of actual case histories of mass murder in America. Kelleher's insights will be of interest to

criminologists and anyone interested in the sociology of crime.

hubbard woods school attack: *Children in Danger* James Garbarino, 1992 Childhood is ideally a time of safety, marked by freedom from the economic, sexual, and political demands that later become part of adult life. For many children, however, particularly those who live in our inner cities, childhood is increasingly a time of danger. The urban war zones of Los Angeles, Chicago, and Washington. D.C., are not unlike the war zones of Beirut, Belfast, and Mozambique. In both worlds, children grow up with firsthand knowledge of terror and violence. This book examines the threat to childhood development posed by living amid chronic community violence. It shows caregiving adults such as teachers, psychologists, social workers, and counselors how they can work together to help children while they are still children--before they become angry, aggressive adults. Drawing on their extensive fieldwork in war zones around the world, the authors explore the link between a child's response to growing up in an atmosphere of violence and danger, and the social context established for that child by community and caregivers. They reveal the need for establishing predictable, structured, safe environments for children and they show how school-based programs, by providing children with the continuity and regularity that is otherwise lacking in their lives, can enhance children's natural resilience and help ameliorate some of the long-term developmental consequences of living in danger. In addition to providing firsthand accounts of how children growing up in an atmosphere of violence address their situations, the authors also examine the special concerns that relate to the training and support of teachers who deal not only with the violence in the lives of the children they teach, but also with their own personal safety and emotional response to their students' traumas.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc.
