intervention strategies pdf: Improving Organizational Interventions For Stress and Well-Being Caroline Biron, Maria Karanika-Murray, Cary Cooper, 2012-11-12 This book brings together a number of experts in the field of organizational interventions for stress and well-being, and discusses the importance of process and context issues to the success or failure of such interventions. The book explores how context and process can be incorporated into program evaluation, providing examples of how this can be done, and offers insights that aim to improve working life. Although there is a substantial body of research supporting a causal relationship between working conditions and employee stress and well-being, information on how to develop effective strategies to reduce or eliminate psychosocial risks in the workplace is much more scarce, ambiguous and inconclusive. Indeed, researchers in this field have so far attempted to evaluate the effectiveness of organizational interventions to improve workers’ health and well-being, but little attention has been paid to the strategies and processes likely to enhance or undermine interventions. The focus of this volume will help to overcome this qualitative-quantitative divide. This book discusses conceptual developments, practical applications, and methodological issues in the field. As such it is suitable for students, practitioners and researchers in the fields of organizational psychology and clinical psychology, as well as human resources management, health & safety, medicine, occupational health, risk management and public health.

intervention strategies pdf: Mislabeled as Disabled Kalman R. Hettleman, 2019-03-14 Kalman R. “Buzzy” Hettleman exposes the educational abuse suffered by tens of millions of struggling learners, including many who are “Mislabeled as Disabled” and dumped into special education. The majority of these students are not disabled in any medical or other clinical sense. Rather, in violation of federal law, they fail to receive proper instruction and fall farther behind, suffering stigma and segregation. Hettleman also shows how teachers are undervalued heroes denied the teaching tools to do the job right and, like students, are victimized by the system. This

book is a call to everyone to become enraged, and then engaged in the struggle for reform.

Dieser Band stellt vor, wie bei der Begutachtung und Beratung von Trennungsfamilien, auch bei solchen mit hoher Konflikthaftigkeit, die Nachscheidungsregelungen in Bezug auf die Kinder mit einem lösungsorientierten Ansatz erarbeitet werden können. Aus einer systemischen Sichtweise heraus werden zunächst der Wandel der Familie und gesellschaftlicher Vorstellungen in den letzten Jahrzehnten betrachtet, familiengerichtliche Streitgegenstände vor dem Hintergrund aktueller psychologischer Forschung diskutiert und die Rolle von Psychologie im Familienrecht kritisch analysiert. Anschließend wird ein Interventionsmodell bei hochkonflikthaften Eltern vorgestellt, das den Ansatz einer lösungsorientierten Begutachtung und gerichtsnahen Beratung verfolgt. Praxisbezogen vermitteln die weiteren Kapitel, wie die Kinder und weitere betroffene Familienmitglieder einbezogen und mit den Eltern die zentralen Fragen der Umgangs- und Sorgerechtsregelung geklärt und geregelt werden können. Für Personen, die gutachterlich und beratend mit Scheidungs- und Trennungsfamilien arbeiten, bietet dieser Band wertvolle Hilfen für die tägliche Arbeit.

intervention strategies pdf: Best Evidence Structural Interventions for HIV Prevention Rachel E Golden, Charles B. Collins, Shayna D Cunningham, Emily N Newman, Josefina J. Card, 2013-05-25 Providing detailed information on structural HIV prevention interventions, this book is intended for health care practitioners and researchers to plan, implement, and evaluate such interventions in their own communities. As defined by the CDC, structural interventions focus on the physical, social, cultural, political, economic, legal, and/or policy aspects of the environment. Designed to reach a large number of individuals, structural interventions usually occur across entire communities, cities, or countries. As a result, the resources required to initiate structural interventions can far exceed those required for smaller-scale behavioral programs. However, changes from structural interventions have the potential to last over time, even after the programs have ended, resulting in effective use of public and private prevention resources. Because the reach of structural interventions is typically larger than that of individual- or group-focused interventions (for example, the 100% Condom Use Program, which was implemented countrywide in Thailand), their influence may be equally—if not more—significant. This book is a resource for health practitioners, educators, and researchers who seek HIV/AIDS structural prevention programs that have been shown to be effective in their regions or for their target populations (e.g. injection drug users, commercial sex workers, or the general public). With extensive case studies, the book classifies interventions according to the desired outcomes (specific behavior or policy changes) so that the reader may focus on examples of programs with similar goals and target populations to their own. Addresses the quintessential public health ethical dilemma regarding which types of environmental changes should be mandatory via legislation and which should be voluntary, promoted via programmatic, practice, and policy change.

intervention strategies pdf: **FAO Regional Strategy on Food Loss and Waste Reduction in Asia and the Pacific** bennett, a., dubey, s., lee, w.t.k., damen, b., bucatariu, c., 2022-08-08 Food loss and waste (FLW) is one of the key areas under SP4 and BN4 as well as the MPI on Resilient Food Systems in RAP. FAO is well positioned as a global knowledge leader on food loss and waste and many of the other regions already have a tailored regional strategy on FLW reduction. In response to the last two APRC's as well as in line with the ZHC, and more recently the new FAO Strategic framework, this publication provides a basis for FAO and others to understand the scope and depth of FLW issues, how these can be addressed, including some good practices from Thailand, China and Nepal. As a multidisciplinary publication, it includes strong elements on policy and statistics with FAO as leading a convenor on SDG 12.3 on FLW measurement and reduction, highlights the scope and opportunities for FLW reduction as part of climate change efforts and also

in terms of improved nutrition. It builds upon the analysis and advice of the SOFA 2019 on food loss and waste and identifies key pillars for interventions as well as recommendations for the technical as well as policy/decision makers in the Asia Pacific region. It is strongly linked to the FAP Global Programme on food loss and waste being implemented by headquarters.

intervention strategies pdf: *Rural Victims of Crime* Rachel Hale, Alistair Harkness, 2022-12-30 *Rural Victims of Crime* offers a pioneering sustained assessment of 'the rural victim'. It does so by examining and analysing the conceptual constructs of a victim and challenging the urban bias of victimisation and victimology in criminological study. Indeed, far too much criminological scholarship is based on the false assumption that rural areas are relatively crime free – and thus free, too, of victims. Providing international perspectives, chapters in this edited collection focus centrally on notions of place and space, and constructions of rural victims in a variety of contexts, exploring the impact that geographic location has on the type and prevalence of victimisation. The concept of victimisation is often considered in terms of interpersonal relationships between humans, neglecting the potent impact of victimisation of non-humans and the natural and built environment. *Rural Victims of Crime* discusses existing notions of victimology in relation to non-human subjects, broadening conceptualisations of the victim and associated impacts resulting from victimisation. Structured in three parts, *Rural Victims of Crime* conceptualises the rural victim, enhances understanding of the realities of rural victimisation and considers both formal and informal responses to rural victimisation. Chapters are accompanied by practical, contemporary case studies to connect theory with praxis. This book is an essential and valuable resource for academics, students and practitioners alike in the fields of criminology, criminal justice, rural studies, victimology, geography, sociology and spatiality.

intervention strategies pdf: *Leading Primary Mathematics* Catherine Foley, Jane McNeill, Stephanie Suter, 2019-03-18 This book provides guidance and insight into 'what mathematics leadership looks like in practice' and shows readers how they can develop from a confident teacher into a curriculum subject leader. It does this through a careful blend of pedagogy and practical application, supported by a range of real-world case studies and opportunities to reflect critically on classroom practice. Key coverage includes: The planning and application that underpins subject leadership How international perspectives can influence leadership of mathematics How to develop fluency through problem solving and reasoning How to champion inclusive practice in mathematics Assessing children's understanding This is essential reading for anyone studying primary mathematics on initial teacher education courses, including undergraduate (BA Ed, BA with QTS) and postgraduate (PGCE, PGDE, School Direct and SCITT) routes, NQTs seeking to develop into curriculum leadership roles and those already leading mathematics in their school.

intervention strategies pdf: *Diplomacy, Development and Defense: A Paradigm for Policy Coherence* Stefani Weiss, Hans-Joachim Spanger, Wim van Meurs, 2010-07-30 The end of the Cold War radically changed both classic policies of national and collective security and international strategies for conflict management and the stabilization of precarious states. The threat of Islamic extremism and the wars in Afghanistan and Iraq have shattered any illusions of a peace dividend and have given strategies against state failure a new urgency. The growing awareness of the complex and intertwined problems of human security, socioeconomic underdevelopment and governance deficits as root causes of precarious statehood made policy coherence the new mantra for Western national governments and international organizations. Henceforth, it was envisaged to relinquish the existing division between diplomacy, development and defense in favour of the new comprehensive 3D-approach. This book is an attempt to assess the extent to which both international organizations and states have lived up to the new insights of the 3D continuum and adopted strategies corresponding institutional settings and policy instruments to provide the necessary culture of policy coherence for tackling the problems of precarious statehood and the international security challenges those states pose. On the national level, the cases studied are the United States, the United Kingdom, Germany and the Netherlands. On the international level, the United Nations and the European Union were examined. It is hoped, that the lessons

learned from whole-of-government approaches and the recommendations drawn from this survey will help both governments and international organizations to excel in dealing with precarious states, thereby making policy coherence a reality in risk assessment, decision-making and policy implementation.

intervention strategies pdf: Health Promotion in Schools, Universities, Workplaces, and Communities Graça S. Carvalho, Emily Darlington, Teresa Vilaça, 2024-12-17 Health education, well-being improvement, and advocacy are effective health promotion strategies among cutting-edge Public Health practices. Salutogenic perspectives, rooted in ecological models, have taken their rightful place to empower individuals and communities to change their life ecosystems and preserve and improve their health. It is imperative to shift from targeting protective or risk factors, which have linear causal relationships with health conditions and/or comorbidities, and encompass a systemic understanding of the role of health determinants in creating health. Individual, collective, and structural ecological approaches can better reduce health inequities. Moreover, engaging the presumed beneficiaries from such strategies ensures that actual needs are identified, and choices are context-specific. It improves the whole implementation process as well as its results. Higher levels of participation, such as co-creation, imply a bottom-up, voluntary, collaborative process rooted in values of diversity, mutual trust, openness, autonomy, freedom, and respect, as well as shared expertise, responsibility, and decision-making, which are essential values in co-creating health promotion.

intervention strategies pdf: Handbook of Special Education James M. Kauffman, Daniel P. Hallahan, Paige Cullen Pullen, 2017-05-25 The purpose of the Handbook of Special Education is to help profile and bring greater clarity to the already sprawling and continuously expanding field of special education. To ensure consistency across the volume, chapter authors review and integrate existing research, identify strengths and weaknesses, note gaps in the literature, and discuss implications for practice and future research. The second edition has been fully updated throughout to take into account recent changes to federal laws as well as the most current academic research, and an entirely new section has been added on research methods in special education.
