maxwell kane novel free: The Problem of Free Will Mathew Iredale, 2014-10-14 Do we really have freedom to act, or are we slaves to our genes, environment or culture? Regular TPM columnist Mathew Iredale gets to grips with one of the most intractable issues in philosophy: the problem of free will. Iredale explores what it is about the free will problem that makes it so hard to resolve and argues that the only acceptable solution to the free will problem must be one that is consistent with what science tells us about the world. It is here, maintains Iredale, that too many works on free will, introductory or otherwise, fall down, by focusing only on how free will relates to determinism. Iredale shows that there are clear areas of scientific research which are directly and significantly relevant to free will in a way that does not involve determinism. Although these areas of scientific research do not allow us to solve the problem, they do allow us to separate the more plausible ideas concerning free will from the less plausible.

maxwell kane novel free: *Flicker* Theodore Roszak, 2005-04-01 From the golden age of art movies and underground cinema to X-rated porn, splatter films, and midnight movies, this breathtaking thriller is a tour de force of cinematic fact and fantasy, full of metaphysical mysteries that will haunt the dreams of every moviegoer. Jonathan Gates could not have anticipated that his student studies would lead him to uncover the secret history of the movies—a tale of intrigue, deception, and death that stretches back to the 14th century. But he succumbs to what will be a lifelong obsession with the mysterious Max Castle, a nearly forgotten genius of the silent screen who later became the greatest director of horror films, only to vanish in the 1940s, at the height of his talent. Now, 20 years later, as Jonathan seeks the truth behind Castle's disappearance, the innocent entertainments of his youth—the sexy sirens, the screwball comedies, the high romance—take on a sinister appearance. His tortured quest takes him from Hollywood's Poverty Row into the shadowy lore of ancient religious heresies. He encounters a cast of exotic characters, including Orson Welles and John Huston, who teach him that there's more to film than meets the eye, and journeys through the dark side of nostalgia, where the Three Stooges and Shirley Temple join company with an alien god whose purposes are anything but entertainment.

maxwell kane novel free: Ein Lasersystem für Experimente mit Quantengasen unter Schwerelosigkeit Max Schiemangk, 2020-11-25 Bereits Galilei untersuchte, ob verschiedene frei fallende Körper im Schwerfeld der Erde gleich stark beschleunigt werden. Diese sogenannte Universalität des freien Falls wurde seither immer präziser experimentell untersucht. Quantenmechanische Messmethoden, die auf Materiewelleninterferometrie beruhen, bieten einen neuen Ansatz, die Messgenauigkeit noch weiter zu verbessern. Im Rahmen dieser Arbeit wurde ein Lasersystem für ein neues Experiment entwickelt, das erstmals Zwei-Spezies-Atominterferometrie in Mikrogravitation demonstrieren soll. Dieses Lasersystem wurde so konzipiert und mechanisch designt, dass es die funktionalen Anforderungen erfüllt und auf dem Katapult des Bremer Fallturms eingesetzt werden kann - mit den folgenden Spezifikationen: Volumen < 44 l; Masse < 35 kg; sofort voll funktionsfähig nach Beschleunigungen von 30 g. Der in der Arbeit funktional sowie mechanisch qualifizierte Teil des Lasersystems wird inzwischen routinemäßig am Fallturm eingesetzt. Dafür wurden kompakte und robuste schmalbandige Diodenlasermodule entwickelt, die Ausgangsleistungen von bis zu 3,7 W auf einer Grundfläche der optischen Bank von nur 10 mm x 50 mm liefern. Am Arbeitspunkt von 1 W besitzen die Strahlquellen Linienbreiten im Bereich von 100 kHz (Lorentz) bzw. 1 MHz (-3 dB, 10 µs). Um die spektrale Stabilität der Lasermodule nachzuweisen, wurde ein spezielles Messverfahren zur Charakterisierung des Frequenzrauschens freilaufender Laser entwickelt. Diese Entwicklungen tragen entscheidend dazu bei, ein Zwei-Spezies-Atominterferometer in Mikrogravitation zu demonstrieren - und sind damit einer der wichtigen Schritte auf dem Weg zu einem Test der Universalität des freien Falls mit Quantengasen unter Schwerelosigkeit.

maxwell kane novel free: Poisonous Allison Brennan, 2016-04-12 Poisonous is another winning novel in the electrifying Max Revere series from New York Times bestselling author Allison Brennan. Teen-aged Internet bully Ivy Lake fell off a cliff and few people cared ... except her mentally-challenged eighteen-year-old step-brother, Tommy. He loved her in spite of her cruelty. He's distraught and doesn't understand why his blended family is falling apart. After a year, the police still have no answers: Ivy could have jumped, could have been pushed, or it could have been an accident. With too many suspects and not enough evidence, the investigation has grown cold. Tommy thinks that if someone can figure out what happened to his step-sister, everything will go back to normal, so he writes to investigative reporter Maxine Revere. This isn't the type of case Max normally takes on, but the heartbreak and simple honesty in Tommy's letter pulls her in. She travels to Corte Madera, California, with her assistant David Kane and is at first pleased that the police are cooperative. But the more Max learns about Tommy and his dysfunctional family, the more she thinks she's taken on an impossible task: this may be the one case she can't solve. If Ivy was

murdered, it was exceptionally well-planned and that kind of killer could be hiding in plain sight ... planning the next act of violence. Max believes the truth is always better than lies, that the truth is the only thing that matters to gain justice for victims and their families. But for the first time, she wonders if this time, the truth will kill.

maxwell kane novel free: The Perturbed Self Mengxing Fu, 2021-08-30 By comparison of late nineteenth-century ghost stories between China and Britain, this monograph traces the entangled dynamics between ghost story writing, history-making, and the moulding of a gendered self. Associated with times of anxiety, groups under marginalisation, and tensions with orthodox narratives, ghost stories from two distinguished literary traditions are explored through the writings and lives of four innovative writers of this period, namely Xuan Ding (宣鼎) and Wang Tao (王韬) in China and Vernon Lee and E. Nesbit in Britain. Through this cross-cultural investigation, the book illuminates how a gendered self is constructed in each culture and what cultural baggage and assets are brought into this construction. It also ventures to sketch a common poetics underlying a literature of the anomaly that can be both destabilising and constructive, subversive, and coercive.

This book will be welcomed by the Gothic studies community, as well as scholars working in the fields of women's writing, nineteenth-century British literature, and Chinese literature.

maxwell kane novel free: Agape Ethics William Greenway, 2016-12-22 Consider intense moments when you have been seized by joy or, in different contexts, by anguish for another person, or a cat or dog, or perhaps even for a squirrel or possum struck as it dashed across the road: whether glorious or haunting, these are among the most profound and meaningful moments in our lives. Agape Ethics focuses our attention on such moments with utter seriousness and argues they reveal a spiritual reality, the reality of agape. Powerful streams of modern Western rationality reject the idea of agape. This has created a crisis of foundations in modern ethics and alienated us from love for all creatures. Working wholly within the bounds of reason, Agape Ethics joins an increasingly vibrant struggle to legitimate the spiritual reality of agape, to awaken people to its power, to clarify its ethical implications, and to validate our spiritual communion with all creatures in all creation. The result is a powerful, inclusive, and wholly reasonable defense of moral realism that should speak to all who are passionate about creating a maximally loving and good world.
