orchestral music education resource: *Understanding the Classical Music Profession* Dr Dawn Elizabeth Bennett, 2013-01-28 *Understanding the Classical Music Profession* is an essential resource for educators, practitioners and researchers who seek to understand the careers of classically-trained musicians, and the extent to which professional practice is reflected within existing classical performance-based music education and training. Taking Australia as a case-study, Dawn Bennett outlines how Australia is now a service economy, and an important component of service provision is in the culture and recreation industries. Despite this, employment in culture and recreation is poorly understood and a lack of cultural intelligence contributes to a less than satisfactory environment that inhibits the creative potential of cultural practitioners. Musicians in the twenty-first century require a broad and evolving base of skills and knowledge to sustain their careers as cultural practitioners. Bennett maintains that a musician cannot be simply defined as a performer, but that a musician is someone who works within the profession of music in one or more specialist fields. The perception of a musician as a multi-skilled professional working within a portfolio career has significant implications for policy, funding, education and training, and for practitioners and students seeking to achieve sustainable careers. This indispensable book provides a comprehensive analysis of life as a musician, from education and training to professional practice as well as revealing the structure of the Australian cultural industries. Although Australia is the focus of the book, the basis of the research originates from many different places and most of the issues discussed relate directly to other countries throughout the world.

orchestral music education resource: *Opening Doors: Orchestras, Opera Companies and Community Engagement* Emily Dollman, 2023-06-30 What is the role of classical music in the 21st century? How will classical musicians maintain their relevance and purpose? This book follows the working activities of professional orchestral musicians and opera singers as they move off stage into schools, community centres, prisons, libraries, and corporations, engaging with their communities in new, rich ways through education and community engagement programmes. Key examples of collaborative partnerships between orchestras, opera companies, schools and music services in the delivery of music education are investigated, with a focus on the UK's Music Hub system. The impact of these partnerships is examined, both in terms of how they inspire and foster the next generation of musicians as well as the extent to which they broaden access to quality music education. Detailed case studies are provided on the impact of classical music education programmes on social cohesion, health and wellbeing, and the education outcomes for students from low socio-economic communities. The implications for the future training of classical musicians are analysed, as are the new career paths for orchestral musicians and composers straddling performance and education. *Opening Doors: Orchestras, Opera Companies and Community Engagement* investigates the ways in which the classical music industry is reinventing its sense of purpose, never a more important or urgent pursuit than in the present decade.

In this book, scholars, activists and musicians from countries across Europe and North America analyze inequalities in the classical music profession and introduce strategies for making change. As such, it will be a significant point of reference for musicians,

students, classical music administrators, policy-makers, teachers, and academics -- and anyone else who wants to make classical music more inclusive.
