Let's Speak Chickasaw Chikashshanompa' Kilanompoli' is both the first textbook of the Chickasaw language and its first complete grammar. A collaboration between Pamela Munro, a linguist with an intimate knowledge of Chickasaw, and Catherine Willmond, a native speaker, this book is designed for beginners as well as intermediate students. Twenty units cover pronunciation, word building, sentence structure, and usage. Each includes four to eight short lessons accompanied by exercises that introduce additional information about the language. Each unit also includes dialogues or readings that reflect language use by native speakers to increase students' understanding of how words and sentences are put together. Additional "Beyond the Grammar" sections offer insight into the history of the language and fine points of usage. Extensive Chickasaw-English and English-Chickasaw vocabularies are included. The text is written in a conversational style and defines terms in everyday language to help students master grammatical concepts. The authors developed the spelling system they use here based on earlier orthographies for Chickasaw and Choctaw. An accompanying CD provides examples of spoken Chickasaw that convey fine points of pronunciation. Classroom-tested for more than fourteen years, Let's Speak Chickasaw is the only complete and linguistically sound analysis of Chickasaw, treating it as a living language rather than as a cultural artifact. It is a vital resource for scholars of American Indian linguistics and a rich repository of the language and culture of the Chickasaw people.

letrs unit 5 quiz answers: Let's Talk Therese Huston, 2021-01-26 A game-changing model for giving effective feedback to peers, employees, or even your boss--without offending or demotivating. How are you supposed to tell someone that they're not meeting expectations without crushing their spirit? Regular feedback, when delivered skillfully, can turn average performers into the hardest workers and stars into superstars. Yet many see it as an awkward chore: Recent studies have revealed 37% of managers dread giving feedback, and 65% of employees wish their managers gave more feedback. This trail-blazing new model eliminates the guesswork. Dr. Therese Huston, the founding director of the Center for Excellence in Teaching and Learning at Seattle University, discovered that the key to being listened to is to listen. First, find out what kind of feedback an employee wants most: appreciation, coaching, or evaluation. If they crave one, they'll be more receptive once their need has been satisfied. Then Huston lays out counterintuitive strategies for delivering each type of feedback successfully, including: Start by saying your good intentions out loud: it may feel unnecessary, but it makes all the difference. Side with the person, not the problem: a bad habit or behavior is probably less entrenched than you think. Give reports a chance to correct inaccurate feedback: they want an opportunity to talk more than they want you to be a good talker. This handbook will make a once-stressful ordeal feel natural, and, by greasing the wheels of regular feedback conversations, help managers improve performance, trust, and mutual understanding.
