living dummy series ebook: Digital Stimulation Mimi Marinucci, 2024-09-05 Digital Stimulation explores the subject of intimacy, including romantic and sexual intimacy, between human and nonhuman entities, particularly technological entities. As relationships between humans and machines become increasingly prevalent, it is important to address the potential for such relationships to reflect, to reinforce, or to reinvent existing hierarchies. The distinction between man and machine, like the distinction between man and beast, between man and brute, between man and nature, between man and woman, and so on, is an expression of the anthropocentrism and androcentrism permeating western ideas of self and other. Concerns about the representation (or misrepresentation) and treatment (or mistreatment) of machines are of consequence for other human and nonhuman others as well, and this book details many of the ways in which depictions of machines, especially robots, mirror ideas and attitudes about various human and nonhuman others. This book also addresses the ongoing development of machines designed explicitly for intimate engagement with humans, such as sex robots. As they become more and more lifelike, it becomes progressively more urgent to cultivate compassion toward such machines.

living dummy series ebook: *The Art of Reception* Jacobus Bracker, Ann-Kathrin Hubrich, 2021-03-05 This book deals with processes of reception in visual arts. Images (in the broadest sense) from different cultures and times are examined. The volume focuses on two key interpretations of reception. On the one hand, reception is understood as a concept of repetition and revision spanning different cultures and time periods. On the other hand, reception is also seen as the process of perceiving images. Both ways of understanding can be described by the metaphor of migration of images: in the first case, images migrate from one medium to another; in the second case, they migrate from the artefact into the human body. The contributions to this volume cover a variety of approaches coming from different disciplines such as Ancient Oriental philology, English and American studies, classical studies, classical archaeology, communication studies, cultural studies, art history, aesthetics, literature, media studies, philosophy, journalism, Romance studies, sociology, Near Eastern archaeology, prehistory, and classical studies.

living dummy series ebook: On Kubrick James Naremore, 2023-05-18 In a comprehensively revised and updated new edition, James Naremore provides an illuminating critical account of the films of Stanley Kubrick, from his earliest feature, *Fear and Desire* (1953), to the posthumously-produced *A.I. Artificial Intelligence* (Steven Spielberg, 2001). Naremore offers provocative analyses of each of Kubrick's films, considering his emphasis on the absurdity of combat, as in *Paths of Glory* (1957) and *Full Metal Jacket* (1987), the failure of scientific reasoning, as in *2001* (1968), and the fascistic impulses in masculine sexuality, as in *Dr Strangelove* (1964) and *Eyes Wide Shut* (1999). He argues that while Kubrick was a voracious intellectual and a life-long autodidact, the fascination of his work has less to do with the ideas it espouses than with the emotions it evokes. Combining close readings with new insights into the production histories and cultural contexts of key films, Naremore provides a concise yet thorough discussion that will be useful to students of Kubrick's filmmaking and cinephiles who seek a deeper insight into the work of this perfectionist genius. Revised throughout, this new edition also includes a fully updated bibliography of critical writings on Kubrick's cinema.
