my perspectives grade 7 pdf: *If Einstein Ran the Schools* Thomas Armstrong Ph.D., 2019-10-11 Many world-class thinkers and creators have been concerned about the state of education in the United States. Discover their thoughts on how children really learn and what teachers must do to optimally tap children's latent abilities. During the last three decades, education reformers have pushed standardized testing and policies like No Child Left Behind and Common Core to improve test scores and proficiency in basic skills. However, during this period that author Thomas Armstrong calls the miseducation of America, a number of troubling trends have surfaced, including a decrease in creative thinking scores among children in kindergarten through third grade. Rather than focus on what's wrong with the education system that has produced these outcomes, Armstrong lays out what creative thinkers know about how children should be educated. In an extended thought experiment, he asks what would happen if we turned the reins of educational policy over, not to the politicians and educational bureaucrats, but to eminent thinkers and creators like Albert Einstein, Pablo Picasso, Martin Luther King Jr., Rachel Carson, Doris Lessing, Jane Goodall, and other seminal culture-builders. What might they say about the best way to educate a child? *If Einstein Ran the Schools* suggests that the answers to this intriguing question should guide future efforts to reform our nation's schools.

But how come in the 21st century a government or authority or even institutions can be regarded as practising structural or institutional racism with all these rights groups and laws? People are saying there is no racism while some are adamant that racism exists because the byproducts are exactly those that result from

structural or institutional racist structures. So, is there something that exists that people can't pinpoint, but what is causing all this? This is the billion-dollar question. What are we missing? Is there something else that is going on that is creating the same effects that people especially young generations born here are complaining about? OK, first what is similar to racism, or what can yield the same effects as racism?

The first edition drew upon two years of intensive fieldwork in one high school and 300 written interviews about high schools across the country, where he argued that consumer culture greatly impacts the way our youth relate to one another and understand themselves and society. Milner now expands on that concept with a new year of fieldwork fifteen years after he began. Why can't my students pay attention? It's a deceptively simple question that's increasingly on teachers' minds. It's not about fixing students facing distractions—digital or otherwise. Rather, it's about looking at inattention in new ways and adopting proven, attention-promoting strategies that are learner-centered, respectful, and effective. In *Promoting Student Attention*, psychologist and educator Robin Wisniewski • Discusses what attention is and offers a framework for thinking about student attention. • Explains how to assess inattention in the classroom and find root causes. • Introduces five principles for promoting attention, along with strategies to use right away. • Addresses ADHD—what it is and isn't—and presents targeted approaches to help students with specific inattention or impulsivity issues. • Shares the experiences of real teachers who have created conditions for attention in their classrooms. Students can't learn if they can't focus. Use this book to better support students who struggle with attention issues and to create an improved learning environment for all the students you teach.
