investment mergers handbook pdf: Merger Control Regimes in Emerging Economies

Marco Botta, 2011-01-01 When emerging economies draft competition law and begin to enforce it, they usually draw on the EU and US competition law systems. However, significant country-specific legal and practical variations tend to arise quickly, making it imperative for international business

lawyers to acquire more than a passing knowledge of competition legislation and relevant case law in these countries. Now for the first time a thoroughly researched book provides an in-depth empirical analysis of the legal problems raised for competition, and especially for merger control and its enforcement, in emerging economies, using a case study approach in the Brazilian and Argentinean contexts to reveal paradigmatic trends. Brazil and Argentina are chosen not only because they are among the major trading jurisdictions in the developing world, but also because they have each established a track record of over a decade in formulating and enforcing a system of merger control. The author describes and analyses all Brazilian and Argentinean legislation in the field of competition law, as well as the main merger decisions adopted by the competition authorities and the judgements held by the courts of these countries. The book thoroughly covers the system of competition law currently enforced in each country, as well as the main innovations of proposed new competition law currently pending in Brazil. In addition, the author draws on field interviews with competition lawyers and officers of competition authorities conducted between April and July 2008 in Buenos Aires, Brasilia, and São Paulo. The analysis considers such issues as the following: y impact of M & As on the level of competition in the markets of developing countries; y enforcement of competition law and the judiciary; y criteria for notification of economic concentrations; y application of econometric tests to define the relevant market and the degree of market concentration.

investment mergers handbook pdf: Handbook of Research on Sustainability Challenges in the Wine Industry Marco-Lajara, Bartolomé, Gilinsky, Armand, Martínez-Falcó, Javier, Sánchez-García, Eduardo, 2023-04-18 In the wine industry, sustainability is an extremely important issue for two main reasons: Firstly, the industry faces serious threats as a consequence of climate change, as well as water and energy scarcity. Secondly, proper sustainable management of wineries can mean obtaining a competitive advantage by allowing them to increase market share and organizational innovation processes. In this sense, previous work has shown that customers tend to select wines that have been developed following sustainable practices, despite not knowing what this means in practice. The Handbook of Research on Sustainability Challenges in the Wine Industry serves as a guide for study, reflection, and critique to understand sustainability in the wine industry in its triple aspect (economic, social, and environmental). The book sheds light on the new trends and challenges of the wine industry, making it a must-read for academicians and managers who want to deepen their knowledge of the wine industry as well as its link with sustainability. Covering key topics such as wine tourism, green innovation, and consumer behavior, this major reference work is ideal for industry professionals, business owners, managers, entrepreneurs, researchers, scholars, academicians, practitioners, instructors, and students.

investment mergers handbook pdf: Counting the Cost Clemens Sedmak, Kelli Reagan Hickey, 2024-04-05 What difference would Catholic Social Tradition make if it guided our personal and communal financial decision-making? The Sermon on the Mount reminds us of this fundamental decision-making when it comes to questions of faith and money: "No one can serve two masters; for a slave will either hate the one and love the other or be devoted to the one and despise the other. You cannot serve God and wealth" (Matthew 6:24). In *Counting the Cost*, Clemens Sedmak and Kelli Reagan Hickey suggest a theological and spiritual discernment process for the everyday reality of budgeting and financial planning that explores the status of money and monetary values by reflecting on this gospel call. *Counting the Cost* explains how Catholic Social Teaching provides a framework for our thinking around finances by answering questions such as: What does this fundamental decision look like in times of financial scarcity and stewardship responsibilities? How do the attitudes that Jesus invites us into shape the ways we make financial decisions? And how can budgeting be and become a way of discipleship for individuals, parishes, and dioceses? The book includes a range of financial decision-making examples and reconstructs them as decisions about

priorities, values, and commitments to respond to the world and its material realities in a gospel-inspired way. The Enacting Catholic Social Tradition series is dedicated to the systematic application of Catholic Social Teaching to real-world problems and issues. Written for both academics and pastoral practitioners who want to draw on and learn more about the rich resources of Catholic Social Tradition for the practical work of justice, the series aims to strengthen the capacity of the church to respond lovingly and well to the demands of the gospel.

Featuring coverage on a broad range of topics such as emerging markets, risk assessment, and global business, this book is ideally designed for corporate managers, government officials, scholars, researchers, and students.

investment mergers handbook pdf: Home country measures that promote responsible foreign agricultural investment: Food and Agriculture Organization of the United Nations, 2018-11-06 This paper summarizes the good practices by nine selected OECD countries that seek to promote responsible foreign investment in developing country agriculture, primarily by investors in their territory or jurisdiction. The study provides examples of the increasing trend of home countries in establishing binding legal norms and other mechanisms as safeguards that are relevant for agricultural investment. It finds that states apply some specific provisions to hold private corporate actors investing in agriculture abroad accountable, for example in regard to bribery of foreign public officials. Investment home countries are also increasingly using safeguards relevant for agricultural investment by companies that are controlled by the state or seek its support. Furthermore, Public-Private Partnerships are increasingly used in development assistance projects as a means to promote responsible agricultural investment. In these cases, the safeguards usually imply the use of negotiated and approved instruments such as the Voluntary Guidelines on the Responsible Governance of Tenure of Land, Fisheries and Forests in the Context of National Food Security (VGGT). The Principles for Responsible Investment in Agriculture and Food Systems (CFS-RAI), endorsed in 2014 by the Committee on World Food Security (CFS), are likely to become a major guidance instrument, given recent declarations by the G7 and G20.

Bill Pritchard, Rodomiro Ortiz, Meera Shekar, 2016-03-31 The concept of food and nutrition security has evolved and risen to the top of the international policy agenda over the last decade. Yet it is a complex and multi-faceted issue, requiring a broad and inter-disciplinary perspective for full understanding. This Handbook represents the most comprehensive compilation of our current knowledge of food and nutrition security from a global perspective. The other sections focus on three key themes: how food has been, is and should be made available, including by improvements in agricultural productivity; the ways in which politico-economic and social arenas have shaped access to food; and the effects of food and nutrition systems in addressing human health, known as food utilisation. Overall, the volume synthesizes a vast field of information drawn from agriculture, soil science, climatology, economics, sociology, human and physical geography, the nutrition and health sciences, environmental science and development studies.
