marine corps story pdf: The Flying Grunt Alan E. Mesches, 2023-01-23 Inspiring story of a young man from a humble background who received the Bronze and Silver Star for service as a Marine in Korea, including fighting at the Chosin Reservoir, and was almost selected as an astronaut. Richard Edward Carey came from a broken home. Enlisting in the Corps in 1946 he later earned a commission, fighting at Inchon and Chosin in Korea before becoming a pilot—flying every aircraft in the Marine arsenal. During his 38-year military career he witnessed and participated in major historical events, though a high school wrestling injury would eliminate him from the Mercury-7 space program. As a second lieutenant, he tackled General Douglas MacArthur on the way to Seoul in 1950. Carey would provide critical intelligence decisions enabling the successful defense of the Chinese attack on Hagaru-ri at the Chosin Reservoir. In 189 days of combat, he escaped death seven times, and was awarded the Silver Star and Bronze Star Medals. In Vietnam, he flew 204 combat sorties, earning the Distinguished Flying Cross and 16 Air Medals. In 1975, from Saigon, Carey led history's largest helicopter evacuation of refugees. Subordinates praised his leadership and courage. Never afraid to stand up for his principles, Carey faced down an Air Force

general in Vietnam, and organized air defense for supply helicopters at Khe Sahn; he countermanded a senior Naval officer's order during the 1975 Saigon evacuation, refusing to cease air operations and forcing a reluctant ambassador onto a flight. In retirement, Carey served as a cabinet member for the governor of Ohio and ran the airport in his native home of Columbus. When the Careys moved to Texas, Carey continued supporting veterans, advocating for veterans' health care, aiding the drive to build accommodation for families of hospitalized veterans, and was a leader in the effort to build a veterans' cemetery in Dallas. He would lead the drive to build two Chosin Few memorials even as he cared for his ailing wife. This biography is based upon hours of interviews with the general, his papers, speeches, and Marine Corps documents that captured an exceptional and inspiring life.

marine corps story pdf: Understanding the Military Design Movement Ben Zweibelson, 2023-06-09 This book explains the history and development of the military design movement, featuring case studies from key modern militaries. Written by a practitioner, the work shows how modern militaries think and arrange actions in time and space for security affairs, and why designers are disrupting, challenging, and reconceptualizing everything previously upheld as sacred on the battlefield. It is the first book to thoroughly explain what military design is, where it came from, and how it works at deep, philosophically grounded levels, and why it is potentially the most controversial development in generations of war fighters. The work explains the tangled origins of commercial design and that of designing modern warfare, the rise of various design movements, and how today's military forces largely hold to a Newtonian stylization built upon mimicry of natural science infused with earlier medieval and religious inspirations. Why does our species conceptualize war as such, and how do military institutions erect barriers that become so powerful that efforts to design further innovation require entirely novel constructs outside the orthodoxy? The book explains design stories from the Israel Defense Force, the US Army, the US Marine Corps, the Canadian Armed Forces, and the Australian Defence Force for the first time, and includes the theory, doctrine, organizational culture, and key actors involved. Ultimately, this book is about how small communities of practice are challenging the foundations of modern defence thinking. This book will be of much interest to students of military and strategic studies, defence studies, and security studies, as well as design educators and military professionals.

At daybreak on January 6, 1986, a couple on a camping trip in the Mojave Desert set out for a stroll and never returned. To date there's never been an arrest in the case-let alone a conviction. This is the first book to tell the full story of the Berman murders and uncover a likely suspect.

marine corps story pdf: Footprints of the Montford Point Marines Eugene S. Mosley, 2022-01-15 Footprints of the Montford Point Marines explores historic information about the Montford Point Marines and also my dad, Corporal Thomas Mosley, while serving with the first group of African American Marines in the United States. This is the story of a brief period of his life, from Montford Point Camp to the Pacific in World War II, and seventy years later being awarded the Congressional Gold Medal by Congress. These men came from all parts of the United States to the South to train at a segregated facility called Montford Point Camp, adjacent to Camp Lejeune, North Carolina, the largest all-purpose Marine base in the world. It had the best equipment for all types of military training, but these new black enlistees at the adjacent Montford Point Camp were not allowed to enter unless accompanied by a White officer—Camp Lejeune was exclusive to White Marines and their families only. With World War II looming, the government needed all hands on deck and created millions of new jobs in preparation but continued keeping Blacks out of the job market and housing. With the pressure imposed by groups such as the NAACP, President Franklin D. Roosevelt had to rethink these exclusions, at least in the federal workplace, and through

negotiations with many groups, led by A. Philip Randolph, Executive Order 8802 was issued by President Roosevelt on June 25, 1941, to counter racial discrimination. The U.S. Marine Corps was part of the defense industry, and as a result had to open their ranks to African Americans who wished to serve. The Montford Point Marines became giants in the Asiatic Pacific and were some of the greatest heroes this country has ever known. Through swamps, hills, and worse terrain, under heavy enemy gunfire, they were able to supply ammunition, fuel, food, and medical supplies to troops on the front lines where most others had failed. They were also charged with removing the dead and wounded back to the safety of the ships waiting offshore. Eventually they were called to the front lines and fought in every major battle in the Pacific islands. Some seventy years later, on June 27, 2012, approximately four hundred of these brave men, mostly in their eighties and nineties, finally received their just recognition by receiving Congressional Gold Medals. Other families received the medal posthumously. From 1942 to 1949, the 19,168 Montford Point Marines paid the price so others could follow in their footprints to continue the legacy of the few, the proud, the Marines: Semper Fidelis (Always Faithful). They were also known as "The Chosen Few."

marine corps story pdf: Seablindness Seth Cropsey, 2017-08-29 The challenges to American security in the Western Pacific, the seas that surround Europe, and the Persian Gulf are growing. At the same time, U.S. military commanders seek more naval forces to protect America's interest in the safe transit of American goods, deterrence in a proliferating world, and the defense of our key allies. At the same time U.S. defense budgets are shrinking. American seapower has not been as small as it is today since before World War I. Unless reversed, U.S. seapower will continue its decline into the indefinite future as politicians ignore the widening gulf between the cost of modernizing and expanding American seapower, and the resources devoted to this most strategic arm of the nation's defense. *Seablindness* explains the dilemma. It looks at the consequences of neglect including the effect of increased deployments on families, global scenarios set in the immediate future, the views of America's most knowledgeable military officers, the anxious reactions of U.S. allies, and hard facts to show how a lack of political will is dismantling the nation's global reach and with it, our position as the world's great power.

marine corps story pdf: Interpreting American Military History at Museums and Historic Sites Marc K. Blackburn, 2016-04-08 Across the country, museums and historic sites welcome visitors into a world long gone but fundamental to America today. Military history in particular is etched into our country's culture and the public's imagination. The trouble, though, for museums and historical sites lies in continuing to make it both accessible and relevant to today's audiences. Through *Interpreting American Military History at Museums and Historic Sites*, Marc K. Blackburn tackles the difficult task of helping those institutions charged with the care of sites, collections and stories that relate to our past relatable while still maintaining the dignity and reverence of their rich history. Looking at the various components of American military history such as battles and famous figures, Blackburn provides alternatives to the traditional museum experience. The 21st century is a culmination of the past and it is more important than ever to remember and

learn from the triumphs and failures, and this guide provides and explains those strategies for making our stories and collections relevant to modern audiences. This book acts as a primer for those unfamiliar with academic trends of the last forty years. Historiography of American military history, like that of other sub-fields, shifts as new information surfaces or as perspectives change. Blackburn modernizes this area through new interpretative methods, as well as through case studies of museums and historic sites that have created programs, interpretive media, outreach strategies, and mission goals updated to meet the needs of today's patrons. Armed with these strategies, historic institutions will have the foundation to provide compelling, relevant, and engaging experiences for the 21st century audience.

Finally, this work also covers recent American military history since the end of the Cold War with a special emphasis on peacekeeping and peacemaking operations, the First Persian Gulf War, the events surrounding 9/11, and the wars in Afghanistan and Iraq and how the military has been changing in relation to these events. marine corps story pdf: *Understanding the U.S. Military* Katherine Carroll, William B. Hickman, 2022-08-11 This book offers an accessible introduction to the U.S. military as an institution and provides insights into the military's structure and norms. Designed for undergraduate students, the book offers an interdisciplinary overview of America's armed forces through three critical lenses. First, it introduces the military's constitutional and historical context. Second, it presents concise factual information chosen for its relevance to the military's structures, procedures, norms, and varied activities. Finally, it intersperses these facts with debates, theories, and questions to spark student interest, class discussion, and further research. The text is written for the beginner but covers complex topics such as force structure and the defense budget. With contributions informed by both scholarly approaches and long military careers, the book will prepare students for further studies in international relations, civil-military relations, or U.S. foreign policy. It also encourages critical thinking, elucidating an institution that undergraduates and other civilians too often perceive as both baffling and above reproach. This book will be of much interest to students of the U.S. military, civil-military relations, U.S. politics, and public policy.

marine corps story pdf: *Victory Fever on Guadalcanal* William H. Bartsch, 2014-11-07 Following their rampage through Southeast Asia and the Pacific in the five months after Pearl Harbor, Japanese forces moved into the Solomon Islands, intending to cut off the critical American supply line to Australia. But when they began to construct an airfield on Guadalcanal in July 1942, the Americans captured the almost completed airfield for their own strategic use. The Japanese Army countered by sending to Guadalcanal a reinforced battalion under the command of Col. Kiyonao Ichiki. The attack that followed would prove to be the first of four attempts by the Japanese over six months to retake the airfield, resulting in some of the most vicious fighting of the Pacific War. During the initial battle on the night of August 20-21, 1942, Marines wiped out Ichiki's men, who—imbued with “victory fever”—had expected a quick and easy victory. William H. Bartsch draws on correspondence, interviews, diaries, memoirs, and official war records, including those translated from Japanese sources, to offer an intensely human narrative of the failed attempt to recapture Guadalcanal's vital airfield.

marine corps story pdf: War Trauma and Its Wake Raymond M. Scurfield, Katherine Theresa Platoni, 2013 Decades after Charles Figley's landmark Trauma and Its Wake was published, our understanding of trauma has grown and deepened, but we still face considerable challenges when treating trauma survivors. This is especially the case for professionals who work with veterans and active-duty military personnel. War Trauma and Its Wake, then, is a vital book. an Army Reserve psychologist with four deployments--have produced a book that addresses both the specific needs of particular warrior communities as well as wider issues such as battlemind, guilt, suicide, and much, much more. The editors' and contributors' deep understanding of the issues that warriors face makes *War Trauma and Its Wake* a crucial book for understanding the military experience, and the lessons contained in its pages are essential for anyone committed to healing war trauma.

marine corps story pdf: General Lewis Walt: Operational Art in Vietnam, 1965-1967

Major Jeremy G. Swenddal, 2015-11-06 This study investigates the significant effect of mobility, counter-mobility, survivability, and topographic engineering on the American Civil War Campaign of Chancellorsville. The operations occurred near Fredericksburg, Virginia, in April and May of 1863. In the battle, the Confederate Army of Northern Virginia decisively defeated the Union Army of the Potomac. Engineer-related considerations contributed immensely to the Confederate victory. Engineer battlefield functions influenced the operations of both armies. The Union Engineer Brigade constructed numerous pontoon bridges to overcome the river obstacles prior to and following the battle. This capability allowed the Union Army to initially surprise and envelop the Confederate Army. The natural obstacles of the rivers and forests and manmade obstacles of abatis hindered maneuver. Survivability was a significant factor during the fighting. At Chancellorsville, the Confederates used entrenchments for the first time in open operations. This strengthened their economy of force in front of the Union Army and gave "Stonewall" Jackson mass during his successful enveloping attack. Finally, topographic engineering was important through map production and reconnaissance by engineers. This study concludes that the Confederate Army integrated the engineer battlefield functions more effectively than the Union Army. In part, this explains the decisive Confederate victory.

marine corps story pdf: Smedley D. Butler, USMC Mark Strecker, 2014-01-10 The practice of big business promoting war to profit materially was firmly in place by the time Major General Smedley D. Butler wrote about it in his anti-corporate pamphlets. This historical biography explores the life of Butler, a little-known American Marine who exposed an alleged fascist coup to remove President Franklin D. Roosevelt from office. This text is an exploration of the political issues of the first half of the twentieth century and an examination of a complicated, valiant man who shifted from Republican ideals to anti-corporate, left-wing populism.

marine corps story pdf: Early U.S. Navy Carrier Raids, February-April 1942 David Lee Russell, 2019-10-16 After the Japanese attack on Pearl Harbor, America's fast carrier task forces, with their aircraft squadrons and powerful support warships, went on the offensive. Under orders from Fleet Admiral Ernest J. King, the newly appointed Admiral Chester W. Nimitz, as the Commander-in-Chief of the Pacific Fleet, took the fight to the Japanese, using island raids to slow their advance in the Pacific. Beginning in February 1942, a series of task force raids led by the carriers USS Enterprise, USS Yorktown, USS Lexington and USS Hornet were launched, beginning in the Marshall Islands and Gilbert Islands. An attempted raid on Rabaul was followed by successful attacks on Wake Island and Marcus Island. The Lae-Salamaua Raid countered Japanese invasions on New Guinea. The most dramatic was the unorthodox Tokyo (Doolittle) Raid, where 16 carrier-launched B-25 medium bombers demonstrated that the Japanese mainland was open to U.S. air attacks. The raids had a limited effect on halting the Japanese advance but kept the enemy away from Hawaii, the U.S. West coast and the Panama Canal, and kept open lines of communications to Australia.
