homework helpers math: Topic Modeling Yanghui Rao, Qing Li, 2025-08-22 As a well-known text mining tool, topic modeling can effectively discover the latent semantic structure of text data. Extracting topics from documents is also one of the fundamental challenges in natural language

processing. Although topic models have seen significant achievements over the past three decades, there remains a scarcity of methods that effectively model temporal aspect. Moreover, many contemporary topic models continue to grapple with the issue of noise contamination, particularly in social media data. This book presents several approaches designed to address these two limitations. Initially, traditional lifelong topic models aim to accumulate knowledge learned from experience for future task. However, the sequence of topics extracted by these methods may shift over time, leading to semantic misalignment between the topic representations across document streams. Such misalignment can degrade the performances of various downstream tasks, including online document classification and dynamic information retrieval at the topic level. Additionally, the challenge of coherent topic modeling is particularly relevant due to the noise and large scale of social media datasets. Messages on social media platforms often consists of only a few words, resulting in a lack of significant context. Models applied directly to this type of text frequently encounter the problem of feature sparsity, which can yield unsatisfactory outcomes. In the context of emotion detection, public emotions are known to fluctuate across different topics, and topics can evoke public emotion. Thus, there is a strong interconnection between topic discovery and emotion detection. Jointly modeling topics and emotions is a suitable strategy for these tasks. This book also examines the impact of topics on emotion detection and other related areas.

homework helpers math: Teens and Libraries Virginia A. Walter, Elaine Meyers, 2003-07-21
Getting it right means understanding our roles as adults and professionals. Getting it right requires a genuine commitment to youth participation. Getting it right is about shifting our perspective from the library to the community in which it is located. Getting it right makes it imperative that we give teens a place of their own in our libraries.—From the Preface Libraries have opportunities to make a positive difference in the lives of teenage customers and become a primary support for teens in the communities they serve. Truly excellent library services for young adults (YA) need the collaborative efforts of both teens and librarians. To build this partnership, the authors share an inspiring narrative of YA history, and also offer a plethora of new voices and stories that advocate the power of technology and teen spaces. These story lines are then melded to highlight practical tools to involve teens at the library and make a bright future possible. As the authors explore what has been done well—and what hasn't—in the world of young adult librarianship, they identify key issues from

the plethora of new voices: How librarians can work with not for young adult customers Why the power of place means actual square footage designed for teens Ways to incorporate technology to achieve developmental outcomes Listening to teen voices to better serve their needs How evaluation and being accountable will close the loop on effective advocacy The authors guide both librarians and administrators to make promises for the future and present a strategy for keeping those promises so that young adult audiences can become active library and community participants. From building partnerships to implementing successful programs to incorporating technology that helps teens assume leadership and responsibility, this is an inspiring yet practical take on what it means to get it right for teens in the library.

DeLoach, Michele Fenton, 2024-12-15 Winner of the BCALA 2025 Literary Award for Outstanding Contribution to Publishing As Dr. Josey and Ms. DeLoach wrote in their Introduction to the second edition of *The Handbook of Black Librarianship*: "In designing the second edition of *The Handbook of Black Librarianship*, the editors felt that this work should be a reference tool related to the various aspects of African Americans in librarianship and their work in libraries." That first edition covered issues faced by black library professionals in the various fields of librarianship; organizations formed; black library collections and books; resources and other areas of progress. The second edition, published twenty-three years later, highlighted more current events in Black librarianship: early and contemporary library organizations, vital issues, African American resources, discussions on and about librarianship, a focus on health librarianship, and information resources and education. It has now been another twenty-two years since the last edition and time to reflect on "various aspects of African Americans" in our profession as well as the advancements over the past two and a half decades and to review those issues African Americans still face and how modern technological advancements have impacted our profession and the lives of Black librarians. This third edition's coverage includes: *Pioneers and Landmark Episodes*; *A Chronology of Events in Black Librarianship*; *African American Forerunners in Librarianship*; *Modern Day Black Library Organizations*; *Vital Issues in Black Librarianship*; *Library Service to Our Communities*; *Library Technology and Black Librarianship*; *Pearls from Our Retirees*; *Issues in Diversity, Inclusion and Multiculturalism*; *African Library Resources and Education*; *Banned Books*; and *Significant Books and Periodicals for Black Collections*

homework helpers math: Accompaniment with Im/migrant Communities Kristin Elizabeth Yarris, Whitney L. Duncan, 2024-07-09 This collection brings together the experiences and voices of anthropologists whose engaged work with im/migrant communities pushes the boundaries of ethnography toward a feminist, care-based, decolonial mode of ethnographic engagement called "accompaniment." Accompaniment as anthropological research and praxis troubles the boundaries of researcher-participant, scholar-activist, and academic-community to explicitly address issues of power, inequality, and the broader social purpose of the work. More than two dozen contributors show how accompaniment is not merely a mode of knowledge production but an ethical commitment that calls researchers to action in solidarity with those whose lives we seek to understand. The volume stands as a collective conversation about possibilities for caring and decolonial forms of ethnographic engagement with im/migrant communities. This volume is ideal for scholars, students, immigrant activists, instructors, and those interested in social justice work. homework helpers math: Peer-Assisted Learning in Academic Libraries Erin Rinto, John Watts, Rosan Mitola, 2017-07-05 Written specifically for academic librarians and library administrators, this book identifies the myriad benefits of peer-assisted learning, exploring how the

implementation of peer-assisted learning benefits information literacy instruction, cocurricular outreach, and reference services. In this era of accountability—and stretched budgets—in higher education, librarians need to make instructional programming both highly effective and sustainable. Peer-assisted learning is a methodology that has long been accepted in teaching but is relatively new as applied to academic library instruction, outreach, and reference. This book brings together the most innovative applications of peer-assisted learning in these contexts, explaining specific ways to apply peer-assisted learning in a variety of academic library settings for maximum benefit. This guidebook begins with an extensive literature review of the theoretical underpinnings of peer-assisted learning and the various benefits these programs can provide academic librarians and peer mentors. The bulk of the book's content is organized into three sections that address the subjects of information literacy instruction, cocurricular outreach, and reference services separately. Each section showcases real-world examples of peer-assisted learning at a variety of academic institutions. Through these case studies, readers can fully understand the development, implementation, and assessment of a peer-assisted learning program, and librarians and administrators will see the practical benefits of enriching the experiences of student employees. Practitioners will receive inspiration and guidance through chapters that discuss training activities, identify lessons learned, and explain the implications for further research.
