**kelce political stance: Cultural Politics of the Creative Industries** Phil Graham, 2024-10-11 This book presents the creative industries as a suite of practices intimately connected to political, economic, and cultural power. Seeking to illuminate the creative industries through critical cultural analysis it shows the extent to which creative labour shapes our shared cultural and political realities, good and bad. The author presents creative labour as a form of employment which typically operates well outside conventional industrial relationships, highlighting the importance of cultural as well as political and economic value. The aim of doing so is to provide a view of the broader creative economy that shows up the effects and trends of its strange industrial relationships. It recognises new forms of audience labour as significant creative, political, cultural, and commercial forces, and frames cultures as preceptual systems, as systems of rules, conventions, morés, and laws. In so doing, the author provides a new cultural framework through which scholars, students, and reflective practitioners can make critical judgements about the creative economy and its creative acts.

**kelce political stance: We Hold These "Truths"** Casey Burgat, 2025-02-04 We Hold These 'Truths' dismantles dozens of myths about American politics in the service of rebuilding American democracy. Burgat teaches us that the solutions are never simple or quick—but that they are within our reach if we're humble enough to rethink our assumptions and bold enough to reform our institutions." —Daniel H. Pink, #1 New York Times bestselling author and former White House speechwriter In this clear-eyed guide, America's political experts cut through the spin and expose the myths holding our democracy back. Our political system is bogged down by convenient falsehoods, fueled by those who benefit from the chaos. These myths distort our view of government and prevent us from solving real problems, leaving many Americans feeling frustrated and hopeless. In We Hold These Truths, former congressional staffer turned George Washington University grad school professor Casey Burgat leads a diverse team of officials, academics, and experts from both sides of the aisle to expose the lies at the heart of our political dysfunction. They debunk talking points about term limits, lobbyists, money in politics, and more – offering real-world insights into how our government actually works. Replacing myths with clarity and solutions, We Hold These Truths empowers us all to see past the distractions, understand the system, and demand the kind of government that will actually bring about positive change. **kelce political stance: The Public Policy Perspective** Benjamin H. Deitchman, 2025-05-12 Public policy and public administration are fundamental to a functioning society. These fields are embedded into our institutions, everyday lives, and the greater culture. This book will explore public interest roles in 2025 from the student, scholar, and practitioner perspective, as well as from their impacts on people and the planet. As we live through unceasingly unprecedented times, furthering our worldview on governance is essential. Benjamin H. Deitchman starts at the beginning: with understanding the basic perspectives on the public and nonprofit sectors and the roles in serving and leading in communities and beyond. Rigorously rooted in theory and practical experience, he examines how relevant individuals and institutions grow and provide impact, and how this shapes internal views and the views of others, including on television and in sports. While the work is

tedious and serious, *The Public Policy Perspective: A Personal Analysis of Public Work* provides examples and analysis to explore its essentiality, and even its fun. A useful and engaging supplemental reading in an introductory or capstone course to provide perspective on the roles, responsibilities, and opportunities of the public policy or public administration scholar or professional.

**kelce political stance: SOCIAL MEDIA MUSINGS** George Waas, 2024-02-08 Since the attack on the Capitol on January 6, 2021, I have posted numerous essays and other commentaries on Facebook. They are of varying length on matters of politics, law, history, personal matters, and other subjects as well. My first book on social musings contains 142 Facebook posts. My second book is a continuation of my posts, an additional 118. My third book adds another 104 to my list. My fourth book adds 78 more. My fifth book adds another 85. My sixth book includes another 116. Book 7 adds 106 more; Book 8 adds another 82 for a combined total of 834 essays, commentaries, notes, etc., all taken together as social media musings. As I've said throughout this series of books, I believe in an informed citizenry that relies on facts, logic, critical thinking, and reasoned judgment. At a time when too many people rely too heavily on social media and the misinformation from those sources; at a time when anger and rage too often replace common sense and critical thinking, it is hoped that the essays and social commentaries in this series of books on social media musings will inspire dialogue and further citizen involvement in their communities.

**kelce political stance: Living Make-Belief: Thriving in a Dream Society** Jim Dator, 2024-05-27 This book shows how multiple developments have caused the world to move from "an information society" to a "dream society". Ongoing social and technological forces are pushing us from a world of words, rationality, and truth into a world of images, performance, and make-belief. Rather than deny or reject this transformation, this book argues that one should understand and embrace it as waves of new futures that the world must strive to surf for fame and fun. As a political scientist and futurist, the author also offers hints of new goals and forms of governance fit for a dream society, as he demonstrates that all current systems are ineffective and dangerously obsolete. This book is of great interest to political philosophers, futures scientists, sociologists, and those interested in cultural studies.

**kelce political stance: Psychological Processes in Social Media** Rosanna E. **kelce political stance: *Renegotiating the Body*** Kathy Battista, 2012-11-20 What makes art 'feminist art'? Although feminist artists do have a unique aesthetic, there can be no essential feminist aesthetic, argues Kathy Battista in this exciting new art history. Domesticity, the body, its traces and sexuality have become prominent themes in contemporary feminist practice but where did these preoccupations begin and how did they come to signify a particular type of art? Kathy Battista's (re-)engagement with the founding generation of female practitioners centres on 1970s London as the cultural hub from which a new art practice arose. Emphasising the importance of artists including Bobby Baker, Anne Bean, Catherine Elwes, Rose English, Alexis Hunter, Tina Keane, Hannah O'Shea, Kate Walker and Silvia Ziranek and examining works such as Mary Kelly's Post-Partum Document, Judy Clark's 1973 exhibition Issues, Carolee Schneemann's Meat Joy and Cosey Fanni Tutti's Prostitution, shown in 1976, Kathy Battista investigates some of the most controversial and provocative art from the era. This book not only deals with the 'famous' art events but includes analysis of lesser-known exhibitions and performances and explains why so much feminist art has been both marginalised in art history and grossly under-represented in institutional archives and collections.

**kelce political stance: *Every Screen on the Planet*** Emily Baker-White, 2025-09-30 The story of the most effective attention algorithm ever invented, and the superpower struggle to control it. Every Screen on the Planet is the first major book on one of the most dramatic business stories of our time. Touching on politics, finance, data, and technology, the struggle over TikTok has enormous implications for our information landscape and the technological cold war between the United States and China. Emily Baker-White's engrossing narrative charts TikTok's rise from obscurity into the world's most valuable startup, led by its ambitious founder, Zhang Yiming—arguably the father of the modern recommendation algorithm. Zhang's products reshaped the global internet from a place where you searched for information to one where information came to you. TikTok seemed to know its users in an almost spooky way, provoking wonder and delight. People were hooked. "We intend to become ubiquitous," a new-hire training video said, to put TikTok "on every screen on the planet. But virtually everything about TikTok's users—their interests, locations, and even their unspoken desires—was accessible to staff in Beijing. After Baker-White, a Harvard-trained lawyer and investigative reporter, revealed that Chinese engineers could access Americans' private information, a team of employees used the app to track her location and attempt to expose whistleblowers. This incident triggered an ongoing criminal investigation and escalated the US government's fight against Chinese tech. TikTok was the first Chinese app to become a US juggernaut, and lawmakers soon recognized its potential for surveillance and propaganda—and the threat it might pose in the hands of their rivals. Yet even as hawks in Congress gained support to ban the app, the White House was secretly negotiating for unprecedented control over its information stream. In 2025, when President Donald Trump declined to enforce the so-called ban law, TikTok seemed to complete a miraculous corporate escape. It retained its influence, profits, and power, but now operated at the pleasure of two strongmen: China's Xi Jinping and Trump himself.

to the public in November 2022, ChatGPT awakened the world to a secretive project: teaching AI-powered machines to write. Its creators had a sweeping ambition—to build machines that could not only communicate, but could do all kinds of other activities, better than humans ever could. But was this goal actually achievable? And if reached, would it lead to our liberation or our subjugation? Vauhini Vara, an award-winning tech journalist and editor, had long been grappling with these questions. In 2021, she asked a predecessor of ChatGPT to write about her sister's death, resulting in an essay that was both more moving and more disturbing than she could have imagined. It quickly went viral. The experience, revealing both the power and the danger of corporate-owned technologies, forced Vara to interrogate how these technologies have influenced her understanding of her self and the world around her, from discovering online chat rooms as a preteen, to using social media as the Wall Street Journal's first Facebook reporter, to asking ChatGPT for writing advice—while compelling her to add to the trove of human-created material exploited for corporations' financial gain. Interspersed throughout this investigation are her own Google searches, Amazon reviews, and the other raw material of internet life—including the viral AI experiment that started it all. Searches illuminates how technological capitalism is both shaping and exploiting human existence, while proposing that by harnessing the collective creativity that makes humans unique, we might imagine a freer, more empowered relationship with our machines and, ultimately, with one another.
