**john d rockefeller personal letters:** *Writing the Big Book* William H. Schaberg, 2019-09-24  
The definitive history of writing and producing the Big Book of Alcoholics Anonymous, told through extensive access to the group's archives. Alcoholics Anonymous is arguably the most significant self-help book published in the twentieth century. Released in 1939, the "Big Book," as it's commonly known, has sold an estimated 37 million copies, been translated into seventy languages, and spawned numerous recovery communities around the world while remaining a vibrant plan for recovery from addiction in all its forms for millions of people. While there are many books about A.A. history, most rely on anecdotal stories told well after the fact by Bill Wilson and other early members—accounts that have proved to be woefully inaccurate at times. *Writing the Big Book* brings exhaustive research, academic discipline, and informed insight to the subject not seen since Ernest Kurtz's *Not-God*, published forty years ago. Focusing primarily on the eighteen months from October 1937, when a book was first proposed, and April 1939 when Alcoholics Anonymous was published, Schaberg's history is based on eleven years of research into the wealth of 1930s documents currently preserved in several A.A. archives. Woven together into an exciting narrative, these real-time documents tell an almost week-by-week story of how the book was created, providing more than a few unexpected turns and surprising departures from the hallowed stories that have been so widely circulated about early A.A. history. Fast-paced, engaging, and contrary, *Writing the Big Book* presents a vivid picture of how early A.A. operated and grew and reveals many previously unreported details about the colorful cast of characters who were responsible for making that group so successful.

**john d rockefeller personal letters: Absolutely Not New York** Charlene Mires, 2014-09-01 From 1944 to 1946, as the world pivoted from the Second World War to an unsteady peace, the newly-created United Nations needed a meeting place, a central place for global diplomacy. But what would it look like, and where would it be? At times it seemed the world's diplomats could agree on only one thing: under no circumstances did they want the United Nations to be based in New York. And for its part, New York worked mightily just to stay in the race it would eventually win. In vivid detail, Charlene Mires traces New York's long and often complicated journey to host the United Nations.

Edgar Hoover** Athan Theoharis, 1993-02-01 Documents from the late FBI director's secret files reveal for the first time the shocking extent of FBI activities in spying on prominent Americans and political groups. A grimly fascinating-and profoundly disturbing-self-exposure by one of the false American deities of the 20th century. -Arthur M. Schlesinger, Jr.

**john d rockefeller personal letters: The Corporate Rich and the Power Elite in the Twentieth Century** G. William Domhoff, 2019-06-21 The Corporate Rich and the Power Elite in the Twentieth Century demonstrates exactly how the corporate rich developed and implemented the policies and created the government structures that allowed them to dominate the United States. The book is framed within three historical developments that have made this domination possible: the rise and fall of the union movement, the initiation and subsequent limitation of government social-benefit programs, and the postwar expansion of international trade. The book's deep exploration into the various methods the corporate rich used to centralize power corrects major empirical misunderstandings concerning all three issue-areas. Further, it explains why the three ascendant theories of power in the early twenty-first century—interest-group pluralism, organizational state theory, and historical institutionalism—cannot account for the complexity of events that established the power elite's supremacy and led to labor's fall. More generally, and convincingly, the analysis reveals how a corporate-financed policy-planning network, consisting of foundations, think tanks, and policy-discussion groups, gradually developed in the twentieth century and played a pivotal role in all three issue-areas. Filled with new archival findings and commanding detail, this book offers readers a remarkable look into the nature of power in America during the twentieth century, and provides a starting point for future in-depth analyses of corporate power in the current century.

**john d rockefeller personal letters: Capital of the World** Charlene Mires, 2013-03-04 A fascinating account of the enthusiastic effort to establish a home for the fledgling United Nations at the end of World War II. Mires creates a powerful sense of suspense as she describes the intense competition among boosters from New York, Boston, Philadelphia, and even the Black Hills of South Dakota. In lively and elegant prose, from the first sentence to the last, she captures the contradictory visions of the 'Capital of the World' that persisted from beginning to end. —Allan M. Winkler, Distinguished Professor of History, Miami University From 1944 to 1946, as the world pivoted from the Second World War to an unsteady peace, Americans in more than two hundred cities and towns mobilized to chase an implausible dream. The newly-created United Nations needed a meeting place, a central place for global diplomacy—a Capital of the World. But what would it look like, and where would it be? Without invitation, civic boosters in every region of the United States leapt at the prospect of transforming their hometowns into the Capital of the World. The idea stirred in big cities—Chicago, San Francisco, St. Louis, New Orleans, Denver, and more. It fired imaginations in the Black Hills of South Dakota and in small towns from coast to coast. Meanwhile,

within the United Nations the search for a headquarters site became a debacle that threatened to undermine the organization in its earliest days. At times it seemed the world's diplomats could agree on only one thing: under no circumstances did they want the United Nations to be based in New York. And for its part, New York worked mightily just to stay in the race it would eventually win. With a sweeping view of the United States' place in the world at the end of World War II, *Capital of the World* tells the dramatic, surprising, and at times comic story of hometown promoters in pursuit of an extraordinary prize and the diplomats who struggled with the balance of power at a pivotal moment in history. Charlene Mires is Associate Professor of History at Rutgers University-Camden. She is the author of *Independence Hall in American Memory* and a co-recipient of a Pulitzer Prize in journalism.

**john d rockefeller personal letters: *Race and the Writing of History*** Maghan Keita, 2000-11-30 Despite increased interest in recent years in the role of race in Western culture, scholars have neglected much of the body of work produced in the nineteenth and twentieth centuries by black intellectuals. For example, while DuBois' thoughts about Africa may be familiar to contemporary academics, those of his important precursors and contemporaries are not widely known. Similarly, although contemporary figures such as Martin Bernal, Molefi Assante, and other Afrocentrists are the subject of heated debate, such debates are rarely illuminated by an awareness of the traditions that preceded them. *Race and The Writing of History* redresses this imbalance, using Bernal's *Black Athena* and its critics as an introduction to the historical inquiries of African-American intellectuals and many of their African counterparts. Keita examines the controversial legacy of writing history in America and offers a new perspective on the challenge of building new historiographies and epistemologies. As a result, this book sheds new light on how ideas about race and racism have shaped the stories we tell about ourselves.

**john d rockefeller personal letters: *J. C. Penney*** David Delbert Kruger, 2017-05-18 What is now called JCPenney, a fixture of suburban shopping malls, started out as a small-town Main Street store that fused its founder's interests in agriculture, retail business, religion, and philanthropy. This book—at once a biography of Missouri farm boy-turned-business icon James Cash Penney and the story of the company he started in 1902—brings to light the little-known agrarian roots of an American department store chain. David Delbert Kruger explores how the company, its stores, and their famous founder shaped rural America throughout the twentieth century. “Most of our stores,” Penney explained in 1931, “are located in agricultural regions where the tide of merchandising rises and falls with the prosperity of the farmers.” Despite the growth of cities in the early twentieth century, Penney maintained his stores' commitment to serving the needs of farmers and small-town folk. Tracing this dedication to Penney's rural upbringing, Kruger describes how, from one store in the sheep-ranching and mining town of Kemmerer, Wyoming, J. C. Penney Co. became a familiar chain on Main Street, USA, purveying value, providing good jobs, and marking rites of passage in many an American childhood. Kruger paints a biographical and historical picture of an American business mogul distinctly different from comparable capitalists such as Andrew Carnegie, Henry Ford, or Sam Walton. Despite his chain's corporate structure, Penney imbued each store with a Golden Rule philosophy that demanded mutual respect between customers, employees, competitors, suppliers, and communities. By tracing that spirit to its agrarian source, and following it through the twentieth century, *J. C. Penney: The Man, the Store, and American Agriculture* provides a new perspective on this American cultural institution—and on its founder's unique brand of American capitalism.

Translated into English for the first time from sixteen languages and introduced by scholarly essays, the texts in this volume offer a representative selection of the diverse responses to American art in Portugal, Italy, Spain, Greece, Yugoslavia, Romania, Bulgaria, Soviet Union (including the Baltic States), Czechoslovakia, Poland, Hungary, and East Germany (GDR). There was no single European discourse, as attitudes to American art were determined by a wide range of ideological, political, social, cultural and artistic positions that varied considerably across the European nations. This volume and its companion, *Hot Art, Cold War - Northern and Western European Writing on American Art 1945-1990*, offer the reader a unique opportunity to compare how European art writers introduced and explained contemporary American art to their many and varied audiences. Whilst many are fluent in one or two foreign languages, few are able to read all twenty-five languages represented in the two volumes. These ground-breaking publications significantly enrich the fields of American art studies and European art criticism.

**john d rockefeller personal letters:** *Diego Rivera* Leah Dickerman, Diego Rivera, Anna Indyck-López, Museum of Modern Art (New York, N.Y.), 2011 In 1931, Diego Rivera was the subject of The Museum of Modern Art's second monographic exhibition, which set attendance records in its five-week run. The Museum brought Rivera to New York six weeks before the opening and provided him a studio space in the building. There he produced five 'portable murals' - large blocks of frescoed plaster, slaked lime and wood that feature bold images drawn from Mexican subject matter and address themes of revolution and class inequity. After the opening, to great publicity, Rivera added three more murals, taking on New York subjects through monumental images of the urban working class. Published in conjunction with an exhibition that brings together key works from Rivera's 1931 show and related material, this vividly illustrated catalogue casts the artist as a highly cosmopolitan figure who moved between Russia, Mexico and the United States and examines the intersection of art-making and radical politics in the 1930s.
