high school world history ebook: New Era - New Urgency F. Joseph Merlino, Deborah Pomeroy, 2024-03-29 *New Era - New Urgency: The Case for Repurposing Education* explores the unprecedented realities and challenges associated with entering a new era, such as catastrophic climate changes, advanced artificial intelligence, massive demographic shifts, and worldwide digital disinformation campaigns. This era calls for a new urgency in thinking about how we will educate present and future generations of young people. This book is divided into four parts; Part I describes the profound social, technological, and demographic changes that have occurred over four hundred years since the first English settlements in Massachusetts and Virginia. Part II describes four shadows that have served to corrupt these purposes of education: extreme wealth inequality, nativism, white supremacy, and anti-intellectualism. Part III explores the illusions of educational reform that have over-promised college and career success, created an idolatry of math test scores, conflated memorization of facts with conceptual understanding, and confused multiple layers of policy agendas with progress. Part IV depicts F. Joseph Merlino and Deborah Pomeroy's twelve years of experience in Egypt, Bosnia-Herzegovina, Turkey, and the U.S. in helping to craft new purposes of education for model schools in their countries that reflect their aspirations for a new generation.

high school world history ebook: Optimism, Literature, and Culture in American Capitalism and Chinese Socialism Wendy Larson, 2025-10-09 This book examines and interprets the uncanny similarity between capitalism and socialism over the twentieth century as both systems found ways to encourage happiness and optimism in their citizens. As inheritors of the Enlightenment's emphasis on scientific rationality, these cultures sought to instill in their citizens a

belief in progress: in essence, history shows steady improvement, and the future will continue in this direction indefinitely. Optimism--which bears a temporal quality, a continual gaze to the future--is the favored state of mind in both capitalist and socialist societies, which have embraced progress as a theory of history. Related to optimism is happiness, which emphasizes the present. When progress as a theory of history is generally accepted, happiness becomes a transference of future advancement into present subjectivity, ultimately expressing acceptance of, and satisfaction with, society. Fundamentally a literary study strongly embedded in history, this project looks to fiction to show not only how imaginary characters became models for readers, but also how narrative encouraged readers to engage in a struggle for new values. Characters worked out--or failed to work out--questions related to the personal and larger cultural shaping of an ongoing optimism. At the same time, writers questioned these models and, purposefully or otherwise, displayed the downsides of excessive, mandated, or coerced optimism. They also challenged the way in which optimism encompassed a belief in progress that itself could be camouflaged, and the demands for a happiness that imposed everyone else's wellbeing before one's own. The book compares Yang Mo's famous *Song of Youth* (1958) with Horatio Alger Jr.'s *Ragged Dick* (1868), Eleanor Hodgman Porter's *Pollyanna* (1913), and Frederick Kohner's *Gidget* (1957); Wang Meng's *Long Live Youth* (written 1953) and *A Young Man Arrives at the Organization Department* (1956) are evaluated against Jack Kerouac's *On the Road* (1958). This study both incorporates and challenges various political and cultural theoretical concepts including revolutionary optimism, permanent revolution, the theory of literary typicality, the New Soviet Person and the positive hero, optimistic autosuggestion, cultural authenticity, and positive thinking.

high school world history ebook: 21st Century Skills Development Through Inquiry-Based Learning Samuel Kai Wah Chu, Rebecca B. Reynolds, Nicole J. Tavares, Michele Notari, Celina Wing Yi Lee, 2016-09-21 This book presents innovative instructional interventions designed to support inquiry project-based learning as an approach to equip students with 21st century skills. Instructional techniques include collaborative team-based teaching, social constructivist game design and game play, and productive uses of social media such as wikis and other online communication affordances. The book will be of interest to researchers seeking a summary of recent empirical studies in the inquiry project-based learning domain that employ new technologies as constructive media for student synthesis and creation. The book also bridges the gap between empirical works and a range of national- and international-level educational standards frameworks such as the P21, the OECD framework, AASL Standards for the 21st Century Learner, and the Common Core State Standards in the US. Of particular interest to education practitioners, the book offers detailed descriptions of inquiry project-based learning interventions that can be directly reproduced in today's schools. Further, the book provides research-driven guidelines for the evaluation of student inquiry project-based learning. Lastly, it offers education policymakers insight into establishing anchors and spaces for applying inquiry project-based learning opportunities for youth today in the context of existing and current education reform efforts. The aim of this book is to support education leaders', practitioners' and researchers' efforts in advancing inspiring and motivating student learning through transformative social constructivist inquiry-based knowledge-building with information technologies. We propose that preparing students with inquiry mindsets and dispositions can promote greater agency, critical thinking and resourcefulness, qualities needed for addressing the complex societal challenges they may face.

high school world history ebook: *Crusading Against Christians in the Middle Ages* Mike Carr, Nikolaos G. Chrissis, Gianluca Raccagni, 2024-03-27 This is the first book-length study into crusading against Christians, examining this complex phenomenon from the twelfth to fifteenth centuries and across numerous regions, from France to Russia and from southern Italy to the Baltic. Whilst the crusades are an immensely popular topic, those launched against Christian rulers and communities have been comparatively overlooked in the past, with existing studies typically focusing on a particular area, period, or campaign. This volume brings together the expertise of thirteen scholars on a variety of primary and secondary sources not often accessible to Anglophone readership, as well as their knowledge of national discourses which have often shaped historiography. It aims to serve as the first port of call for anyone who wishes to approach crusades against Christians within and without the specialism of crusader studies, and to provide the basis for a thorough comparative analysis of this phenomenon, covering its variety as comprehensively as possible.

high school world history ebook: Cultures of Witchcraft in Europe from the Middle Ages to the Present Jonathan Barry, Owen Davies, Cornelia Usborne, 2017-10-09 This volume is a collection based on the contributions to witchcraft studies of Willem de Blécourt, to whom it is dedicated, and who provides the opening chapter, setting out a methodological and conceptual agenda for the study of cultures of witchcraft (broadly defined) in Europe since the Middle Ages. It includes contributions from historians, anthropologists, literary scholars and folklorists who have collaborated closely with De Blécourt. Essays pick up some or all of the themes and approaches he pioneered, and apply them to cases which range in time and space across all the main regions of Europe since the thirteenth century until the present day. While some draw heavily on texts, others on archival sources, and others on field research, they all share a commitment to reconstructing the meaning and lived experience of witchcraft (and its related phenomena) to Europeans at all levels, respecting the many varieties and ambiguities in such meanings and experiences and resisting attempts to reduce them to master narratives or simple causal models. The chapter 'News from the Invisible World: The Publishing History of Tales of the Supernatural c.1660-1832' is available open access under a CC BY 4.0 license at link.springer.com.
