modern global history textbook download: Global History, Globally Sven Beckert, Dominic Sachsenmaier, 2018-02-22 In recent years historians in many different parts of the world have sought to transnationalize and globalize their perspectives on the past. Despite all these efforts to gain new global historical visions, however, the debates surrounding this movement have remained rather provincial in scope. Global History, Globally addresses this lacuna by surveying the state of global history in different world regions. Divided into three distinct but tightly interweaved sections, the book's chapters provide regional surveys of the practice of global history on all continents, review some of the research in four core fields of global history and consider a number of problems that global historians have contended with in their work. The authors hail from various world regions and are themselves leading global historians. Collectively, they provide an unprecedented survey of what today is the most dynamic field in the discipline of history. As one of the first books to systematically discuss the international dimensions of global historical scholarship and address a wealth of questions emanating from them, Global History, Globally is a must-read book for all students and scholars of global history.

modern global history textbook download: **An Indian Tantric Tradition and Its Modern Global Revival** D.E. Osto, 2020-03-06 This book analyzes the contemporary global revival of Nondual Śaivism, a thousand-year-old medieval Hindu religious philosophy. Providing a historical overview of the seminal people and groups responsible for the revival, the book compares the tradition's medieval Indian origins to modern forms, which are situated within distinctively contemporary religious, economic and technological contexts. The author bridges the current gap in the literature between insider (emic) and outsider (etic) perspectives by examining modern Nondual Śaivism from multiple standpoints as both a critical scholar of religion and an empathetic participant-observer. The book explores modern Nondual Śaivism in relation to recent scholarly debates concerning the legitimacy of New Age consumptive spirituality, the global spiritual marketplace and the contemporary culture of narcissism. It also analyzes the dark side of the

revived tradition, and investigates contemporary teachers accused of sexual abuse and illegal financial activities in relation to unique features of Nondual Śaivism's theosophy and modern scholarship on new religious movements (NRMs) and cults. This book shows that, although Kashmir Śaivism has been adopted by certain teachers and groups to market their own brand of High Tantra, some contemporary practitioners have remained true to the system's fundamental tenets and teach authentic (albeit modern) forms of Nondual Śaivism. This book will be of interest to academics in the fields of religion and Asian philosophies, especially South Asian, tantric, neo-tantric and yoga philosophies, alternative and New Age spiritualities, religion and consumerism, and NRMs and cults. Winner of the inaugural 2021 New Zealand Asia Society Book Award, second prize.

modern global history textbook download: Confronting Capital and Empire Viren Murthy, Fabian Schäfer, Max Ward, 2017-07-10 Confronting Capital and Empire inquires into the relationship between philosophy, politics and capitalism by rethinking Kyoto School philosophy in relation to history. The Kyoto School was an influential group of Japanese philosophers loosely related to Kyoto Imperial University's philosophy department, including such diverse thinkers as Nishida Kitarō, Tanabe Hajime, Nakai Masakazu and Tosaka Jun. Confronting Capital and Empire presents a new perspective on the Kyoto School by bringing the school into dialogue with Marx and the underlying questions of Marxist theory. The volume brings together essays that analyse Kyoto School thinkers through a Marxian and/or critical theoretical perspective, asking: in what ways did Kyoto School thinkers engage with their historical moment? What were the political possibilities immanent in their thought? And how does Kyoto School philosophy speak to the pressing historical and political questions of our own moment?

modern global history textbook download: History, Politics and Theory in the Great Divergence Debate Olya Murphy, 2023-12-31 World history suffers from a paucity of clearly articulated, convincing explanations. While the rise of postmodernism and challenges to Eurocentrism did lead to some important correctives, the pendulum has swung too far the other direction, with a corresponding danger of 'throwing the baby out with the bathwater'. We need careful, theoretically informed debates about ways of organizing world history. What constitutes a good historical explanation? What should guide historians to choose relevant facts? Which theoretical schools could be made useful, and to what ends? These questions are especially relevant to the main topic of this book: the 'great divergence' between the west and the rest of the world, and how this historical rupture is to be explained. The book provides extensive critical analyses of some of the key claims in world history, analyzing their strengths as well as their major weaknesses—too often rooted in insufficient familiarity of historians with theories they discard. It also historicizes the field and the debates to partly account for what caused some theories to become more influential and others to fall into oblivion—despite the fact that the more influential frameworks are seriously flawed and some of the more marginalized ideas are more coherent and plausible. The book offers insights regarding the theoretical and political relevance of older debates about the transition to capitalism and historical materialism. Three major schools of thought in world history are critically

examined through an in-depth theoretical and comparative analysis that has not been undertaken elsewhere: the so-called 'California School', World Systems Analysis, and Marxist theories of history, capitalism, and the transition from feudalism to capitalism. Murphy argues that, despite some of the more recent criticisms of older approaches to world history, the older theories remain indispensable for the writing of world history and for coming to terms with issues of global poverty, inequality and eco-catastrophe.

modern global history textbook download: Cyber Security in the Age of Artificial Intelligence and Autonomous Weapons Mehmet Emin Erendor, 2024-11-19 Although recent advances in technology have made life easier for individuals, societies, and states, they have also led to the emergence of new and different problems in the context of security. In this context, it does not seem possible to analyze the developments in the field of cyber security only with information theft or hacking, especially in the age of artificial intelligence and autonomous weapons. For this reason, the main purpose of this book is to explain the phenomena from a different perspective by addressing artificial intelligence and autonomous weapons, which remain in the background while focusing on cyber security. By addressing these phenomena, the book aims to make the study multidisciplinary and to include authors from different countries and different geographies. The scope and content of the study differs significantly from other books in terms of the issues it addresses and deals with. When we look at the main features of the study, we can say the following: Handles the concept of security within the framework of technological development Includes artificial intelligence and radicalization, which has little place in the literature Evaluates the phenomenon of cyber espionage Provides an approach to future wars Examines the course of wars within the framework of the Clausewitz trilogy Explores ethical elements Addresses legal approaches In this context, the book offers readers a hope as well as a warning about how technology can be used for the public good. Individuals working in government, law enforcement, and technology companies can learn useful lessons from it.

modern global history textbook download: Music and the Making of Modern Japan Margaret Mehl, 2024-05-29 Japan was the first non-Western nation to compete with the Western powers at their own game. The country's rise to a major player on the stage of Western music has been equally spectacular. The connection between these two developments, however, has never been explored. How did making music make Japan modern? How did Japan make music that originated in Europe its own? And what happened to Japan's traditional music in the process? Music and the Making of Modern Japan answers these questions. Discussing musical modernization in the context of globalization and nation-building, Margaret Mehl argues that, far from being a side-show, music was part of the action on centre stage. Making music became an important vehicle for empowering the people of Japan to join in the shaping of the modern world. In only fifty years, from the 1870s to the early 1920s, Japanese people laid the foundations for the country's post-war rise as a musical as well as an economic power. Meanwhile, new types of popular song, fuelled by the growing global record industry, successfully blended inspiration from the West with musical characteristics perceived as Japanese. Music and the Making of Modern Japan represents a fresh contribution to historical research on making music as a major cultural, social, and political force.
