iacobucci pdf download: Smart Development in Smart Communities Gilberto Antonelli, Giuseppe Cappiello, 2016-09-13 The concept of smart cities has become one of the most significant new lines of thinking to emerge in the social sciences in recent years, both from the research and policy angles. To date, the focus in smart specialization has been on what regions as a whole can do to bring about innovation, but it hasn't necessarily addressed the role cities play within the field. This book aims to address that gap, drawing together a team of leading contributors, to illustrate this process with particular focus on cities. Smart Development in Smart Communities discusses the cross-fertilization between smart specialization and cities in fostering smart development and its interactions with the macro-, micro- and meso-economic framework, from both a theoretical and applied perspective. Specific topics covered by the book include: human capital formation and utilization; centralized/decentralized industrial policies; innovation policies; collective learning; and the role of public utilities in sustaining smart development processes. This book tackles some of the most important questions that must be faced when investigating how structural change and innovation processes are shaping local and global economic development. It will be of interest to academics and researchers in the area of Development Economics, Urban Studies and Public Management.

iacobucci pdf download: Disability Politics in a Global Economy Ravi Malhotra, 2016-07-15 While the visibility of disability studies has increased in recent years, few have thoroughly examined the marginalization of people with disabilities through the lens of political economy. This was the great contribution of Marta Russell (1951-2013), an activist and prominent scholar in the United States and best known for her analyses of the issues faced by people with disabilities. This book examines the legacy of Marta Russell, bringing together distinguished scholars and activists such as Anne Finger, Nirmala Erevelles and Mark Weber, to explicate current issues relevant to the empowerment of people with disabilities. Drawing from various fields including Law, Political

Economy, Education and History, the book takes a truly interdisciplinary approach, offering a body of work that develops a dextrous understanding of the marginalization of people with disabilities. The book will be of great use and interest to specialists and students in the fields of Political Economy, Law and Society, Labour Studies, Disability Studies, Women's Studies, and Political Science.

iacobucci pdf download: Physician Assistants in Deutschland Henrik Herrmann, Daria Hunfeld, Monique Bialojan, Thomas Fleischmann, 2025-03-26 Das deutsche Gesundheitswesen steht unter immensem Wandlungsdruck. Der Fachkräftemangel zwingt zu tiefgreifenden Veränderungen und macht eine Fortführung des Status quo unmöglich. Um die Leistungsfähigkeit des Gesundheitssystems aufrecht zu erhalten, werden die Gesundheitsfachberufe eine erhebliche Aufwertung erfahren. Dabei stellt das Berufsbild Physician Assistance (PA) ein zentrales Element dar, das sowohl zur Entlastung des ärztlichen Personals als auch zur Verbesserung der Versorgungsqualität beitragen kann. Physician Assistants (PA) sind in Deutschland eine vergleichsweise neue akademische Berufsgruppe, im Gegensatz zum europäischen und außereuropäischen Ausland, wo sie bereits fest etabliert und unverzichtbar sind. In Kliniken, Praxen, Medizinischen Versorgungszentren (MVZ) und anderen Gesundheitsorganisationen agieren sie als integraler Bestandteil des ärztlichen Teams und übernehmen delegierbare ärztliche Aufgaben in großem Umfang. Das Interesse am Bachelor- und Masterstudium Physician Assistance in Deutschland ist groß und stark wachsend – sowohl seitens potenzieller Studierender als auch des Arbeitsmarktes. Dieses Fachbuch beschreibt umfassend das zukunftssträchtige Berufsbild Physician Assistance und richtet sich sowohl an Entscheidungsträger, Ausbilder und politische Akteure als auch an Interessierte. Es beleuchtet sämtliche Voraussetzungen, Rahmenbedingungen sowie Konzepte für Ausbildung und Praxis dieses neuen Berufsfeldes innerhalb der Versorgungsstrukturen. Damit hat das Buch den Anspruch, sich als Standardwerk für das noch junge Berufsfeld und das zugehörige Studium zu etablieren.

iacobucci pdf download: Regional Innovation Strategies 3 (RIS3) Roberta Capello, Henning Kroll, 2018-12-07 With regions and nations having formally fulfilled the ex ante conditionality, this book provides a first overall review of RIS3 policy processes, aiming to assess the consistency of the concept of smart specialization from an applied, policy-oriented perspective. Moving from the theory of design to the practice of implementation, the reflections and case studies in this volume reveal strengths and weaknesses in the way concrete strategies have been conceived and implemented, enabling reflections on the future of the concept in a more general sense. In many cases, smart specialization strategies turn out to be new variants of regional development policies, embracing the importance of a place-based approach. However, the approach's potential to add distinctive value will stem from its capacity to turn innovation and knowledge into tools for local development by harnessing them for wider territorial development goals. By helping regions to identify and leverage untapped resources through new processes, smart specialization-based policies may help to reconcile cohesion and competitiveness objective. Consequently, new approaches appear most promising where institutional, administrative and political conditions allow the setup of genuinely new processes and where their focus is on territorial assets in a comprehensive manner rather than mere industrial renewal. This book was originally published as a special issue of European Planning Studies.

iacobucci pdf download: Digitaler Mathematikunterricht in Forschung und Praxis Frederik Dilling, Daniel Thurm, Ingo Witzke, 2023-05-03 Die digitale Transformation im Bildungsbereich bietet vielfältige Potenziale für das Lehren und Lernen im Unterricht und stellt alle beteiligten Akteure dabei auch vor große Hürden. Für den Mathematikunterricht ergeben sich viele fachspezifische Chancen und Herausforderungen, die auf der Vernetzungstagung 2023 zum Thema

„Mathematikunterricht mit digitalen Medien und Werkzeugen in Schule und Forschung“ in Siegen diskutiert wurden. Hierzu kamen Mathematikdidaktiker*innen, Lehrer*innen, Schüler*innen, Akteure der Schulpolitik sowie Eltern zusammen und haben sich über konkrete Ideen und spannende übergeordnete Fragestellungen ausgetauscht. Der vorliegende Tagungsband stellt wesentliche Ergebnisse der Vorträge, Workshops, Postervorstellungen und Diskussionsrunden vor. Die Vielfalt der Beiträge zeigt, dass das Thema Digitalisierung im Mathematikunterricht ein sehr aktives Forschungsfeld in Deutschland ist. Die verschiedenen Beiträge reichen von konkreten Unterrichtsideen über theoretische Beiträge bis hin zu empirischen Forschungsarbeiten. Ebenso lässt sich eine große Anzahl von unterschiedlichen Medienarten identifizieren, die in den Beiträgen betrachtet werden (z.B. 3D-Drucker, Lernvideos, Audio-Podcasts, Apps). In seiner Gesamtheit bildet der Tagungsband somit eine hervorragende Basis für die weitere Entwicklung des Themas.

iacobucci pdf download: Kundenkompetenzen als Determinanten der Kundenbindung

Markus Müller-Martini, 2009-12-13 Markus Müller-Martini erarbeitet ein zusammenhängendes System von 14 Einflussfaktoren der Kundenbindung und führt mittels des „Competence-based View“ als Referenztheorie die Kompetenzen von Kunden als neue Determinante in die Kundenbindungsforschung ein. Die empirische Überprüfung seines Modells im Privatkundenmarkt für Fernsehempfang (Kabelanschluss vs. Satellitenempfang vs. Antennenfernsehen) legt nahe, dass der Einfluss der Kundenzufriedenheit auf die Kundenbindung oftmals über- und die Bedeutung anderer Faktoren, z.B. das soziale Umfeld sowie die Kompetenzen der Kunden, unterschätzt bzw. nicht beachtet werden.

iacobucci pdf download: Democratizing Legal Services Laura Snyder, 2016-10-11 We live in a “law-thick” world. For individuals and organizations in both the public and private sectors, navigating the large number of complex laws, rules, institutions, and procedures that pervade American life is virtually impossible without some assistance. Some argue that there are too many lawyers. Others argue that the unmet need for legal services is so high that it constitutes a human rights crisis. This book exposes why it is easy to access legal services for some, while it is virtually impossible for others, and why some lawyers have successful careers, but others cannot. This book argues that the problems plaguing legal services in the US can be only be addressed by a radical overhaul of the rules that govern how legal services may be delivered, as well as radical changes to who exercises the power to make those rules. Through interviews with those with experience with alternative legal service providers, this book exposes the formidable obstacles that exist along the path to those changes, as well as the opportunities that await. iacobucci pdf download: Law in a Changing World Jutta Brunnee, Brenda Cossman, Andrew Green, Benjamin Alarie, 2025-05-31 Law in a Changing World explores how climate change is reshaping the law, drawing on contributions from legal scholars across diverse fields. The book examines how climate change impacts areas such as governance, justice, housing, and disability law. Rather than focusing on climate law alone, the chapters explore how climate change is challenging foundational legal concepts and demanding adaptations across various sectors. The authors consider the roles of international, Indigenous, and domestic legal systems in addressing climate-related issues. Topics include climate justice for vulnerable populations, the role of government in crisis management, and the intersection of law with emerging challenges like housing and disability rights. Law in a Changing World provides a comprehensive, cross-disciplinary examination of how legal frameworks can respond to climate-related emergencies and injustices, offering fresh perspectives on the role of law in a warming world. It is an essential read for those interested in the intersection of law, policy, and climate change.

iacobucci pdf download: *Desert Collapses* Stephen Kershnar, 2021-08-18 People consider desert part of our moral world. It structures how we think about important areas such as love, punishment, and work. This book argues that no one deserves anything. If this is correct, then claims that people deserve general and specific things are false. At the heart of desert is the notion of moral credit or discredit. People deserve good things (credit) when they are good people or do desirable things. These desirable things might be right, good, or virtuous acts. People deserve bad things (discredit) when they are bad people or do undesirable things. On some theories, people deserve credit in general terms. For instance, they deserve a good life. On other theories, people deserve credit in specific terms. For instance, they deserve specific incomes, jobs, punishments, relationships, or reputations. The author's argument against desert rests on three claims: There is no adequate theory of what desert is. Even if there were an adequate theory of what desert is, nothing grounds (justifies) desert. Even if there were an adequate theory of what desert is and something were to ground it, there is no plausible account of what people deserve. *Desert Collapses* will be of interest to researchers and advanced students working in ethics and political philosophy.

iacobucci pdf download: *MedRevolution* Boris Bogdan, 2018-07-17 In naher Zukunft regiert der Roboter im OP, erscheint der Patient im Double als Hologramm, kommen Ersatzorgane aus dem Drucker, überwachen Gesundheits-Apps Gesunde wie Kranke, werden Nanokapseln als Medizin durch den Körper geschleust - was sich wie Fiction anhört, steht unmittelbar vor der Realisierung. Vieles davon ist bereits möglich, wartet auf den flächendeckenden Einsatz. Die Digitalisierung im Verbund mit einer Reihe weiterer neuer Technologien wird innerhalb weniger Jahre Medizin, Medizintechnik und Gesundheitswesen revolutionieren. Die Gesundheitsversorgung wie wir sie heute kennen, wird sich dadurch grundlegend neu erfinden: Der Fokus wird von der Behandlung von Symptomen auf die Prävention und Erhaltung der Gesundheit wandern. Daten werden eine nie dagewesene Transparenz bieten. Konsumenten werden mündiger und selbstständiger ihre Gesundheit steuern. Dieses Buch stellt die technologischen Kräfte, die zu dieser tektonischen Verschiebung führen und fester Bestandteil unserer Gesundheitsversorgung werden, einzeln vor: Cloud Computing, Internet of Things, künstliche Intelligenz, 3-D-Druck, Virtual Reality, Nanomedizin. Es beleuchtet zugleich die gesellschaftlichen Herausforderungen und zeigt in einem Ausblick, was sich dadurch für Konsumenten und Patienten ändern wird.
