jonathan safran foer ebook: *The Cambridge Companion to Literature in a Digital Age* Adam Hammond, 2024-11-14 Literature has experienced two great medium shifts, each with profound implications for its forms, genres, and cultures: that from orality to writing, and that from writing to printing. Today we are experiencing a third shift, from printed to digital forms. As with the previous shifts, this transformation is reconfiguring literature and literary culture. The Cambridge Companion to Literature in the Digital Age is organized around the question of what is at stake for literary studies in this latest transition. Rather than dividing its chapters by methodology or approach, this volume proceeds by exploring the major categories of literary investigation that are coming under pressure in the digital age: concepts such as the canon, periodization, authorship, and narrative. With chapters written by leading experts in all facets of literary studies, this book shows why all those who read, study, and teach literature today ought to attend to the digital.

This volume explores how digital material might be read or utilized in research, whether that material is digitally born as fanfiction, for example, mostly is, or transposed from other sources. The volume asks questions such as what happens when text is transformed from printed into digital matter, and how that impacts on the methods we bring to bear on exploring that technologized matter, for example in the case of digital editions. Issues such as how to analyse visual material in digital archives or Twitter feeds, how to engage in data mining, what it means to undertake crowd-sourcing, big data, and what digital network analyses can tell us about online interactions are dealt with. This will give Humanities researchers ideas for doing digitally based research and also suggest ways of engaging with new digital research methods. Key featuresFirst volume centred on the navigation and interpretation of digital material as research methods in the HumanitiesUp-to-date analyses of issues and methods including big data, crowdsourcing, digital network analysis, working with digital additionsBased on actual research projects such as para-textual work with fanfiction, reading twitter, different kinds of distant and close readings

jonathan safran foer ebook: *Bookishness* Jessica Pressman, 2020-12-01 Twenty-first-century culture is obsessed with books. In a time when many voices have joined to predict the death of print, books continue to resurface in new and unexpected ways. From the proliferation of “shelfies” to Jane

Austen-themed leggings and from decorative pillows printed with beloved book covers to bookwork sculptures exhibited in prestigious collections, books are everywhere and are not just for reading. Writers have caught up with this trend: many contemporary novels depict books as central characters or fetishize paper and print thematically and formally. In *Bookishness*, Jessica Pressman examines the new status of the book as object and symbol. She explores the rise of “bookishness” as an identity and an aesthetic strategy that proliferates from store-window décor to experimental writing. Ranging from literature to kitsch objects, stop-motion animation films to book design, Pressman considers the multivalent meanings of books in contemporary culture. Books can represent shelter from—or a weapon against—the dangers of the digital; they can act as memorials and express a sense of loss. Examining the works of writers such as Jonathan Safran Foer, Jennifer Egan, Mark Z. Danielewski, and Leanne Shapton, Pressman illuminates the status of the book as a fetish object and its significance for understanding contemporary fakery. Bringing together media studies, book history, and literary criticism, *Bookishness* explains how books still give meaning to our lives in a digital age.

jonathan safran foer ebook: *Literature in the Digital Age* Adam Hammond, 2016-03-03
Literature in a Digital Age: An Introduction guides readers through the most salient theoretical, interpretive, and creative possibilities opened up by the shift to digital literary forms such as e-books, digital archives, and electronic literature. While Digital Humanities (DH) has been hailed as the ‘next big thing’ in literary studies, many students and scholars remain perplexed as to what a DH approach to literature entails, and skeptical observers continue to see literature and the digital world as fundamentally incompatible. In its argument that digital and traditional scholarship should be placed in dialogue with each other, this book contextualizes the advent of the digital in literary theory, explores the new questions readers can ask of texts when they become digitized, and investigates the challenges that fresh forms of born-digital fiction pose to existing models of literary analysis.

jonathan safran foer ebook: *Analog Fictions for the Digital Age* Julia Breitbach, 2012 Shows how current photographic discourse can illuminate the analysis of recent literary realism and proposes a truly original photographic hermeneutics for literary study. Both realist, post-postmodernist aesthetics in the twenty-first century and the legacy of analog photography in its recent digital incarnation depend on an aesthetics of trust and a sense of contingent referentiality. Julia Breitbach's innovative study demonstrates how current photographic discourse may be used as an illuminating critical idiom for the analysis of recent forms of literary realism, thus proposing a photographic hermeneutics for the study of literature. Along with a thorough critical investigation of both fields, Breitbach offers a pioneering theoretical exploration of analog and digital photography based on recent thing theory, which she then applies to in-depth analyses of realist aesthetics in selected post-millennial novels by Don DeLillo, Michael Ondaatje, and Ali Smith, yielding fresh perspectives on the remediation between photography and literature in the twenty-first century. An original contribution to the study of contemporary Anglophone literatures with an interdisciplinary appeal, this study will be of interest especially to scholars and students in Anglophone literary studies, comparative literature, cultural studies, and media studies. Julia Breitbach is Assistant Professor in the Department of American Studies at the University of Konstanz, Germany.

jonathan safran foer ebook: *Bitstreams* Matthew G. Kirschenbaum, 2021-11-23 What are the future prospects for literary knowledge now that literary texts—and the material remains of authorship, publishing, and reading—are reduced to bitstreams, strings of digital ones and zeros? What are the opportunities and obligations for book history, textual criticism, and bibliography when literary texts are distributed across digital platforms, devices, formats, and networks? Indeed, what is textual scholarship when the text of our everyday speech is a verb as often as it is a noun? These are the questions that motivate Matthew G. Kirschenbaum in *Bitstreams*, a distillation of twenty years of thinking about the intersection of digital media, textual studies, and literary archives. With an intimate narrative style that belies the cold technics of computing, Kirschenbaum takes the reader into the library where all access to Toni Morrison's papers is mediated by digital technology;

to the bitmapped fonts of Kamau Brathwaite's Macintosh; to the process of recovering and restoring fourteen lost HyperPoems by the noted poet William Dickey; and finally, into the offices of Melcher Media, a small boutique design studio reimagining the future of the codex. A persistent theme is that bits—the ubiquitous ones and zeros of computing—are never self-identical, but always inflected by the material realities of particular systems, platforms, and protocols. These materialities are not liabilities: they are the very bulwark on which we stake the enterprise for preserving the future of literary heritage.

jonathan safran foer ebook: *Postprint* N. Katherine Hayles, 2021-02-16 Since Gutenberg's time, every aspect of print has gradually changed. But the advent of computational media has exponentially increased the pace, transforming how books are composed, designed, edited, typeset, distributed, sold, and read. N. Katherine Hayles traces the emergence of what she identifies as the postprint condition, exploring how the interweaving of print and digital technologies has changed not only books but also language, authorship, and what it means to be human. Hayles considers the ways in which print has been enmeshed in literate societies and how these are changing as some of the cognitive tasks once performed exclusively by humans are now carried out by computational media. Interpretations and meaning-making practices circulate through transindividual collectivities created by interconnections between humans and computational media, which Hayles calls cognitive assemblages. Her theoretical framework conceptualizes innovations in print technology as redistributions of cognitive capabilities between humans and machines. Humanity is becoming computational, just as computational systems are edging toward processes once thought of as distinctively human. Books in all their diversity are also in the process of becoming computational, representing a crucial site of ongoing cognitive transformations. Hayles details the consequences for the humanities through interviews with scholars and university press professionals and considers the cultural implications in readings of two novels, *The Silent History* and *The Word Exchange*, that explore the postprint condition. Spanning fields including book studies, cultural theory, and media archeology, *Postprint* is a strikingly original consideration of the role of computational media in the ongoing evolution of humanity.

jonathan safran foer ebook: *The Emergence of the Digital Humanities* Steven E. Jones, 2013-08-15 The past decade has seen a profound shift in our collective understanding of the digital network. What was once understood to be a transcendent virtual reality is now experienced as a ubiquitous grid of data that we move through and interact with every day, raising new questions about the social, locative, embodied, and object-oriented nature of our experience in the networked world. In *The Emergence of the Digital Humanities*, Steven E. Jones examines this shift in our relationship to digital technology and the ways that it has affected humanities scholarship and the academy more broadly. Based on the premise that the network is now everywhere rather than merely out there, Jones links together seemingly disparate cultural events—the essential features of popular social media, the rise of motion-control gaming and mobile platforms, the controversy over the gamification of everyday life, the spatial turn, fabrication and 3D printing, and electronic publishing—and argues that cultural responses to changes in technology provide an essential context for understanding the emergence of the digital humanities as a new field of study in this millennium. jonathan safran foer ebook: *Flat-World Fiction* Liliana M. Naydan, 2021-12-15 *Flat-World Fiction* analyzes representations of digital technology and the social and ethical concerns it creates in mainstream literary American fiction and fiction written about the United States in the first two decades of the twenty-first century. In this period, authors such as Don DeLillo, Jennifer Egan, Dave Eggers, Joshua Ferris, Jonathan Safran Foer, Mohsin Hamid, Thomas Pynchon, Kristen Roupenian, Gary Shteyngart, and Zadie Smith found themselves not only implicated in the developing digital world of flat screens but also threatened by it, while simultaneously attempting to critique it. As a result, their texts explore how human relationships with digital devices and media transform human identity and human relationships with one another, history, divinity, capitalism, and nationality. Liliana M. Naydan walks us through these complex relationships, revealing how authors show through their fiction that technology is political. In the process, these authors complement and expand on work by historians, philosophers, and social scientists, creating accessible, literary road maps to our digital future.

jonathan safran foer ebook: *The Digital Subject* Collectif, 2023-07-05 Our societies have now gone almost fully digital, which is bound to impact the ways in which the self apprehends itself, constructs itself and takes part in society. This collective essay draws upon philosophy, logics, literature and media studies to explore a variety of responses to what is currently at stake in the recomposition of the subject through our daily digital experience. Attempting to chart the digital traces human beings leave behind them, in writing or in archives, it situates them in the larger political, economic and financial frame of our times.

jonathan safran foer ebook: *Reading Writing Interfaces* Lori Emerson, 2014-06-01 Lori Emerson examines how interfaces—from today's multitouch devices to yesterday's desktops, from typewriters to Emily Dickinson's self-bound fascicle volumes—mediate between writer and text as well as between writer and reader. Following the threads of experimental writing from the present into the past, she shows how writers have long tested and transgressed technological boundaries. Reading the means of production as well as the creative works they produce, Emerson demonstrates that technologies are more than mere tools and that the interface is not a neutral border between writer and machine but is in fact a collaborative creative space. *Reading Writing Interfaces* begins with digital literature's defiance of the alleged invisibility of ubiquitous computing and multitouch in the early twenty-first century and then looks back at the ideology of the user-friendly graphical user interface that emerged along with the Apple Macintosh computer of the 1980s. She considers poetic experiments with and against the strictures of the typewriter in the 1960s and 1970s and takes a fresh look at Emily Dickinson's self-printing projects as a challenge to the coherence of the book. Through archival research, Emerson offers examples of how literary engagements with screen-based and print-based technologies have transformed reading and writing. She reveals the ways in which writers—from Emily Dickinson to Jason Nelson and Judd Morrissey—work with and against media interfaces to undermine the assumed transparency of conventional literary practice.

jonathan safran foer ebook: *Digital Audiobooks* Iben Have, Birgitte Stougaard Pedersen, 2015-08-11 Audiobooks are rapidly gaining popularity with widely accessible digital downloading and streaming services. This book engages with the digital form of audiobooks, framing audiobook listening as both a remediation of literature and an everyday activity that creates new reading

experiences that can be compared to listening to music or the radio. Have and Stougaard Pedersen challenge the historical notion that audiobook listening is a compensatory activity or a second-rate reading experience, while seeking to establish a dialogue between sound studies and media studies, comparative literature, aesthetics, and sociology.

jonathan safran foer ebook: Book Presence in a Digital Age Kiene Brillenburg Wurth, Kári Driscoll, Jessica Pressman, 2018-06-28 Contrary to the apocalyptic pronouncements of paper media's imminent demise in the digital age, there has been a veritable surge of creative reimaginings of books as bearers of the literary. From typographic experiments (Mark Z. Danielewski's *House of Leaves*, Steven Hall's *The Raw Shark Texts*) to accordion books (Anne Carson's *Nox*), from cut ups (Jonathan Safran Foer's *Tree of Codes*) to collages (Graham Rawle's *Woman's World*), from erasures (Mary Ruefle's *A Little White Shadow*) to mixups (Simon Morris's *The Interpretations of Dreams*), print literature has gone through anything but a slow, inevitable death. In fact, it has re-invented itself materially. Starting from this idea of media plurality, *Book Presence in a Digital Age* explores the resilience of print literatures, book art, and zines in the late age of print from a contemporary perspective, while incorporating longer-term views on media archeology and media change. Even as it focuses on the materiality of books and literary writing in the present, *Book Presence* also takes into consideration earlier 20th-century moments of media transition, developing the concepts of presence and materiality as analytical tools to perform literary criticism in a digital age. Bringing together leading scholars, artists, and publishers, *Book Presence in a Digital Age* offers a variety of perspectives on the past, present, and future of the book as medium, the complex relationship of materiality to virtuality, and of the analog to the digital.

jonathan safran foer ebook: Digital Worldbuilding and Ecological Readiness Cynthia Porter Rosenfeld, 2023-11-02 This book addresses how people in digital communities during the Anthropocene can become ecologically ready participants who are willing to build a flourishing relationship with the environment through a lens of community and care. The community-care paradigm is theorized as a way of understanding and living in the more-than-human world that is based on a relational ontology, situated knowledges, and ethics of care that takes individuals-in-communities as its basic unit of consideration. The author draws together disparate lines of inquiry—including ancient and contemporary rhetoric, media studies, ethical philosophy, and animal studies—to highlight how the digital discourses occurring in the Anthropocene can help illuminate the partial, processual, active, and rhetorical nature of flourishing of our bodies, our selves, and our environment. Each chapter of the book contributes to theorizing and illuminating how digital rhetorics can provide individuals with ecological readiness, the ability to craft more-than-human worlds of contingent wellbeing, and vulnerable flourishing

jonathan safran foer ebook: The Digital Reading Condition Maria Engberg, Iben Have, Birgitte Stougaard Pedersen, 2022-12-30 This volume offers a critical overview of digital reading practices and scholarly efforts to analyze and understand reading in the mediatized landscape. Building on research about digital reading, born-digital literature, and digital audiobooks, *The Digital Reading Condition* explores reading as part of a broader cultural shift encompassing many forms of media and genres. Bringing together research from media and literary studies, digital humanities, scholarship on reading and learning, as well as sensory studies and research on multimodal and multisensory media reception, the authors address and challenge print-biased conceptions of reading that are still prevalent in research, whether the reading medium is print or digital. They argue that the act of reading itself is changing, and rather than rejecting digital media as unsuitable for sustained or focused reading practices, they argue that the complex media landscape challenges us to rethink how to define reading as a mediated practice. Presenting a truly interdisciplinary perspective on digital reading practices, this volume will appeal to scholars and graduate students in communication, media studies, new media and technology, literature, digital humanities, literacy studies, composition, and rhetoric.

jonathan safran foer ebook: Comparative Textual Media N. Katherine Hayles, Jessica Pressman, 2013-12-01 For the past few hundred years, Western cultures have relied on print. When

writing was accomplished by a quill pen, inkpot, and paper, it was easy to imagine that writing was nothing more than a means by which writers could transfer their thoughts to readers. The proliferation of technical media in the latter half of the twentieth century has revealed that the relationship between writer and reader is not so simple. From telegraphs and typewriters to wire recorders and a sweeping array of digital computing devices, the complexities of communications technology have made mediality a central concern of the twenty-first century. Despite the attention given to the development of the media landscape, relatively little is being done in our academic institutions to adjust. In *Comparative Textual Media*, editors N. Katherine Hayles and Jessica Pressman bring together an impressive range of essays from leading scholars to address the issue, among them Matthew Kirschenbaum on archiving in the digital era, Patricia Crain on the connection between a child's formation of self and the possession of a book, and Mark Marino exploring how to read a digital text not for content but for traces of its underlying code. Primarily arguing for seeing print as a medium along with the scroll, electronic literature, and computer games, this volume examines the potential transformations if academic departments embraced a media framework. Ultimately, *Comparative Textual Media* offers new insights that allow us to understand more deeply the implications of the choices we, and our institutions, are making. jonathan safran foer ebook: The Content Machine Michael Bhaskar, 2013-10-01 This ground-breaking study, the first of its kind, outlines a theory of publishing that allows publishing houses to focus on their core competencies in times of crisis. Tracing the history of publishing from the press works of fifteenth-century Germany to twenty-first-century Silicon Valley, via Venice, Beijing, Paris and London, and fusing media theory and business experience, 'The Content Machine' offers a new understanding of content, publishing and technology, and defiantly answers those who contend that publishing has no future in a digital age.
