The rural credit market consists of both formal and informal financial institutions and agencies that meet the credit needs of the rural masses in India. The supply of total formal credit is inadequate and rural credit markets are imperfect and fragmented. Moreover, the distribution of formal sector credit has been unequal, particularly with respect to region and class, cast and gender in the country side. Regional Rural Banks were established under the provisions of an Ordinance promulgated on the 26th September 1975 and the RRB Act, 1975 with an objective to ensure sufficient institutional credit for agriculture and other rural sectors. This book is useful to policy makers and researchers in the field of Regional Rural Banks and Weaker Sections Development.

kannada sex kannada sex: *On Comitatives and Related Categories* Thomas Stolz, Cornelia Stroh, Aina Urdze, 2008-08-22 This is the first book-length functional-typologically inspired crosslinguistic study of comitatives and related categories such as the instrumental. On the basis of data drawn from 400 languages world-wide (covering all major phyla and areas), the authors test and revise a variety of general linguistic hypotheses about the grammar and cognitive foundations of comitatives. Three types of languages are identified according to the morphological treatment of the comitative and its syncretistic association with other concepts. It is shown that the structural behaviour of comitatives is areally biassed and that the languages of Europe tend to diverge from the majority of the world's languages. This has important repercussions for a language-independent

definition of the comitative. The supposed conceptual closeness of comitative and instrumental is discussed in some detail and a semantic map of the comitative is put forward. Markedness is the crucial concept for the evaluation of the relation that ties comitatives and instrumentals to each other. In a separate chapter, the diachrony of comitatives is looked into from the perspective of grammaticalisation research. Throughout the book, the argumentation is richly documented by empirical data. The book contains three case-studies of the comitative in Icelandic, Latvian and Maltese - each of which represents one of the three language types identified earlier in the text. For the purpose of comparing the languages of Europe, a chapter is devoted to the analysis of a large parallel literary corpus (covering 64 languages) which reveals that the parameters of genetic affiliation, areal location and typological classification interact in intricate ways when it comes to predicting whether or not two languages of the sample behave similarly as to the use to which they put their comitative morphemes. With a view to determining the degree of similarity between the languages of the European sub-sample, methods of quantitative typology are employed. General linguists with an interest in case, functional typologists, grammaticalisation researchers and experts of markedness issues will value this book as an important contribution to their respective fields of interest. kannada sex kannada sex: English Heart, Hindi Heartland Rashmi Sadana, 2012-02-02 English Heart, Hindi Heartland examines Delhi's postcolonial literary world—its institutions, prizes, publishers, writers, and translators, and the cultural geographies of key neighborhoods—in light of colonial histories and the globalization of English. Rashmi Sadana places internationally recognized authors such as Salman Rushdie, Anita Desai, Vikram Seth, and Aravind Adiga in the context of debates within India about the politics of language and alongside other writers, including K. Satchidanandan, Shashi Deshpande, and Geetanjali Shree. Sadana undertakes an ethnographic study of literary culture that probes the connections between place, language, and text in order to show what language comes to stand for in people's lives. In so doing, she unmask a social discourse rife with questions of authenticity and cultural politics of inclusion and exclusion. English Heart, Hindi Heartland illustrates how the notion of what is considered to be culturally and linguistically authentic not only obscures larger questions relating to caste, religious, and gender identities, but that the authenticity discourse itself is continually in flux. In order to mediate and extract cultural capital from India's complex linguistic hierarchies, literary practitioners strategically deploy a fluid set of cultural and political distinctions that Sadana calls "literary nationality." Sadana argues that English, and the way it is positioned among the other Indian languages, does not represent a fixed pole, but rather serves to change political and literary alliances among classes and castes, often in surprising ways.

kannada sex kannada sex: Stress and Coping Patterns among Physical Education

Teachers of Secondary Schools Dr. Ashok Kumar & Dr. S. Madialagan, 2021-02-19 Introduction

In everyday life, working class people come across many situations where they have to cope with many situations and conditions, putting them in a lot of stress. Stress has become an inevitable part of human life in modern times. It is becoming a global phenomenon affecting all genres of people. The optimum level of occupational stress poses a risk to most organizations. "Teachers in particular not only have the stress of dealing with so many diverse children on a day to day basis; they are also entitled with educating and helping to mold these children into productive members of society. With rules, regulations, guidelines and performance expectations can induce very high levels of stress; the job can be demanding and has hardly any relief. Quite often teachers must take their work home overnight or on the weekends in order to be prepared for the next class or session on the field, or the teachers will have to score the test given to the children, in free time, which is possible only when he/she gets home. The traditional summer break that so many teachers once looked forward to, has began to reduce over the past few years, as well with most schools beginning to adopt block schedules which require yearlong school sessions with no more than nine week vacation period"(Kaur, 2011).

Hiremath, 2017-02 Corporate Social Responsibility (CSR) - the commitment of organizations to balance financial performance with contributions to the quality of life of their employees, the local community and society at large - is gaining worldwide value as a business tool and social effort. The review of literature suggests that many studies have been undertaken globally to understand CSR as a subject of management but there have been very few studies undertaken to understand the other dimension of CSR which is beneficiary (community) aspect of CSR, especially in India. Here, the authors make an attempt to understand the CSR concept from both the dimensions of CSR i.e. management and beneficiaries of CSR (community).

The authors try to understand the issues covered by the management and their implementing strategies in order to meet community needs. Also, the authors try to study the requirements and satisfaction of the community in the area where the corporates implement CSR. This type of attempt is the first one in India to study the community awareness and its knowledge about CSR as well as the organisations working in the community. The present study also tries to measure the impact of CSR activities undertaken by the organizations in a way to have the sustainable development at village level. In this context, the present study plays a significant role in the field of Research Methodology, the field of management as well as social science, especially from the social work perspective. To meet the study objectives, both primary and secondary data were used. The primary data was collected in Karnataka, India by selecting nine organisations, three of each from Govt., Private and Multinational companies; those were recognised as leaders in implementing CSR activities. kannada sex kannada sex: Aspects of the Theory of Morphology Igor Mel'cuk, 2008-08-22
The book is dedicated to linguistic morphology and it contains a sketch of a complete morphological theory, centered around a discussion of fundamental concepts such as morph vs. morpheme, inflectional category, voice, grammatical case, agreement vs. government, suppletion, relationships between linguistic signs, etc.: the hottest issues in modern linguistics! The book introduces rigorous and clear concepts necessary to describe morphological phenomena of natural languages. Among other things, it offers logical calculi of possible grammemes in a given category. The presentation is developed in a typological perspective, so that linguistic data from a large variety of languages are described and analyzed (about 100 typologically very different languages). The main method is deductive: the concepts proposed in Aspects of the Theory of Morphology are based on a small set of indefinibilia and each concept is defined in terms of these indefinibilia and/or other concepts defined previously; as a result, logical calculi can be constructed (similar to Mendeleev's Periodical Table of Elements in chemistry). Then the concept is applied to the actual linguistic data to demonstrate its validity and advantages. Thus, Aspects of the Theory of Morphology combines metalinguistic endeavor (a system of concepts for morphology) with typological and descriptive orientation. It reaches out to all students of language, including the border fields and applications.
