into the wild pdf: Das Potenzial von Wildnis in der Schweiz Sebastian Moos, Sarah Radford, Aline von Atzigen, Nicole Bauer, Josef Senn, Felix Kienast, Maren Kern, Katharina Conradin, 2022-06-15 In einer stark vom Menschen geprägten Natur kommt Wildnis eine besondere Bedeutung zu. Auch in der Schweiz ist der Druck auf Wildnis gross: Insbesondere Infrastruktur für Tourismus und Energiegewinnung gefährdet die letzten unberührten Gebiete. Gleichzeitig entwickeln sich aufgrund der Landnutzungsaufgabe gewisse Täler hin Richtung Wildnis. Vor diesem Hintergrund zeigt die vorliegende Studie auf, wo sich in der Schweiz Flächen mit hoher Wildnisqualität befinden. Zudem untersucht sie Argumente für und gegen Wildnis bei der lokalen Bevölkerung und kantonalen Fachpersonen. Die Studie zeigt, dass rund 17 Prozent der Schweizer Landesfläche eine hohe Wildnisqualität bewahrt haben, weil sie naturnah, abgelegen, kaum erschlossen und wenig genutzt sind sowie meist in steilem Gelände liegen. Es wird auch deutlich, dass die lokale Bevölkerung oft keinen Widerspruch zwischen Wildnis und freier Naturentwicklung sowie der Nutzung natürlicher Ressourcen sieht. Wildnis hat vor allem dort eine Chance, wo sich landschaftsökologisches und gesellschaftliches Potenzial decken.

into the wild pdf: Wildcheck - Assessing the risks and opportunities of trade in wild plant ingredients Schindler, C., Heral, E., Drinkwater, E., Timoshyna, A., Muir, G., Walter, S., Leaman, D.J., Schippmann, U., 2022-04-22 Thousands of consumer products around the world contain ingredients obtained from wild plants. Wild harvest accounts for some or all the harvest of the great majority of plant species in trade (between 60-90 percent). Wild-harvested plants often come from the most biodiverse ecosystems on earth and many have been used traditionally or by local communities for generations. While these products have global markets and provide critical sources of income, they can also have deep ties to particular cultures and places. Demand for wild plant ingredients is growing rapidly, having grown by over 75 percent in value over the past two decades. Thousands of harvested species are at risk mainly from a combination of overharvest and habitat loss: of the 21 percent of medicinal and aromatic plant species whose threat status has been assessed, 9 percent are considered threatened with extinction. Despite their ubiquity, importance, and the threats facing them, wild plant ingredients are often obscured from consumers and escape companies' due diligence due to a lack of awareness and traceability. Best practice standards exist but have yet to capture a significant portion of the market. This report aims to address these challenges by making information on a selection of 'flagship' wild plant ingredients, the Wild Dozen, readily available and easy to understand. By offering this information without obligation to a specific prescription for follow-up action (e.g. through certification or policy change), it is hoped that a wide range of users will access the report as a first step towards responsible sourcing. Along with a broader update on the state of wild plants trade, the report provides a 'profile' on each of the Wild Dozen species, summarising key facts on production and trade. Each profile contains a traffic-light

risk rating on biological and social factors, along with an overview of opportunities for responsible sourcing. The information is aimed at industry, consumers, policy-makers, investors, and practitioners, concluding with a summary of what these various stakeholders can do to contribute to a sectoral shift towards responsible sourcing of wild plant ingredients.

Während die Überwachung über hauptsächlich verdachts- und risikoorientierte Untersuchungen die Einhaltung rechtlicher Vorschriften kontrolliert, ist das Monitoring ein System wiederholter repräsentativer Messungen und Bewertungen von Gehalten an bestimmten unerwünschten Stoffen in den auf dem deutschen Markt befindlichen Erzeugnissen. Dadurch können mögliche gesundheitliche Risiken für die Verbraucher frühzeitig erkannt und durch gezielte Maßnahmen abgestellt werden. Neben Lebensmitteln sind auch kosmetische Mittel und Bedarfsgegenstände Gegenstand des Monitorings. Das Monitoring von Lebensmitteln wird dabei zweigeteilt durchgeführt: Zum einen werden jährlich zahlreiche Lebensmittel eines definierten Warenkorbes untersucht, zum anderen werden dazu ergänzend aktuelle stoff- bzw. lebensmittelbezogene Fragestellungen in Form von Projekten bearbeitet.

into the wild pdf: *Eels Biology, Monitoring, Management, Culture and Exploitation: Proceedings of the First International Eel Science Symposium* Andy Don, Paul Coulson, 2019-10-31 The freshwater eels, the Anguillids, have increasingly become the focus of attention for fisheries managers, scientists, researchers, policy makers, conservation bodies and other stakeholders. These species can be seen as a bellwether for issues affecting aquatic ecosystems – their steep decline and the management initiatives to try and reverse this trend, touch on subjects as diverse as disconnected waterways, loss of habitat, novel parasites, pollution, over-fishing and climate change. There are some 16 species of the *Anguilla* genus and all exhibit similar lifestyles, growing in waters often far-removed from their marine spawning grounds. These enigmatic, contradictory and confounding species share similar challenges and pressures wherever they are found. This book was generated from the 1st UK International Eel Science Symposium which was held at the Zoological Society of London (ZSL) in June 2017. Hosted by the Institute of Fisheries Management (IFM), the ZSL, and the Environment Agency (EA), the Symposium was heralded as a success, with over 180 delegates in attendance. Many of the world's top eel specialists attended or gave presentations across a diverse range of subjects. This was one of the Symposium's, and now the book's great strengths – its diversity of subjects and authors. Many countries are represented within the book, from across Europe and as far afield as New Zealand, South Africa, Vanuatu, French Polynesia, Japan, Canada and the USA. The EA and IFM have collaborated to produce this landmark book which includes a mix of cultural, scientific and management information which will be invaluable to anyone with a professional or personal interest in these mysterious fish, including ichthyologists, fisheries scientists and managers, aquaculture personnel, environmental biologists and ecologists, marine and freshwater biologists, vertebrate zoologists, animal behaviourists and students studying in all these areas. Libraries in all universities and research establishments where these subjects are studied and taught should have copies on their shelves. 5m Books

into the wild pdf: *Wilderness Protection in Europe* Kees Bastmeijer, 2016-04-01 Europe still retains large areas which play host to numerous native and free-functioning ecosystems and lack roads, buildings, bridges, cables and other permanent manifestations of modern society. In the past such areas were considered wastelands, whose value lay only in their potential for cultivation and economic exploitation. Today, these wilderness areas are increasingly cherished as places for rest and recreation, and as important areas for scientific research, biodiversity conservation and the mitigation of and adaptation to certain climate change effects. This book provides the first major appraisal of the role of international, European and domestic law in protecting the remaining wilderness areas and their distinguishing qualities in Europe. It also highlights the lessons that can be learned from the various international, regional and national approaches, identifies obstacles to wilderness protection in Europe and considers whether and how the legal protection of wilderness can be further advanced.

into the wild pdf: *Rethinking Wilderness and the Wild* Robyn Bartel, Marty Branagan, Fiona Utley, Stephen Harris, 2020-10-29 *Rethinking Wilderness and the Wild: Conflict, Conservation and Co-existence* examines the complexities surrounding the concept of wilderness. Contemporary wilderness scholarship has tended to fall into two categories: the so-called 'fortress conservation' and 'co-existence' schools of thought. This book, contending that this polarisation has led to a silencing and concealment of alternative perspectives and lines of enquiry, extends beyond these confines and in particular steers away from the dilemmas of paradise or paradox in order to advance an intellectual and policy agenda of plurality and diversity rather than of prescription and definition. Drawing on case studies from Australia, Aotearoa/New Zealand, the United States and Iceland, and explorations of embodied experience, creative practice, philosophy, and First Nations land management approaches, the assembled chapters examine wilderness ideals, conflicts and human-nature dualities afresh, and examine co-existence and conservation in the Anthropocene in diverse ontological and multidisciplinary ways. By demonstrating a strong commitment to respecting the knowledge and perspectives of Indigenous peoples, this work delivers a more nuanced, ethical and decolonising approach to issues arising from relationships with wilderness. Such a collection is immediately appropriate given the political challenges and social complexities of our time, and the mounting threats to life across the globe. The abiding and uniting logic of the book is to offer a unique and innovative contribution to engender transformations of wilderness scholarship, activism and conservation policy. This text refutes the inherent privileging and exclusionary tactics of dominant modes of enquiry that too often serve to silence non-human and contrary positions. It reveals a multi-faceted and contingent wilderness alive with agency, diversity and possibility. This book will be of great interest to students and scholars of conservation, environmental and natural resource management, Indigenous studies and environmental policy and planning. It will also be of interest to practitioners, policymakers and NGOs involved in conservation, protected environments and environmental governance.

into the wild pdf: *Salmon Wars* Catherine Collins, Douglas Frantz, 2022-07-12 A Pulitzer Prize-winning correspondent and a former private investigator dive deep into the murky waters of the international salmon farming industry, exposing the unappetizing truth about a fish that is not as good for you as you have been told. A decade ago, farmed Atlantic salmon replaced tuna as the most popular fish on North America's dinner tables. We are told salmon is healthy and environmentally friendly. The reality is disturbingly different. In *Salmon Wars*, investigative journalists Douglas Frantz and Catherine Collins bring readers to massive ocean feedlots where millions of salmon are crammed into parasite-plagued cages and fed a chemical-laced diet. The authors reveal the conditions inside hatcheries, where young salmon are treated like garbage, and at the farms that threaten our fragile coasts. They draw colorful portraits of characters, such as the big salmon farmer who poisoned his own backyard, the fly-fishing activist who risked everything to ban salmon farms in Puget Sound, and the American researcher driven out of Norway for raising the alarm about dangerous contaminants in the fish. Frantz and Collins document how the industrialization of Atlantic salmon threatens this keystone species, endangers our health and environment, and lines the pockets of our generation's version of Big Tobacco. And they show how it doesn't need to be this way. Just as Eric Schlosser's *Fast Food Nation* forced a reckoning with the Big Mac, the vivid stories, scientific research, and high-stakes finance at the heart of *Salmon Wars* will inspire readers to make choices that protect our health and our planet.

into the wild pdf: *Strengthening collaboration and coordination between biodiversity and chemicals and waste clusters* Harrison, Jerry, 2022-02-16 Available online: <https://pub.norden.org/temanord2022-513/> There is a great urgency to address biodiversity loss and chemicals and waste pollution. These global challenges are intertwined in many ways. Pollution is identified as one of the main drivers of biodiversity loss. Therefore, it is important to look at these challenges and solutions in a synergistic way in order to address them effectively. Efforts to date have mainly focused on cooperation and synergies within the same thematic cluster. This review looks at the opportunities that may exist for working across thematic clusters, specifically focusing

on strengthening collaboration and coordination between biodiversity and chemicals and waste clusters. The review provides options for action that can help implementation in particular at the national level, but also at the regional and global levels through enhancement of collaboration between biodiversity and chemicals and waste clusters.

into the wild pdf: Is CITES Protecting Wildlife? Tanya Wyatt, 2021-06-16 This book assesses the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES), examining both implementation and compliance. Humans are causing a biodiversity crisis, where 1 million species are facing extinction. Species are dying, in no small part, because they are overexploited, poached and trafficked and CITES is the main international instrument designed to protect traded wildlife. Does the state of the world's species mean CITES is failing? This book explores the implementation of and compliance with CITES by all 183 member countries. It is imperative we know the nature and extent of the implementation of and compliance with CITES legislation in all parties to fully understand the impact of legal and illegal trade on species survival. Through extensive legislative content analysis, a Delphi iterative survey, and semi-structured interviews, this is the first book to share empirical research about CITES implementation and compliance. This book contains a comprehensive analysis of the state of CITES, what is done well, what could be done better, and what the future might bring to try to curtail the slide of the world's wildlife into extinction. By identifying lessons learned in relation to CITES legislation, implementation and compliance this book provides hard evidence to member countries as to how their own practice can be improved. This timely book will be essential reading for students and academics interested in wildlife law, trade and trafficking, green criminology and biodiversity conservation more broadly. It will also be of interest to professionals working in wildlife law enforcement.
