In ihm klärt der Autor, welche Folgen der Terrorismus auf die Wirtschaft eines Landes haben kann. Zudem beziehe ich mich auf die These des Autors, dass Angriffe von Terroristen auf die Wirtschaft Demokratien zerstören können und nehme Stellung zu diesem Sachverhalt. Zum Abschluss der Arbeit vergleiche ich den „traditionellen“ Terrorismus, wie ihn zum Beispiel die RAF ausgeführt hat, mit dem „modernen“ Terrorismus in der heutigen Zeit, wie sie z.B. von modernen Terrorzellen, wie ihn zum Beispiel die Al Quaida anwendet und beziehe die Bedeutung derer auf den Zusammenhang mit dem Essay.

logic games online: Shaping the Network Society Douglas Schuler, Peter Day, 2003-01-01 How computer professionals and communities can work together to shape sociotechnical systems that will meet society's challenges. Information and computer technologies are used every day by real people with real needs. The authors contributing to *Shaping the Network Society* describe how technology can be used effectively by communities, activists, and citizens to meet society's challenges. In their vision, computer professionals are concerned less with bits, bytes, and algorithms and more with productive partnerships that engage both researchers and community activists. These collaborations are producing important sociotechnical work that will affect the future of the network society. Traditionally, academic research on real-world users of technology has been neglected or even discouraged. The authors contributing to this book are working to fill this gap; their theoretical and practical discussions illustrate a new orientation—research that works with people in their natural social environments, uses common language rather than rarefied academic discourse, and takes a pragmatic perspective. The topics they consider are key to democratization and social change. They include human rights in the global billboard society; public computing in Toledo, Ohio; public digital culture in Amsterdam; civil networking in the former Yugoslavia; information technology and the international public sphere; historical archaeologies of community networks; technobiographical reflections on the future; libraries as information commons; and globalization and media democracy, as illustrated by Indymedia, a global collective of independent media organizations.
