**multicultural memoir ebook:** Digital Storytelling in Health and Social Policy Nicole Matthews, Naomi Sunderland, 2017-04-21 As digital life stories continue to assume more and more significance across a range of institutions, so too does their potential to bring into focus once marginalised and neglected voices. Breaking new ground by reframing multimedia life stories as a resource for education, public health, and policy, this book challenges policymakers, professionals, and researchers to reimagine how they find out about and respond to people's daily lives and experiences of health, disability, and well-being. The book develops theoretical, methodological, and practical resources for listening to digital stories through a series of carefully selected international case studies, from dementia care education to campaigns in the UN to ban cluster munitions. The case studies explore and illuminate different ways that digital stories have - and have not - been listened to in the past. The authors expose the great potential as well as the complexity of using powerful personal stories in practice. Together, the case studies highlight that processes of listening to, learning from, and making use of digital stories involve unavoidable processes of reinterpretation, recontextualisation, and translation which have significant ethical and political implications for storytellers, listeners, and society. In mapping and theorising the movement of stories into new contexts of policy and practice, the book offers a critical lens on the widely celebrated democratising potential of digital storytelling and its capacity to amplify marginalised voices. Digital Storytelling in Health and Social Policy develops an authoritative and original re-conceptualisation of digital life stories and their use for social justice ends, and will be important reading for researchers and practitioners from a range of backgrounds, including social policy, digital media, communication, education, disability, and public health.

**multicultural memoir ebook:** *Digital Social Reading and Second Language Learning and Teaching* Joshua J. Thoms, Kristen Michelson, 2024-10-15 Rapid changes in communication channels, tools, and conventions of interaction over the last two decades have paved the way for increasingly digital learning environments. In second language (L2) education, shifts toward digital learning and teaching were intensified during the pandemic and many such formats are here to stay. At the same time, a growing interest in socially oriented pedagogies in L2 learning and teaching is prompting many L2 researchers and practitioners to investigate new research areas and explore post-communicative language teaching pedagogies that engage learners more deeply with cultural texts, using a range of semiotic and linguistic resources. Digital Social Reading (DSR) is a pedagogical approach that affords technology-mediated collaborative reading, where texts are read through a digital platform that allows two or more readers to highlight the same virtual copy of a text and discuss it through a digital interface that affords synchronous or asynchronous margin dialogues anchored in specific passages. This book offers empirical studies demonstrating how DSR can foster—and illuminate—learner interactions that mediate learning, and also work that focuses on language teaching perspectives in DSR environments, including task design and assessment issues.

**multicultural memoir ebook:** *History in the Digital Age* Toni Weller, 2013 The digital age is affecting all aspects of historical study, but much of the existing literature about history in the digital age can be alienating to the traditional historian who does not necessarily value or wish to

embrace digital resources. History in the Digital Age takes a more conceptual look at how the digital age is affecting the field of history for both scholars and students. The printed copy, the traditional archive, and analogue research remain key constitute parts for most historians and for many will remain precious and esteemed over digital copies, but there is a real need for historians and students of history to seriously consider some of the conceptual and methodological challenges facing the field of historical enquiry as we enter the twenty-first century. Including international contributors from a variety of disciplines - History, English, Information Studies and Archivists - this book does not seek either to applaud or condemn digital technologies, but takes a more conceptual view of how the field of history is being changed by the digital age. Essential reading for all historians.

**multicultural memoir ebook:** *New Directions in Digital Poetry* C.T. Funkhouser, 2012-01-19 As poets continue to use digital media technology, functionalities of computing extend aesthetic possibilities in documents focusing attention on crafting verbal content. Utility of these machines and tools enables multiple types of compounded articulation (combinations of verbal, visual, animated, and interactive elements). Building larger public awareness of the mechanics of digital poetry, *New Directions in Digital Poetry* aspires to influence the formation of writing with media in literary society of the future, specifically as a record of a particular technological era. Emerging from these studies is that digital poetry as a WWW-based, networked form happens 'in stages', 'on stages'. Few works require singular responses from viewers - both composition of works and viewing them are processes involving multiple steps and visual scenarios. For anyone interested in the interplay of poetry and technology, this book provides an informed look at digital poetry in its contemporary state. In the process of performing close readings, Funkhouser makes suggestions and provides methods for viewing works, for audiences perhaps unfamiliar with mechanical and semiotic conventions being used.

**multicultural memoir ebook:** *Getting Personal* Laura Gray-Rosendale, 2018-01-29 Addresses how digital forms of personal writing can be most effectively used by teachers, students, and other community members. At a time when Twitter, Facebook, blogs, Instagram, and other social media dominate our interactions with one another and with our world, the teaching of writing also necessarily involves the employment of multimodal approaches, visual literacies, and online learning. Given this new digital landscape, how do we most effectively teach and create various forms of "personal writing" within our rhetoric and composition classes, our creative writing classes, and our community groups? Contributors to *Getting Personal* offer their thoughts about some of the positives and negatives of teaching and using personal writing within digital contexts. They also reveal intriguing teaching activities that they have designed to engage their students and other writers. In addition, they share some of the innovative responses they have received to these assignments. *Getting Personal* is about finding ways to teach and use personal writing in the digital age that can truly empower writing teachers, writing students, as well as other community members. "Getting Personal offers an engaging, comprehensive view of how and why instructors, in both creative and academic writing, can integrate contemporary writing and communication practices into their classrooms, assignments, and curricula." Jill Talbot, editor of *Metawritings: Toward a Theory of Nonfiction* "I am right now rethinking some of my assumptions about what it means to do and to teach personal writing—especially in digital environments. I'm also taken with the fact that while the chapters are clearly academic, they are also personal, and while several of them explicitly call the "false binary between the personal and the academic" into question, my sense is that they themselves do so implicitly as well." Barry M. Maid, coauthor of *The McGraw-Hill Guide: Writing for College, Writing for Life, Fourth Edition*
