long island ideal community: The Death and Life of Main Street Miles Orvell, 2012-10-01 For more than a century, the term Main Street has conjured up nostalgic images of American small-town life. Representations exist all around us, from fiction and film to the architecture of shopping malls and Disneyland. All the while, the nation has become increasingly diverse, exposing tensions within this ideal. In The Death and Life of Main Street, Miles Orvell wrestles with the mythic allure of the small town in all its forms, illustrating how Americans continue to reinscribe these images on real places in order to forge consensus about inclusion and civic identity, especially in times of crisis. Orvell underscores the fact that Main Street was never what it seemed; it has always been much more complex than it appears, as he shows in his discussions of figures like Sinclair Lewis, Willa Cather, Frank Capra, Thornton Wilder, Margaret Bourke-White, and Walker Evans. He argues that translating the overly tidy cultural metaphor into real spaces--as has been done in recent decades, especially in the new urbanist planned communities of Elizabeth Plater-Zyberk and Andres Duany--actually diminishes the communitarian ideals at the center of this nostalgic construct. Orvell investigates the way these tensions play out in a variety of cultural realms and explores the rise of literary and artistic traditions that deliberately challenge the tropes and assumptions of small-town ideology and life.

long island ideal community: Perfect Communities Edward Berenson, 2025-04-22 The rise and fall of William J. Levitt, the man who made the suburban house a mass commodity Two material artifacts defined the middle-class American lifestyle in the mid-twentieth century: the automobile, which brought gas stations, highways, commercial strips, and sprawl; and the single-family suburban home, the repository of many families' long-term wealth. While the man who did the most to make the automobile a mass commodity—Henry Ford—is well known, few know the story of the man who did the same for the suburban house. Edward Berenson describes the remarkable career of William Levitt, who did more than anyone else to create the modern suburb. In response to an unprecedented housing shortage as veterans returned home from World War II, his Levittown developments provided inexpensive mass-produced housing that was wildly popular—prospective buyers would camp out in line for two days for the chance to put down a deposit on a Levitt house. He was a celebrity, a life-changing hero to tens of thousands, and the pitchman of a renewed American Dream. But Levitt also shared Ford's dark side. He refused to allow Black people to buy or rent in his developments and doggedly defended this practice against legal challenges. Leading the way for other developers who emulated his actions, he helped ensure that suburbs nationwide remained white enclaves. These legacies are still with us. Levitt made a major contribution to the stubborn wealth disparity between white families and Black families, and his solution to the housing crisis of the 1940s—the detached house and surrounding yard—is a primary cause of the housing crisis today. As a person, Levitt was a strangely guileless and tragic figure. He accumulated vast wealth but, after losing control of his building company, surrendered it all through foolish investments and a lavish lifestyle that included a Long Island mansion and a two-hundred-foot yacht. Just weeks before his death, as a charity patient in a hospital to which he had once given millions, he was still imagining his great comeback.

long island ideal community: *Planning and LGBTQ Communities* Petra L. Doan, 2015-03-24
Although the last decade has seen steady progress towards wider acceptance of lesbian, gay, bisexual, transgendered, and queer (LGBTQ) individuals, LGBTQ residential and commercial areas have come under increasing pressure from gentrification and redevelopment initiatives. As a result many of these neighborhoods are losing their special character as safe havens for sexual and gender minorities. Urban planners and municipal officials have sometimes ignored the transformation of these neighborhoods and at other times been complicit in these changes. *Planning and LGBTQ Communities* brings together experienced planners, administrators, and researchers in the fields of planning and geography to reflect on the evolution of urban neighborhoods in which LGBTQ populations live, work, and play. The authors examine a variety of LGBTQ residential and commercial areas to highlight policy and planning links to the development of these neighborhoods. Each chapter explores a particular urban context and asks how the field of planning has enabled, facilitated, and/or neglected the specialized and diverse needs of the LGBTQ population. A central theme of this book is that urban planners need to think beyond queer space because LGBTQ populations are more diverse and dispersed than the white gay male populations that created many of the most visible gayborhoods. The authors provide practical guidance for cities and citizens seeking to strengthen neighborhoods that have an explicit LGBTQ focus as well as other areas that are LGBTQ-friendly. They also encourage broader awareness of the needs of this marginalized population and the need to establish more formal linkages between municipal government and a range of LGBTQ groups. *Planning and LGBTQ Communities* also adds useful material for graduate level courses in planning theory, urban and regional theory, planning for multicultural cities, urban geography, and geographies of gender and sexuality.

long island ideal community: *Expanding the American Dream* Barbara M. Kelly, 1993-02-02
Much has been written about the housing policies of the Depression and the Postwar period. Much less has been written of the houses built as a result of these policies, or the lives of the families who lived in them. Using the houses of Levittown, Long Island, as cultural artifacts, this book examines the relationship between the government-sponsored, mass-produced housing built after World War II, the families who lived in it, and the society that fostered it. Beginning with the basic four-room, slab-based Cape Cods and Ranches, Levittown homeowners invested time and effort, barter and money in the expansion and redesign of their houses. The author shows how this gradual process has altered the socioeconomic nature of the community as well, bringing Levittown fully into the mainstream of middle-class America. This book works on several levels. For planners, it offers a reassessment of the housing policies of the 1940s and '50s, suggesting that important lessons remain to be learned from the Levittown experience. For historians, it offers new insights into the nature of the suburbanization process that followed World War II. And for those who wish to understand the subtle workings of their own domestic space within their lives, it offers food for speculation.

long island ideal community: *Stony Brook* , 2003 Stony Brook is remarkable for the abundance of eighteenth- and nineteenth-century buildings still in use. Much of the old hamlet remains in the streets leading up to and out of its center; few twentieth-century structures interrupt the progression of homes of the farmers, craftsmen, and seamen who were the backbone of the community. The center itself dates from 1940 and is an interpretation of Federal architecture. Using photographs, documents, and oral histories from the archives of the Three Village Historical Society

and from generous residents, Stony Brook reveals the old center, portrays buildings that no longer exist, and follows other structures to their new location. The book also shows many familiar buildings in much earlier but still recognizable form, revisits aspects of village life prior to World War II, and documents the transformations of 1940 to 1946.

long island ideal community: Valor and Vulnerability Robert C. Dykstra, Ryan LaMothe, 2025-04-10 Intimacy, vulnerability, precarity, resiliency, and loss are ingredients of any life, though they take on particular shape and tone when we listen to the experiences of boys and men. The voices and stories of men and boys are invitations for pastoral ministers and theologians to understand and respond to their joys, struggles, and sorrows, as well as to recognize and affirm their courage and strengths. In this book, thirteen scholars in pastoral theology from diverse backgrounds and perspectives collaborate in engaging art, literature, the social sciences, and cultural artifacts to explore the intersection of masculinity and religious life in rich and varied forms. Their aim, in part, is not only to deepen and appreciate wide-ranging experiences of boys and men but also to attend and respond to systemic realities that contribute to or undermine their flourishing.

long island ideal community: Aldous Huxley and Utopia Jerome Meckier, 2022-11-30 Within the cycle that runs from Erewhon to Island, British literary utopias compete with one another to form the most persuasive picture of what the future might, or should, be like. At issue for Butler, Wells, Zamyatin, Orwell and others is whether utopia, be it positive or negative, is essentially prediction or hypothesis. Huxley contributed to this debate at roughly fifteen-year intervals, his three utopias becoming its key texts. In addition, Aldous Huxley and Utopia examines ironic cure scenes, the obsession with golf in the brave new world, attitudes towards death in Brave New World and Island, problems with names and history in the former, the role of islands in both, the detrimental impact of Madame Blavatsky and young Krishnamurti on the story of Pala, and the significance of a zoological conclusion of Island.

long island ideal community: Fresh Meadows Fred Cantor, Debra L. Davidson, 2011 Located in northeast Queens, Fresh Meadows grew up around a housing development of the same name, built for World War II veterans. The site plan for the development not only provided an array of green open space, but it also enabled residents to enjoy a variety of services within walking distance. The development became the centerpiece of a brand-new neighborhood, which had been the site of a country club and farmland. In 1949, renowned urban and architecture critic Lewis Mumford hailed the Fresh Meadows housing development as perhaps the most positive and exhilarating example of large-scale community planning in this country. Fresh Meadows captures the optimism of the postwar era by illustrating how middle-class families thrived in an environment that combined the best aspects of urban and suburban living.
