infowars rapper interview: The Illuminati in Hollywood Mark Dice, 2016-02-25 The infamous Illuminati secret society represents the pinnacle of power in politics, banking, and the news media; but what about the entertainment industry? Do Hollywood's elite studios, producers, and celebrities have a secret agenda? Are they part of a covert conspiracy? Media analyst Mark Dice will show you exactly how Hollywood uses celebrities and entertainment as a powerful propaganda tool to shape our culture, attitudes, behaviors, and to promote corrupt government policies and programs. You will see how the CIA and the Pentagon work hand in hand with Hollywood to produce blockbuster movies and popular television shows crafted to paint positive portraits of war, Orwellian government surveillance, unconstitutional agendas, and more. You'll also learn the strange and secret spiritual beliefs of the stars that fuel their egos and appetites for fame and wealth, making them perfect puppets for the corporate controllers behind the scenes. And you will also discover the

rare instances of anti-Illuminati celebrities who have dared to bite the hand that feeds them. Character Howard Beale once warned in the 1976 classic film Network, "This tube is the most awesome God-damned force in the whole godless world, and woe is us if it ever falls in to the hands of the wrong people," and unfortunately that is exactly what has happened.

infowars rapper interview: The International Alt-Right Patrik Hermansson, David Lawrence, Joe Mulhall, Simon Murdoch, 2020-01-31 The alt-right has been the most important new far-right grouping to appear in decades. Written by researchers from the anti-racist advocacy group HOPE not hate, this book provides a thorough, ground-breaking, and accessible overview of this dangerous new phenomenon. It explains where the alt-right came from, its history so far, what it believes, how it organises and operates, and its future trajectory. The alt-right is a genuinely transnational movement and this book is unique in offering a truly international perspective, outlining the influence of European ideas and movements as well as the alt-right's development in, and attitude towards, countries as diverse as Japan, India, and Russia. It examines the ideological tributaries that coagulated to form the alt-right, such as white supremacy, the neo-reactionary blogosphere, the European New Right, the anti-feminist manosphere, the libertarian movement, and digital hate culture exemplified by offensive memes and trolling. The authors explore the alt-right's views on gender, sexuality and masculinity, antisemitism and the Holocaust, race and IQ, globalisation and culture as well as its use of violence. The alt-right is a thoroughly modern far-right movement that uses cutting edge technology and this book reveals how they use cryptocurrencies, encryption, hacking, meme warfare, social media, and the dark web. This will be essential reading for scholars and activists alike with an interest in race relations, fascism, extremism, and social movements.

infowars rapper interview: O BRAVE 'NEW NORMAL' WORLD: Living with Coronavirus Steve Gleadhill, 2024-04-23 The pandemic unleashed a strange half-world - not the comfortably familiar one we all knew and loved, but one in which we had to tread carefully and remain vigilant. Subsequently, it became a game of risk management that created tensions between the political desire to return to some form of normality and the need to protect lives. Inevitably, this conflict of interests led to confusion, confrontation and, sadly, deaths. Despite some catastrophic misjudgements at the governmental level, we ourselves must also shoulder some of the blame. Social media added fuel to the fire for those who chose to challenge the official guidance as an infringement on their personal freedoms and rights and preferred to interpret events as evidence of institutional conspiracies. Amid this mayhem, our planet was suffering. It was estimated that one million of our eight million species on Earth are threatened with extinction - some within decades. A report by WWF and the Zoological Society of London revealed that animal populations globally had plunged by 68% in more than twenty thousand populations of mammals, birds, amphibians, reptiles and fish in the last fifty years.
