maternal bonding literature free: Contemporary Chicana Literature: (Re)Writing the Maternal Script Cristina Herrera, 2014-03-28 Despite the growing literary scholarship on Chicana writers, few, if any, studies have exhaustively explored themes of motherhood, maternity, and mother-daughter relationships in their novels. When discussions of motherhood and mother-daughter relationships do occur in literary scholarship, they tend to mostly be a backdrop to a larger conversation on themes such as identity, space, and sexuality, for example. Mother-daughter relationships have been ignored in much literary criticism, but this book reveals that maternal relationships are crucial to the study of Chicana literature; more precisely, examining maternal relationships provides insight to Chicana writers' rejection of intersecting power structures that otherwise silence Chicanas and women of color. This book advances the field of Chicana literary scholarship through a discussion of Chicana writers' efforts to re-write the script of maternity outside of existing discourses that situate Chicana mothers as silent and passive and the subsequent mother-daughter relationship as a source of tension and angst. Chicana writers are actively engaged in the process of re-writing motherhood that resists the image of the static, disempowered Chicana mother; on the other hand, these same writers engage in broad representations of Chicana mother-daughter relationships that are not merely a source of conflict but also a means in which both mothers and daughters may achieve subjectivity. While some of the texts studied do present often conflicted relationships between mothers and their daughters, the novels do not comfortably accept this script as the rule; rather, the writers included in this study are highly invested in re-writing Chicana motherhood as a source of empowerment even as their works present strained maternal relationships. Chicana writers have challenged the pervasiveness of the problematic virgin/whore binary which has been the motif on which Chicana womanhood/motherhood has been defined, and they resist the construction of maternity on such narrow terms. Many of the novels included in this study actively foreground a conscious resistance to the limiting binaries of

motherhood symbolized in the virgin/whore split. The writers critically call for a rethinking of motherhood beyond this scope as a means to explore the empowering possibilities of maternal relationships. This book is an important contribution to the fields of Chicana/Latina and American literary scholarship.

maternal bonding literature free: *Inventing Maternity* Susan C. Greenfield, Carol Barash, 2021-10-21 Not until the eighteenth century was the image of the tender, full-time mother invented. This image retains its power today. *Inventing Maternity* demonstrates that, despite its association with an increasingly standardized set of values, motherhood remained contested terrain. Drawing on feminist, cultural, and postcolonial theory, *Inventing Maternity* surveys a wide range of sources—medical texts, political tracts, religious doctrine, poems, novels, slave narratives, conduct books, and cookbooks. The first half of the volume, covering the mid-seventeenth to the late eighteenth centuries, considers central debates about fetal development, pregnancy, breastfeeding, and childbearing. The second half, covering the late eighteenth to the mid-nineteenth centuries, charts a historical shift to the regulation of reproduction as maternity is increasingly associated with infanticide, population control, poverty, and colonial, national, and racial instability. In her introduction, Greenfield provides a historical overview of early modern interpretations of maternity. She concludes with a consideration of their impact on current debates about reproductive rights and technologies, child custody, and the cycles of poverty.

maternal bonding literature free: Maternal Sensitivity Klaus Grossman, Inge Bretherton, Everett Waters, Karin Grossman, 2016-04-14 Mary Ainsworth's work on the importance maternal sensitivity for the development of infant attachment security is widely recognized as one of the most revolutionary and influential contributions to developmental psychology in the 20th century. Her longitudinal studies of naturalistic mother-infant interactions in Uganda and Baltimore played a pivotal role in the formulation and acceptance of attachment theory as a new paradigm with implications for developmental, personality, social, and clinical psychology. The chapters in this volume collectively reveal not only the origins and depth of her conceptualizations and the originality of her assessment methods, but also the many different ways in which her ideas about maternal sensitivity continue to inspire innovative research and clinical applications in Western and non-Western cultures. The contributors are leading attachment researchers, including some of Mary Ainsworth's most influential students and colleagues, who have taken time to step back from their day to day research and reflect on the significance of the work she initiated and the challenges inherent in assessing parental sensitivity during naturalistic interactions in infancy and beyond. This volume makes Ainsworth's pioneering conceptual and methodological breakthroughs and their continuing research and clinical impact accessible to theorists, researchers and mental health specialists. This book was originally published as a special issue of Attachment & Human Development.

maternal bonding literature free: Conventional and Original Metaphors in French Autobiography Madalina Akli, 2009 This book studies three autobiographies, each of which is at least partially devoid of chronological structure: Sartre's *The Words*, Perec's *W* or *The Memory of Childhood*, and Sarraute's *Childhood*. Calendar-based order, traditionally associated with autobiography, fails to provide the coherence the readers expect. Hence, readers must create a sense of coherence at another level by using their conceptual resources. *Conventional and Original Metaphors in French Autobiography* reveals that in these literary texts coherence is maintained based on the exploitation of conventional metaphors taken from everyday language, which the autobiographers transform in a creative yet familiar manner. These common metaphors offer guidance to readers and establish coherence between the shared life experiences of reader and autobiographer. In the course of reading, the autobiographers' and the readers' life experiences overlap through familiar metaphors, which serve as organizational devices in writing and as guiding principles in reading.
